Freelance Formulation

General Information

Product ID	2PAA110436R10
ABB Type Designation	Freelance 2019
Catalog Description	Freelance Formulation

Long Description

Freelance Formulation is an essential recipe management component for single product or multi-grade product applications. Freelance Formulation provides recipe management the easy way. Typical applications areas are:

- recipe management in the food and beverage industry
- tank farm automation
- other industries such as cement, fine chemicals, paint, coating, boiler, pharmaceutical, etc.

Freelance Formulation is also a preferred solution for common sequencing applications like continuous process startup/shutdown, equipment sequencing, or cleaning skid control. With these applications you have repeatable execution of activities and can make use of parameters. That means that instead of pure Sequential Function Charts (SFC), Freelance Formulation's flexible parameter management and traceability allows for shorter changeover times from one recipe to another.

Additional Information
