

Dispense head VTOI

FESTO

Key features

Description

Thanks to a grid dimension of 9 mm and a valve with 8 outputs, the VTOI can be easily connected in series, precisely matched to the microwell plate. A 96-channel dispense head can now be realised with only 12 valves.

With just a few other components, you can have a complete dispensing system with a pressure-over-liquid setup.

As only high-performance materials such as PEI (ULTEM), PPS, FKM, ETFE and high-alloy stainless steel come into contact with the media, it can also be used to dispense and aspirate aggressive media.

Advantages:

- Extremely precise
- 9 mm grid dimension ideal for microwell plates
- Simple design with side-by-side mounting for increased throughput
- Complete system using just a few components
- 1 valve for 8 channels

Design of VTOI

- [1] Dispense head VTOI
- [2] Fitting
- [3] Clamping component
- [4] Dosing needle VAVN

Typical areas of application:

- Filling microwell plates
- Dispensing gaseous and liquid media
- Dispensing and aspirating gaseous and liquid media

Electrical installation

- [1] Electrical connection

Connect wire ends [1]. Polarity as desired.

Fluid installation

- [1] Fitting with clamping component
- [2] Tubing
- [3] Port

Mount the clamping component [1] on the tubing [2]. Then tighten the clamping component [1] in the port [3].

Description

Mounting

- [1] Dispense head VTOI
- [2] Mounting surface
- [3] Screws

Position dispense head [1] on the mounting surface [2] and fasten using screws [3].

Mounting on drive with adapter plate

- [1] Dispense head VTOI
- [2] Adapter plate
- [3] Screws
