

Standards-based cylinder DSBF-C, to ISO 15552, clean design

**FESTO**

## Key features

### At a glance

- Standards-based cylinders to ISO15552 (corresponds to the withdrawn standards ISO 6431, DIN ISO 6431, VDMA24562, NFE49003.1 and UNI 10290)

- The standards-based cylinder is used wherever hygiene, ease of cleaning and resistance are important, predominantly in dry and splash zones in the food and packaging industry.
- For hygiene reasons, the threads on the cylinder caps should be sealed with suitable plug screws (available as accessories → page 33)

- Resistant to conventional cleaning agents
- Increased corrosion protection
- Three types of cushioning available:
  - Elastic cushioning: elastic cushioning rings/plates at both ends
  - PPS cushioning: pneumatic cushioning, self-adjusting at both ends
  - PPV cushioning: pneumatic cushioning, adjustable at both ends

- The variants can be configured according to individual needs using a modular product system
- Excellent flexibility thanks to a wide range of variants
- Comprehensive range of mounting accessories for just about every type of installation
- Contactless position sensing via proximity switches

### The technology in detail

- [1] Hygienic and self-adjusting PPS cushioning
- [2] Easy-to-clean cylinder profile without corners and recesses
- [3] Corrosion-resistant cylinder surface
- [4] Standard dimensions and mounting accessories to ISO 15552
- [5] NSF-H1 lubricant and special wiper seal (characteristic A3) suitable for contact in the food area. Long service life even with insufficient lubrication due to frequent cleaning processes

### Longer service life with bellows kit DADB

The bellows protects the piston rod, the seal and the bearing from the effects of a wide range of media, which has a positive impact on the service life of these components.

The bellows kit is a leak-free system. To prevent unwanted media from being drawn in, the supply and exhaust air for the kit must be ducted via a pressure compensation hole in the connection part [1].

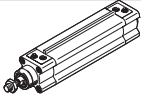

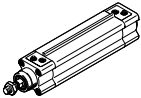

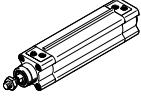

The kit protects the piston rod, seal and bearing against a wide variety of media, for example:

- Dust
- Chippings
- Oil
- Grease
- Petrol

## Key features

Variants from the modular product system		
Symbol	Key features	Description
	L Low friction	<ul style="list-style-type: none"> <li>• Break-away pressure: high</li> <li>• Dynamic response: very fast</li> <li>• Resistance: minimal resistance during movement, maximum stick-slip</li> </ul> Application example: belt tensioner <ul style="list-style-type: none"> <li>• Suitable for applications that require dynamic movement</li> <li>• Efficient at speeds above 50 mm/s</li> </ul>
	U Constant, slow movement	<ul style="list-style-type: none"> <li>• Break-away pressure: low</li> <li>• Dynamic response: slow and constant</li> <li>• Resistance: strong resistance during movement, minimal stick-slip</li> </ul> Application example: slow feed motion <ul style="list-style-type: none"> <li>• Suitable for slow movements at a constant speed over the stroke range</li> </ul>
	T Through piston rod	For working at both ends with the same force in the forward and return stroke, for attaching external stops
	F Female thread on the piston rod	–
	T1 Heat-resistant seals	Temperature range 0 ... +120°C
	T3 Low temperature	Temperature range –40 ... +80 °C
	T4 Heat-resistant seals	Temperature range 0 ... +150°C
	A1 Wiper variant	Increased chemical resistance: for longer service life, e.g. when using cooling lubricants.
	A2 Wiper variant	Hard wiper: The cylinder has a hard-chrome-plated piston rod and a hard wiper seal, which protects against dry, dusty media
	A3 Wiper variant	Unlubricated operation: Cleaning processes degrease the piston rod. A special piston rod seal designed for unlubricated operation permits a longer service life compared to the standard seal
	...E Extended piston rod	–
	...L Extended piston rod thread	–

DSBF...-T3	[°C]	-40 ... +80						
DSBF...-T4	[°C]	0 ... +150						
DSBF...-EX4	[°C]	-20 ... +60						
Suitability for the food industry <sup>3)</sup>	→ Supplementary material information							
Corrosion resistance class CRC <sup>4)</sup>	3							

1) Values apply only for strokes ≤ 500 mm and after 10 double strokes.

In combination with cushioning PPV/PPS, the specifications only apply outside the cushioning range

2) Note operating range of proximity switches.

3) More information: [www.festo.com/sp](http://www.festo.com/sp) → Certificates.

4) Corrosion resistance class CRC 3 to Festo standard FN 940070

High corrosion stress. Outdoor exposure under moderate corrosive conditions. External visible parts with primarily functional surface requirements that are in direct contact with a normal industrial environment.

ATEX <sup>1)</sup>	
ATEX category for gas	II 2G
Type of (ignition) protection for gas	Ex h IIC T4 Gb
ATEX category for dust	II 2D
Type of (ignition) protection for dust	Ex h IIIC T120°C Db
Ex ambient temperature	-20°C ≤ Ta ≤ +60°C
CE marking (see declaration of conformity)	To EU Explosion Protection Directive (ATEX)
UKCA marking (see declaration of conformity)	To UK explosion regulations
Explosion protection certification outside the EU	EPL Gb (GB)
	EPL Db (GB)

1) Note the ATEX certification of the accessories.

Forces [N] and impact energy [J]								
Piston diameter		32	40	50	63	80	100	125
Theoretical force at 6 bar, advancing		483	754	1178	1870	3016	4712	7363
Theoretical force at 6 bar, retracting		415	633	990	1682	2721	4418	6881
Max. impact energy in the end positions

## Datasheet

### Dimensions – Variants

Download CAD data → [www.festo.com](http://www.festo.com)

T – Piston type: through piston rod

+ = plus stroke length  
++ = plus 2x stroke length

F – Female piston rod thread

-  - **Note**

In combination with variant T, the piston rod has female threads at both ends.

...E – Extended piston rod

-  - **Note**

Piston rod extension at one end in combination with variant T.

...L – Extended piston rod thread

-  - **Note**

In combination with variant T, the piston rod thread is extended at both ends.

Sensor mounting	Mounting rail for sensors									<b>-R</b>	-R

[1] L, U Not with T, T1, T3, T4, A1, A2, A3 and EX4

[2] F Not with ...L

[3] PPS Not with T1, T3, T4, A1

[4] T1, T3, T4 Not with A1, A2, A3, EX4

[5] A1, A3 Not with EX4

[6] ...E, ...L Only up to stroke 2000 mm

Not with N3

## Accessories

### Foot mounting CRHNC

Material:  
High-alloy steel  
Free of copper and PTFE

1) Corrosion resistance class CRC 4 to Festo standard FN 940070

Particularly high corrosion stress. Outdoor exposure under extreme corrosive conditions. Parts exposed to aggressive media, e.g. in the chemical or food industries. These applications may need to be supported with special tests (→ FN 940082) using appropriate media.

2) Suitable for ATEX

### Flange mounting CRFNG

Material:  
High-alloy steel  
Free of copper and PTFE

Cannot be used on the bearing cap in combination with protective bellows kit DADB.

1) Corrosion resistance class CRC 4 to Festo standard FN 940070

Particularly high corrosion stress. Outdoor exposure under extreme corrosive conditions. Parts exposed to aggressive media, e.g. in the chemical or food industries. These applications may need to be supported with special tests (→ FN 940082) using appropriate media.

2) Suitable for ATEX

## Accessories

### Trunnion flange CRZNG

Material:  
High-alloy steel  
Free of copper and PTFE

Cannot be used on the bearing cap in combination with protective bellows kit DADB.

1) Corrosion resistance class CRC 1 to Festo standard FN 940070

Low corrosion stress. Dry indoor applications or transport and storage protection. Also applies to parts behind covers, in the non-visible interior area, or parts that are covered in the application (e.g. drive trunnions).

Corrosion resistance class CRC 2 to Festo standard FN 940070

Moderate corrosion stress. Indoor applications in which condensation can occur. External visible parts with primarily decorative surface requirements that are in direct contact with a normal industrial environment.

Corrosion resistance class CRC 3 to Festo standard FN 940070

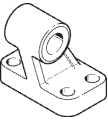

High corrosion stress. Outdoor exposure under moderate corrosive conditions. External visible parts with primarily functional surface requirements that are in direct contact with a normal industrial environment.

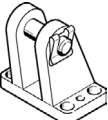

Corrosion resistance class CRC 4 to Festo standard FN 940070

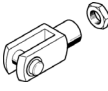

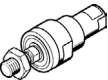

Particularly high corrosion stress. Outdoor exposure under extreme corrosive conditions. Parts exposed to aggressive media, e.g. in the chemical or food industries. These applications may need to be supported with special tests

(→ FN 940082) using appropriate media.

## Accessories

### Travel speed $v$ as a function of tubing length $l$

The bellows kit is a leak-free system. To prevent unwanted media from being drawn in, the supply and exhaust air for the kit must be ducted via a pressure

compensation hole in the connection part [1]. The pressure generated in the bellows kit by the positioning motion is primarily defined by the travel speed and tubing length.

The recommended tubing length in relation to the travel speed of the drive can be read from the graph.

#### Advancing

— Ø 32/50/63  
 - - - - - Ø 40  
 - · - · - · Ø 80/100

#### Retracting

— Ø 32  
 - - - - - Ø 40  
 - · - · - · Ø 50/63  
 · · · · · Ø 80/100

#### Note

The push-in fittings in the adjacent table must be used for the pressure compensation hole. Silencers can be used as an alternative. This reduces the travel speed slightly.

#### Tubing size and push-in fitting for pressure compensation hole

1) The dimension corresponds to the E value (extended piston rod) of the drive

## Accessories

### Ordering data – Bellows kit

An extended piston rod (order code ...E) → page 21 is absolutely essential when using a bellows kit.

The following table specifies the required dimension for E as a function of piston diameter and stroke of the cylinder as well as the associated bellows kit:

#### Order example:

Selected standards-based cylinder:

DSBF-C-32-320-PPV-A-N3-...E-R

The dimension for the corresponding E value (see table):

112 mm

Complete order reference for standards-based cylinder:

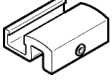

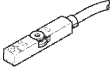

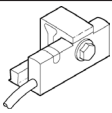

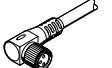

DSBF-C-32-320-PPV-A-N3-112E-R

The corresponding bellows kit:

DADB-V6-32-S301-350

## Accessories

Ordering data – Mounting kit						
	Description	Part no.	Type			
	For fitting the proximity switch CRSMT-8M on the mounting rail	<b>1806790</b>	<b>SMB-8-C</b>			
Ordering data – Proximity switch for T-slot, magneto-resistive						
Datasheets → Internet: smt						
	Type of mounting	Switching output	Electrical connection	Cable length [m]	Part no.	Type
N/O contact						
	Inserted in the slot from above, flush with the mounting kit	PNP	Cable, 3-wire	5.0	<b>574380</b>	<b>CRSMT-8M-PS-24V-K-5.0-OE</b>
			Cable, 3-wire	10.0	<b>574381</b>	<b>CRSMT-8M-PS-24V-K-10.0-OE</b>
			Plug M8x1, 3-pin	0.3	<b>574383</b>	<b>CRSMT-8M-PS-24V-K-0.3-M8D</b>
			Plug M12x1, 3-pin	0.3	<b>574382</b>	<b>CRSMT-8M-PS-24V-K-0.3-M12</b>
Ordering data – Proximity switch for T-slot, magneto-resistive						
Datasheets → Internet: smt						
	Type of mounting	Switching output	Electrical connection	Cable length [m]	Part no.	Type
N/O						
	Fitted on the mounting rail	PNP	Cable, 3-wire	5.0	<b>571339</b>	<b>SMT-C1-PS-24V-K-5.0-OE</b>
			Plug M8x1, 3-pin	0.3	<b>571342</b>	<b>SMT-C1-PS-24V-K-0.3-M8D</b>
			Plug M12x1, 3-pin	0.3	<b>571341</b>	<b>SMT-C1-PS-24V-K-0.3-M12</b>
Ordering data – Connecting cables						
Datasheets → Internet: nebu						
	Electrical connection, left	Electrical connection, right	Cable length [m]	Part no.	Type	
	Straight socket, M8x1, 3-pin	Cable, open end, 3-wire	2.5	<b>541333</b>	<b>NEBU-M8G3-K-2.5-LE3</b>	
			5	<b>541334</b>	<b>NEBU-M8G3-K-5-LE3</b>	
	Straight socket, M12x1, 5-pin	Cable, open end, 3-wire	2.5	<b>541363</b>	<b>NEBU-M12G5-K-2.5-LE3</b>	
			5	<b>541364</b>	<b>NEBU-M12G5-K-5-LE3</b>	
	Angled socket, M8x1, 3-pin	Cable, open end, 3-wire	2.5	<b>541338</b>	<b>NEBU-M8W3-K-2.5-LE3</b>	
			5	<b>541341</b>	<b>NEBU-M8W3-K-5-LE3</b>	
	Angled socket, M12x1, 5-pin	Cable, open end, 3-wire	2.5	<b>541367</b>	<b>NEBU-M12W5-K-2.5-LE3</b>	
			5	<b>541370</b>	<b>NEBU-M12W5-K-5-LE3</b>

1) Corrosion resistance class CRC 3 to Festo standard FN 940070

High corrosion stress. Outdoor exposure under moderate corrosive conditions. External visible parts with primarily functional surface requirements that are in direct contact with a normal industrial environment.

2) Packaging unit

3) Suitable for ATEX
