

Improve your machine performance

Modicon M258
Performance Logic controller

SoMachine™

> Imagine what total flexibility can do for your business...

The Modicon™ M258 Logic controller is a compact, high-performance, and fully expandable PLC. It is a part of our Flexible Machine Control approach, a key component of our MachineStruxure™ solution which offers you maximum flexibility and optimized control of your machines. With features such as speed control, counting, axis control, and communication functions, the Modicon M258 Logic Controller is developed specifically for machine builders (OEMs) in the packaging, conveying/storage, textile, and woodworking machine industries.

- Core 1 User Logic
 - Core 2 Comm
 - RAM 64Mb
 - Flash 128Mb
- Ethernet
CANopen
MODBUS

> Improve your machine performance

- > Basic processing time: 22 ns/Inst
- > Programme memory: 128 K instructions
- > RAM: 64 Mb
- > Flash memory: 128 Mb
- > 8 embedded high-speed counters (200 kHz each)

- Speed up machine design**
 - > SoMachine™ software:
 - 6 Programming Languages (IEC 1131-3)
 - Function blocks
 - Tested, validated, documented architectures
 - Maximize operation and reduce maintenance
 - Diagnosis through transparency and remote access
- Embedded Ethernet: Performance and openness**
 - > 10/100 Mb Available protocols:
 - Ethernet IP device
 - Ethernet TCP Modbus
 - SoMachine protocol
 - +
 - Embedded FTP server
 - Embedded web server
- Embedded CANopen Master**
 - > Flexibility for your distributed architectures:
 - Up to 32 slaves
 - Up to 1 Mb
 - > Speed up machine design:
 - CANopen® configurator integrated in SoMachine software
 - PLCopen motion libraries
- Save time in programming and commissioning**
 - > Thanks to our two standard USB ports:
 - Mini-USB B port for SoMachine programming software
 - USB-A port for memory key for programme, firmware, data files transfer
 - > Speed: 480 Mbits/s
- Openness through Modbus serial network**
 - > Openness thanks to two standard protocols:
 - Modbus Master/slave
 - Character RS232 or RS485
 - > Data Terminal Equipment (DTE: printer, bar code scanner...)
 - > Cordset for Data Communication Equipment (DCE: modem, converter...)

> Compact I/O Modules

- From 20 to 42 I/O
- Digital and/or analog

> Saving space

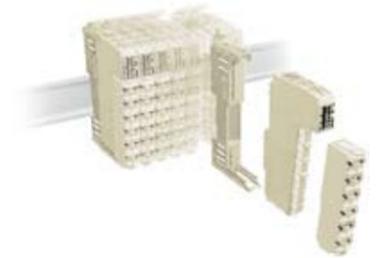

- 62.5 mm long

> Slice I/O Modules

- From 2 to 12 I/O
- Digital, Analog, Expert

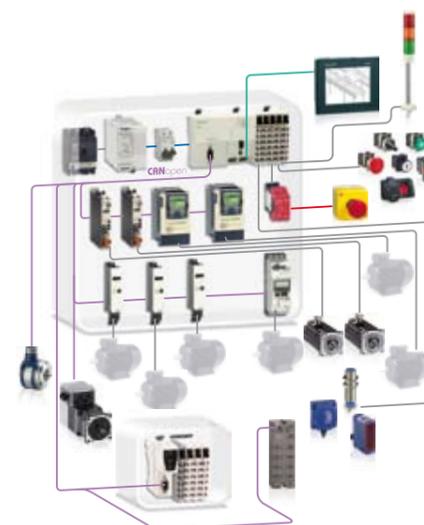

> Saving space

- 12.5 mm long

> Integrated machine flexibility

- > High-speed counting:
 - 8 integrated high-speed counters at 200 kHz each
 - A complete range of counting expansion modules
- > Inverter control
 - Through built-in Modbus serial line
 - Through built-in CANopen Master
- > Positioning
 - Through built-in CANopen Master and PLCopen function blocks
- > Temperature control
 - Through a wide range of temperature modules and integrated regulation function blocks

> Local flexibility

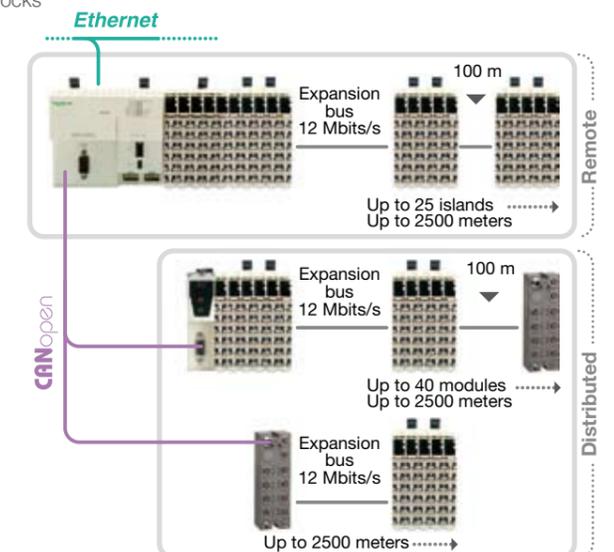

The cost of a compact controller The flexibility of a modular controller

- > Compact I/O modules:
 - Low cost
 - High density
- > Slice I/O modules:
 - Fine tuning
 - Hot swap
 - Modularity from 2 to 12 channels
- > Removable terminal blocks
- > Spring terminals

> Remote/distributed flexibility

Expansion I/O bus and/or CANopen bus for performance everywhere

- > Remote I/O synchronized with local I/O
- > Flexible configuration: distributed I/O islands via the CANopen bus or remote I/O islands via the TM5 expansion bus
- > Homogenous: Modicon TM5 (IP 20 modular I/O system) and Modicon TM7 (IP 67 modular I/O system) ranges can be used in rack or in remote I/O
- > Transparency and quick diagnostics with SoMachine software

30%

The savings you can achieve in assembly, wiring and, commissioning

> Modicon M258 selection guide
