

Deploying Micro Data Centers at the Edge

Micro Data Center Xpress

Micro Data Center Xpress solutions from APC by Schneider Electric are Certified, Compatible, Secure, and Manageable, simplifying physical infrastructure deployment in Edge environments, making it fast, easy, and cost effective.

Life Is On

Micro Data Centers at the Edge

Why are they needed?

- Certified**
IT vendor validated infrastructure
- Fast**
IT equipment can be pre-installed and shipped to the customer site
- Compatible**
Designed for the latest converged and hyperconverged IT systems
- Secure**
Physically secure to prevent unauthorized access
- Manageable**
Remote management for maximum uptime

Benefits

Micro Data Center Xpress solutions make it easy and cost effective to add data center capacity anywhere and anytime it is needed – in both IT Room and non climate controlled environments.

These customizable designs include the physical enclosure, UPS, PDU, cooling, software, environmental monitoring, and security – all tested, assembled, and packaged at an APC by Schneider Electric facility and then shipped.

For System Integrators:

We provide a comprehensive starting point of integrated physical infrastructure for micro data centers. We simplify the manufacturing process and save costs!

For IT Solution Providers:

We work to define standard solutions that are validated by Converged/Hyperconverged industry vendors. We simplify the purchasing and delivery process!

For End Customers (Retail, Finance, Government):

End users need to deploy standardized drop-in-place micro data centers en masse; potentially for thousands of sites with global availability. We simplify the delivery and deployment processes with repeatable designs, leveraging centralized management for higher availability.

Industry Trends Drive Need for Edge

Internet use is trending towards bandwidth-intensive content and an increasing number of attached devices; what many call the **Internet of Things (IoT)**.

Edge computing brings bandwidth-intensive content and latency-sensitive applications closer to the user or data source, providing a low latency bridge to the centralized cloud.

Recent industry moves are showing a shift to a **decentralized, hybrid computing ecosystem**.

As a result, the future will see a proliferation of localized edge data centers utilizing **converged and hyperconverged** technologies.

APC has invested heavily in building relationships & alliances with key vendors in the converged/hyperconverged market, and has recently attained validations with **Cisco** and **Nutanix**.

Design in the Local Edge Configurator

Solution Providers and System Integrators looking to order these solutions, modify them, leverage validated reference architectures, or configure custom solutions, may do so in the new **Local Edge Configurator**. Must be enrolled in the APC Channel Partner Program to access. Visit apc.com/personalpage to login and access “Design Portal.” For more information about the APC Channel Partner Program, visit apc.com/partners

Why APC by Schneider Electric?

Certainty in a Connected World

The value APC by Schneider Electric delivers

As the demand for data and accessible information continues to become more critical to businesses, IT professionals are facing challenges and opportunities in their businesses and technology solutions. APC by Schneider Electric creates solutions that help IT professionals anticipate and protect their most valued assets: information and data. As the industry leader in integrated physical infrastructure and software, APC creates reliable solutions that provide **Certainty in a Connected World**.

Solutions that enable a connected world

APC's proven industry leadership and collaborative technology provides integrated solutions for the transformation of IT. These solutions enable connectivity, reliability, and accessibility through validation & certifications with the largest IT vendors and alliances.
