Changes to the New ClimaSys Cooling Units

Substitution Guide 2023

se.com/enclosures

Changes to the New ClimaSys Cooling Units

The ClimaSys Cooling Unit range is changing.

From September 2023, a new connected Cooling Unit range will be launched which will replace the existing range, with the two ranges coexisting until the end of 2023.

Whenever required, some new retrofit kits have been defined for maintenance of the installed base, and the entire existing Spare parts and Accessories offer will remain as it is.

The new offer has been optimized in terms of :

- sustainability including better EER (Energy Efficiency Ratio),
- sizes and weight (smaller and lighter),
- and connectivity (native Modbus RTU).

Natively, every new connected ClimaSys Cooling Unit can be connected to any Scada with its native Modbus RTU communication function.

Also, for critical applications, three redundant modes (Serial, Back-up, Sequential) are available by default and can be activated simply by interconnecting the Cooling Units with cables.

All the new connected ClimaSys Cooling Unit, Spare Parts and Accessories references can easily be recognized, as they end with DG. NSUCUxxxxDG for the Cooling Units, NSYCUSPxxxDG for the Spare Parts, NSYCUACCxxxDG for the Accessories.

In this document you will find all the information you will need to adapt your panel assembly and fitting processes

Substituting ClimaSys Cooling Unit References (1/2)

Replacing old references with the new ones in your database is very easy: simply use the following tables.

To simplify discovery of this new range, we have reduced the number of references from 69 to 40, combining both IEC and UL certificates.

Indoor Side Cooling Units

Steel

External dimensions			New ref.	Old references					
H (mm)	W (mm)	D (mm)	New type	IEC type 1	IEC type 2	UL type 1	UL type 2	UL type 3

Note: UL types are not available for these references

Adapting the Cut-Outs (1/3)

Where to Find the New Cut-Out Drawings

New cut-out drawings are available as explained below:

Step 1

Use this link to go to “Product Documentation & Software downloads”:

<https://www.se.com/ww/en/download/>

Step 2

Type the Cooling Unit reference in the search bar

Step 3

Filter the document type by choosing “Technical drawings”

Adapting the Cut-Outs (2/3)

Using the Retrofit Kit

To mount a new cooling in place of an old one, Retrofit kits are available for use with each reference. Check the corresponding table below:

Indoor Side Cooling Units

Material	Reference	Surface retrofit kit
Steel	NSYCU600DG	NSYCUACC032DG
Stainless-steel	NSYCUX600DG	NSYCUACC022DG

All the other new Indoor Side Cooling Units can replace an old Cooling Unit without a retrofit kit.

Indoor Roof Cooling Units

Reference	Roof retrofit kit
NSYCU600RDG	NSYCUACC033DG
NSYCU800RDG	NSYCUACC018DG
NSYCU8002P4RDG	NSYCUACC018DG
NSYCU1K2RDG	NSYCUACC019DG
NSYCU1K22P4RDG	NSYCUACC019DG
NSYCU1K5RDG	NSYCUACC019DG
NSYCU1K52P4RDG	NSYCUACC019DG
NSYCU2KRDG	NSYCUACC020DG
NSYCU2K3P4RDG	NSYCUACC020DG
NSYCU3K3P4RDG	NSYCUACC021DG
NSYCU4K3P4RDG	NSYCUACC021DG

Adapting the Cut-Outs (3/3)

Slim Cooling Units

If you want to replace your old Slim Cooling Units with a new Indoor Side Unit (which is as slim as the old), you will have to use a specific retrofit kit specific to the mounting type, and to the material (steel or stainless-steel).

Material	Reference	Flush retrofit kit	Half-flush retrofit kit	Surface retrofit kit
Steel	NSYCU1K2DG	NSYCUACC023DG	NSYCUACC024DG	NSYCUACC025DG
	NSYCU1K22P4DG	NSYCUACC023DG	NSYCUACC024DG	NSYCUACC025DG
	NSYCU1K6DG	NSYCUACC023DG	NSYCUACC024DG	NSYCUACC025DG
	NSYCU1K62P4DG	NSYCUACC023DG	NSYCUACC024DG	NSYCUACC025DG
	NSYCU2KDG	NSYCUACC023DG	NSYCUACC024DG	NSYCUACC025DG
	NSYCU2K3P4DG	NSYCUACC023DG	NSYCUACC024DG	NSYCUACC025DG
	NSYCU3K2DG	NSYCUACC026DG	NSYCUACC027DG	NSYCUACC028DG
	NSYCU3K23P4DG	NSYCUACC026DG	NSYCUACC027DG	NSYCUACC028DG
Stainless-steel	NSYCUX1K6DG	NSYCUACC029DG	NSYCUACC030DG	NSYCUACC031DG
	NSYCUX2K3P4DG	NSYCUACC029DG	NSYCUACC030DG	NSYCUACC031DG

Outdoor Cooling Units

Out of 600 W, Outdoor Cooling Units do not need a retrofit kit to allow the adaptation to a new Outdoor Cooling Unit.

In case you need to retrofit a 600 W Outdoor Cooling Unit, please contact us.

Selecting the Right Spare Parts (1/3)

Spare Part offer is limited to the fans (condenser and evaporator) and controllers.

Condenser Fan Kit

Indoor Side Cooling Units

ProClima Web and SEE Electrical Update

How to Select the Right Thermal Solution

In conjunction with the new Connected ClimaSys Cooling Unit country launches, our Thermal Solution selection and configuration tool called ProClima Web (<https://proclima.se.com/>) will propose the new Cooling Unit references.

For a better user experience, ProClima is now 100% interfaced with SEE Electrical 2D and 3D versions. Any user will be able to select an enclosure and the corresponding components in SEE Electrical, import them automatically into ProClima, and ProClima will propose the optimal Thermal Solution. At the very end, it will be possible to upload the corresponding BOM back into SEE Electrical for the final panel design and mechanical and electrical drawing definition.
