ISO/VDMA Cylinder: Large Bore Size Type Double Acting, Single Rod

Series C95

ø160, ø200, ø250, ø320

How to Order

Without auto switch

C95S **B** **160** **100**

With auto switch

C95SD **B** **160** **100** **A53** **S**

Built-in magnet

Mounting style

B	Basic/without bracket style
L	Axial foot style
F	Rod side flange style
G	Head side flange style
C	Single clevis style
D	Double clevis style
T	Center trunnion style

Bore size

160	160 mm
200	200 mm
250	250 mm
320	320 mm

Stroke (mm)

Refer to "Standard Stroke" on page 6-12-35.

Number of auto switches

Nil	2 pcs.
S	1 pc.
3	3 pcs.
n	"n" pcs.

Auto switch

Nil Without auto switch

* For the applicable auto switch model, refer to the table below.

Applicable Auto Switches/Refer to the **Web Catalog** for further information on auto switches.

Type	Special function	Electrical entry	Indicator light	Wiring (Output)	Load voltage		Auto switch model		Lead wire length [m]					Pre-wired connector	Applicable load	
					DC	AC	Tie-rod mounting	Band mounting	0.5 (Nil)	1 (M)	3 (L)	5 (Z)				
Solid state auto switch	—	Grommet	Yes	3-wire (NPN)	24 V	5 V, 12 V	—	M9N	●	●	●	○	○	IC circuit	Relay, PLC

*1 Water-resistant type auto switches can be mounted on the above models, but SMC cannot guarantee water resistance. Please contact SMC regarding water-resistant types with the above model numbers.

* Lead wire length symbols: 0.5 m..... Nil (Example) M9NW 3 m..... L (Example) M9NWL
1 m..... M (Example) M9NWM 5 m..... Z (Example) M9NWZ

* Solid state auto switches marked with a "O" are produced upon receipt of order.

* Since there are applicable auto switches other than those listed above, refer to page 6-12-41-2 for details.

* Auto switches other than the D-G39/K39/A3□/A44 are shipped with the cylinder, but are not mounted to the cylinder. (Only the auto switch mounting brackets are assembled before shipment.)

* D-G39/K39/A3□/A44 auto switches (band mounting type) can only be mounted on ø160 and ø200.

ISO/VDMA Cylinder: Large Bore Size Type Double Acting, Single Rod Series C95

Specifications

Bore size (mm)	160	200	250	320
Action	Double acting			
Fluid	Air			
Proof pressure	1.5 MPa			
Max. operating pressure	1.0 MPa			
Min. operating pressure	0.05 MPa			
Ambient and fluid temperature	Without auto switch: -10 to 70°C (No freezing) With auto switch: -10 to 60°C (No freezing)			
Lubrication	Not required (Non-lube)			
Operating piston speed	50 to 500 mm/sec			
Allowable stroke tolerance	Up to 250: $^{+1.0}_0$, 251 to 1000: $^{+1.4}_0$, 1001 to 1500: $^{+1.8}_0$			
Cushion	Both ends (Air cushion)			
Thread tolerance	JIS Class 2			
Port size	G 3/4		G 1	
Mounting	Basic style, Axial foot style, Rod side flange style, Head side flange style, Single clevis style, Double clevis style, Center trunnion style			

Symbol
Double acting

Minimum Stroke for Auto Switch Mounting

Refer to page 6-12-41-1 for "Minimum Stroke for Auto Switch Mounting".

Standard Stroke

Bore size (mm)	Max.* stroke
160	1600
200	2000
250	2400
320	2400

Intermediate strokes are available.

* Please consult with SMC for longer strokes.

Mounting Bracket Part No.

Bore size (mm)	160	200	250	320
Foot (1)	L5160	L5200	L5250	L5320
Flange	F5160	F5200	F5250	F5320
Single clevis	C5160	C5200	C5250	C5320
Double clevis	D5160	D5200	D5250	D5320

Note 1) Two foot brackets and mounting bolts (4 pieces) are included in this no.

Note 2) Accessories for mounting brackets are as follows

Foot, Flange, Single clevis: Mounting bolts

Double clevis : Clevis pin, Retaining rings, Mounting bolts

Theoretical Output

Bore size (mm)	Rod diameter (mm)	Operating direction	Piston area (mm ²)	Operating pressure (MPa)								
				0.2	0.3	0.4	0.5	0.6	0.7	0.8	0.9	1.0
160	40	OUT	20106	4021	6032	8042	10053	12064	14074	16085	18095	20106

		IN	77597	15519	23279	31039	38799	46558	54318	62078	69838	77597

Note) Theoretical force (N) = Pressure (MPa) x Piston area (mm²)

Weight/Aluminum Tube

Bore size (mm)		160	200	250	320
Basic weight	Basic style	14.54	20.20	37.17	56.20
	Foot style	4.90	7.76	15.00	89.20
	Flange style	2.45	11.75	20.29	90.75
	Single clevis style	6.90	9.10	18.60	87.95
	Double clevis style	6.30	9.25	18.46	88.95
	Trunnion style	4.50	7.23	14.40	78.70
Additional weight per each 50 mm of stroke	All mounting brackets	0.83	0.9	1.6	2.94
Accessory	Single rod clevis	1.62	1.62	2.76	5.00
	Double clevis (With pin)	3.92	3.92	6.69	9.90

Calculation: (Example) C95SD160-100

- Basic weight 14.54 (kg) (Basic, ø160)
- Mounting 6.30 (kg) (Double clevis)
- Additional weight ... 0.83 (kg/50 st)
- Cylinder stroke 100 (st)

$$14.54 + 0.83 \times 100 \div 50 + 6.30 = 22.50 \text{ kg}$$

Allowable Kinetic Energy

Example:

Load limit at rod end when air cylinder ø200 is actuated with max. actuating speed 500 mm/s. See the intersection of lateral axis 500 mm/s and ø200 line, and extend the intersection to left. Thus the allowable load is 800 kg.

Series C95

Relationship between Cylinder Size and Maximum Stroke

The below table shows the applicable maximum stroke (in cm units), found by calculation assuming the case where the force generated by the cylinder itself acts as buckling force on the piston rod, or piston rod and cylinder tube.

Therefore, it is possible to find the applicable maximum stroke for each cylinder size using the relationship between the size of the operating pressure and the cylinder support type, regardless of the load ratio.

[Reference] If it is stopped with the external stopper on the cylinder extension side, even with a light load, the maximum generated force of the cylinder will act on the cylinder itself.

Mounting			Operating pressure [MPa]	Maximum stroke that can be used according buckling strength [cm]					
Mounting bracket diagram		Nominal symbol		ø160	ø200	ø250	ø320

[Stainless Steel Mounting Screw]

*1 When using the D-M9□A/M9□AV or Y7BAL, do not use the steel set screws which are included with the auto switch mounting brackets above (BA4-080, BA7-080, BS5-□□□, BS4-□□□).

Order a stainless steel screw kit (BBA1) separately, and use the M4 x 8 L stainless steel set screws included in the BBA1.

When ordered cylinder with D-M9□A/M9□AV or Y7BAL, the screws of the switch mounting bracket have been changed to stainless steel.

*2 When using the D-F5BAL, do not use the steel set screws which are included with the auto switch mounting brackets above (BT-□□).

Order a stainless steel screw kit (BBA1) separately, and use the M4 x 8 L stainless steel set screws included in the BBA1.

When D-F5BAL is shipped independently, the BBA1 is attached.

When ordered cylinder with D-F5BAL, the screws of the switch mounting bracket have been changed to stainless steel.

Data

Other than the applicable auto switches listed in "How to Order," the following auto switches are also mountable. Refer to the **Web Catalog** for the detailed specifications.

Type	Model	Electrical entry	Features
Reed	D-A90V	Grommet (Perpendicular)	Without indicator light
	D-A93V, A96V		
	D-Z73, Z76		
	D-A53, A56	Grommet (In-line)	Without indicator light
	D-A67		
	D-Z80		
Solid state	D-F59, F5P, J59	Grommet (In-line)	—
	D-Y59A, Y59B, Y7P		
	D-F59W, F5PW, J59W		
	D-Y7NW, Y7PW, Y7BW		
	D-F5BA, Y7BA		
	D-F5NT		
	D-M9NV, M9PV, M9BV	Grommet (Perpendicular)	—
	D-Y69A, Y69B, Y7PV		
	D-M9NWV, M9PWV, M9BWV		
	D-Y7NWV, Y7PWV, Y7BWV		
	D-M9NAV, M9PAV, M9BAV		
			2-color indicator
			Water-resistant (2-color indicator)
			With timer
			2-color indicator
			Water-resistant (2-color indicator)

* With pre-wired connector is also available for solid state switches. For details, refer to the **Web Catalog**.

* Normally closed (NC = b contact) solid state auto switches (D-M9□E (V), D-Y7G/Y7H) are also available. For details, refer to the **Web Catalog**.

Prior to Use

Auto Switch Connections and Examples

Sink Input Specifications

3-wire, NPN

2-wire

Source Input Specifications

3-wire, PNP

2-wire

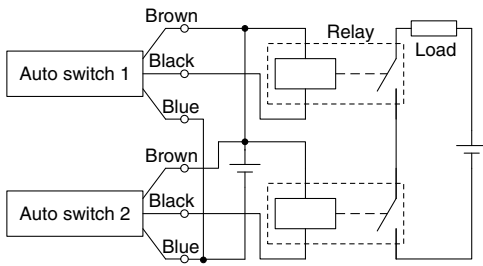

Connect according to the applicable PLC input specifications, as the connection method will vary depending on the PLC input specifications.

Examples of AND (Series) and OR (Parallel) Connections

* When using solid state auto switches, ensure the application is set up so the signals for the first 50 ms are invalid. Depending on the operating environment, the product may not operate properly.

3-wire AND connection for NPN output (Using relays)

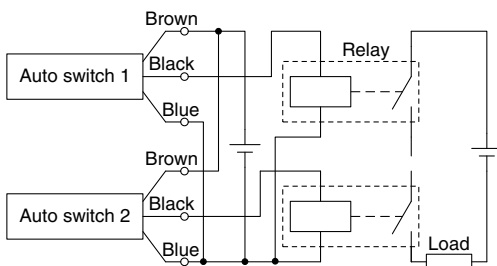

(Performed with auto switches only)

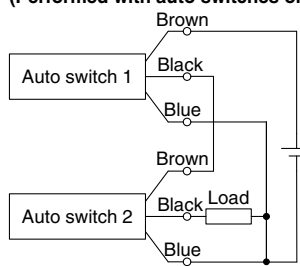

3-wire OR connection for NPN output

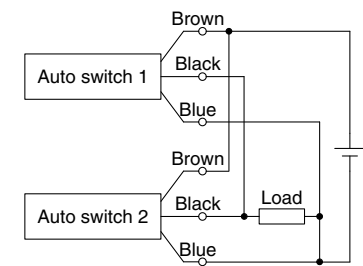

3-wire AND connection for PNP output (Using relays)

(Performed with auto switches only)

3-wire OR connection for PNP output

2-wire AND connection

When two auto switches are connected in series, a load may malfunction because the load voltage will decline when in the ON state. The indicator lights will light up when both of the auto switches are in the ON state. Auto switches with a load voltage less than 20 V cannot be used. Please contact SMC if using AND connection for a heat-resistant solid state auto switch or a trimmer switch.

Example) Load voltage at ON
 Power supply voltage: 24 VDC
 Internal voltage drop: 4 V
 Load voltage at ON = Power supply voltage –
 Internal voltage drop x 2 pcs.
 = 24 V – 4 V x 2 pcs.
 = 16 V

2-wire OR connection

(Solid state)
 When two auto switches are connected in parallel, malfunction may occur because the load voltage will increase when in the OFF state.

(Reed)
 Because there is no current leakage, the load voltage will not increase when turned OFF. However, depending on the number of auto switches in the ON state, the indicator lights may sometimes grow dim or not light up, due to the dispersion and reduction of the current flowing to the auto switches.

Example) Load voltage at OFF
 Leakage current: 1 mA
 Load impedance: 3 kΩ
 Load voltage at OFF = Leakage current x 2 pcs. x
 Load impedance
 = 1 mA x 2 pcs. x 3 kΩ
 = 6 V

Series C95

Specific Product Precautions

Be sure to read before handling.

Adjustment

Warning

1. Do not open the cushion valve above the stopper.

Cushion valves are provided with a retaining ring (ø160 to ø250) as a stopping mechanism, and the cushion valve should not be opened above that point.

If air is supplied and operation started without confirming the above condition, the cushion valve may be ejected from the cover.

Bore size (mm)	Cushion valve	Width across flats	Socket wrench
160, 200 250, 320	MB-A2-10-EA064	4	JIS 4648 Hex spanner wrench 4

2. Be certain to activate the air cushion at the stroke end.

When it is intended to use the cushion valve in the fully opened position, select a style with a bumper. If this is not done, the tie-rods or piston rod assembly will be damaged.

3. When replacing brackets, use the hexagon wrench shown below.

Bore size (mm)		Bolt	Width across flats	Tightening torque (N·m)
160, 200		M16 x 2 x 30ℓ	14	99
250, 320	Foot	M20 x 2.5 x 35ℓ	17	193.5
	Others	M20 x 2.5 x 30ℓ	17
