

5-Port Solenoid Valve

SY3000/5000/7000 Series

Plug-in Type

The connection cable and various units for PLC connection in PC wiring systems have been discontinued by the manufacturer. Therefore, while they can no longer be provided, the valve manifold (manifold with built-in valves) can still be ordered. For details, refer to the [Web Catalog](#).

Due to the flow increase, the valve size can be reduced! Saves **energy** and **space**

SY3000

10 mm

ø2, ø3.2, ø4, ø6, and ø8*1 fittings are connectable.

*1 Type M10/M11 manifold

SY5000

15 mm

ø4, ø6, and ø8 fittings are connectable.

SY7000

18 mm

ø6, ø8, ø10, and ø12 fittings are connectable.

At 300 mm/s

Existing ø32

Valve size DOWN

ø50

Can drive cylinders of up to **ø50***2 (ø80 at 100 mm/s)

At 300 mm/s

Existing ø50

Valve size DOWN

ø63

Can drive cylinders of up to **ø63***2 (ø125 at 100 mm/s)

At 300 mm/s

Existing ø63

Valve size DOWN

ø80

Can drive cylinders of up to **ø80***2 (ø160 at 100 mm/s)

*2 Values based on comparison with the existing SMC model. For details, refer to page 402.

Compatible with wireless systems

With pressure sensor

5-Port Solenoid Valve

Plug-in Connector Connecting Base [IP67*1]

*1 Refer to page 426 for details on IP67.

Manifold

Side ported [From p. 430]

Bottom ported [From p. 430]

Top ported [From p. 442]

Plug-in Compatible sub-plate type

From p. 693

Connector type manifold

- IP67 enclosure for standard specifications
- The M12 waterproof connector type ensures easy attaching/detaching and wiring.
- Applicable to the side, top, and bottom-porting types (4A and 2B ports)

Plug-in Metal Base [IP40]

Side ported [From p. 636]

Bottom ported [From p. 636]

Top ported [From p. 656]

Wiring

Power Saving

Power Consumption

[Electrical power waveform with power saving circuit]

With power saving circuit

0.1 w

Standard

0.35 w

Power consumption is reduced by the power saving circuit.

Power consumption is decreased to approx. 1/3 by reducing the wattage required to hold the valve in an energized state. (Effective energizing time is over 67 ms at 24 VDC.) Refer to the electrical power waveform to the left.

- Only products with an indicator light are equipped with the power saving circuit.
- The value in () is for the quick response and high pressure types.

Long Service Life

Metal seal

(Service life: **200 million cycles**)*1

- *1 According to SMC life test conditions
- *2 Please contact SMC if life test data is required.

Space Saving / Improved Operability

Wiring, piping, and operation are integrated on one side. A multiple-layer type is available as an option that saves space in the lateral direction.

A bottom-ported type is available (A and B ports). Space saving

By using the bottom-ported type, it is possible to reduce the amount of space required for installation.

A 4-position dual 3-port valve is available. (Only for the rubber seal type)

- Two 3-port valves built into one body

- 3-port valves on the A and B sides can be operated independently.
- When used as a 3-port valve, only half the number of stations is required.
- Can also be used as a 4-position, 5-port valve
- A 4-position dual 3-port valve with a back pressure check valve is also available.
- Combination examples

Series	A side	B side
SY□A ₃ 0	N.C. valve	N.C. valve
SY□B ₃ 0	N.O. valve	N.O. valve
SY□C ₃ 0	N.C. valve	N.O. valve

Different sizes (SY3000/5000 or SY5000/7000) can be mixed! From p. 574

It is possible to reduce installation space, the number of serial units, and the amount of wiring.

Overall manifold length **Approx. 29% reduction**

For serial transmission EX260

SY5000 manifold
SY5000: 3 stations

SY3000 manifold
SY3000: 4 stations

Mixed manifold
SY5000: 3 stations, SY3000: 4 stations

1 set

5-Port Solenoid Valve

Improved Safety

Back Pressure Check Valve

This prevents actuator and air operated valve malfunctions caused by the exhaust from other valves.*1

Built-in valve type

*1 For back pressure check valve precautions, refer to the "Specific Product Precautions" on page 704.

Retrofit or pre-installed type

If the product is affected by back pressure after installation, a back pressure check valve assembly can be added.

p. 625

With residual pressure release valve (SY5000/7000) p. 413

For residual pressure release of the 3-position closed center valve

- The pressure of the 4 (A) and 2 (B) ports is exhausted automatically when the pressure of the 1 (P) port is exhausted.
- The pressure can be visualized using the indicator (red).
- Since this valve is not a spacer type, the flow rate is equivalent to that of the normal closed center valve.

[When the 1(P) port is pressurized]

IP67 compliant

[When the 1(P) port is not pressurized]

Lever Type SUP Stop Valve Spacer (With residual pressure release valve) p. 618

A lever has been added to manual override button!

Solenoid valves can be replaced individually without shutting off the main pressure!*1

2-action operation

Air for solenoid valves can be shut off individually!

The operation of an actuator can be checked by individually shutting off the air for the solenoid valves on the base while the main air is being supplied during a trial operation.

Solenoid valves can be replaced individually!

The solenoid valves can be replaced individually without stopping the equipment during maintenance.

<Application example>

For air operated valves, such as sanitary valves, and automatic valve control

*1 This product is only for internal pilot specifications as the external pilot air cannot be shut off.

Improved Safety

Slotted Type

SUP Stop Valve Spacer

(With residual pressure release valve) **p. 618**

Air supply to each valve can be stopped individually. The valve and cylinder can be replaced without stopping other devices and equipment.

Button for manual release of residual pressure

To exhaust residual pressure on the cylinder side

2-position single valve example

Slotted Type

Double Check Spacer

(With residual pressure release valve) **p. 619**

Long intermediate stops and position holding are possible.

Button for manual release of residual pressure

To exhaust residual pressure on the cylinder side

Exhaust center

2-position single/double

With slide locking manual override

ON/OFF operation and locking can be performed manually.

The ON/OFF state can be checked at a glance.

5-Port Solenoid Valve

Improved Safety

Made to Order

With safety slide locking manual override
 SY3000/5000/7000-X13 **p. 423**

The double action manual override prevents accidental operation!

SY7000-X13

SY5000-X13

SY3000-X13

●Double-action operation

Before operation The slide locking manual overrides cannot be turned ON with the safety slide cover in place. (OFF status: Locked)

Operation 1 The safety slide cover is operated and moves upward. (Unlocked)

Operation 2 The slide locking manual overrides can be operated.

Safety slide cover Slide locking manual overrides

<Vertical sliding>

* The safety slide cover cannot be locked when the slide locking manual override is turned ON.

<Horizontal sliding>

●Visual check

Red lines visible from three directions can be checked to confirm whether the safety slide cover is unlocked (FREE).

Safety slide covers can be checked from their raised and lowered positions.

Made to Order

2-Position Single Solenoid Valve with Built-in Return Spring (Only rubber seal type)
 SY3000/5000/7000-X350 **p. 423**

The main valve returns to the OFF position when it is not pressurized.

The main valve has a built-in spring which allows it to return to origin (the OFF position) when the supply pressure is stopped. This product can be used in SRP/CS (safety-related parts of control systems) constructions in accordance with safety standards (ISO 13849).

To mount the piping on top

To mount the piping on the side

Mixed top-porting and side-porting is possible.

5-Port Solenoid Valve

For SY3000 Blanking Plate with Output p. 624

■ The blanking plate extracts the individual signal of the manifold valve.

Application Examples

■ For the control of separately mounted valves

■ For the control of vacuum ejectors by means of Fieldbus unit signals

Valve with Pressure Sensor p. 421

■ Monitoring the output pressure of the solenoid valve contributes to preventive maintenance.

- The output pressure of the 4(A) and 2(B) ports can be detected.
- Detects errors such as incorrect switching, response delay, back pressure interference, pressure drop, etc.
- Identifies faulty parts of actuators, solenoid valves, etc.

■ Space saving, Reduced installation labor

- The required amount of space and installation labor can be reduced by directly mounting pressure switches on the solenoid valves.

Pressure sensor

- Rated pressure range: 0 to 1 MPa
- Power supply voltage: 12 to 24 VDC $\pm 10\%$
- Output specifications: Analog output 1 to 5 V (In rated pressure range) Output impedance: Approx. 1 k Ω

Mountable manifolds

Metal base Side ported/Type 50
 Bottom ported/Type 51

Connector connecting base Side ported/Type 10
 Bottom ported/Type 11

Application Examples

■ For the detection of output pressure

Operation can be checked by monitoring the pressure required to open or close air operated valves.

■ For the identification of faulty parts

A faulty part can quickly be identified by monitoring the operation of solenoid valves.

Only for External Pilot Vacuum Release Valve with Restrictor SY $\frac{3}{5}$ A□R Series p. 415

Vacuum suction and release can be controlled with a single valve!

- Can be mounted on the same manifold as standard valves
 - * When an individual EXH spacer is used

■ Example

Mountable manifolds

* External pilot specification

5-Port Solenoid Valve

Applicable to EX600-W Series Wireless Systems [p. 502](#) [p. 512](#) [p. 574](#) [p. 578](#) [p. 586](#)

■ Noise resistance

- Uses the 2.4 GHz ISM frequency band
- Frequency hopping: Every 5 ms

■ Communication cables not required

- Reduced wiring work, space, and cost
- Minimized disconnection risk

■ High-speed connection

- From the remote power supply ON to start of communication:
Min. 250 ms

■ Number of I/O points

- Max. 1280 inputs/1280 outputs
(Max. 128 inputs/128 outputs per module)

■ Communication response

- Wireless communication signal
Response time: **5 ms**

■ Compatible protocol

EtherNet/IP[®]

Application Examples

For tool changing

For spot welding

Welding environment

For rotary tables

The EX260 series supports safety communication (PROFIsafe). [p. 534](#)

■ This is a Fieldbus unit which supports safety standard ISO 13849-compliant safety circuit constructions.

PROFIsafe is established as an international standard (IEC 61784-3-3). It is a communication protocol that transmits safety-related data by PROFINET communication and can be used up until safety standards ISO 13849-1 PL e and IEC 61508/IEC 62061 SIL 3.

■ Using the safety communication protocol

Refer to the EX260 **Web Catalog** for details on units that support the safety communication protocol.

When using a manifold valve within an ISO 13849-compliant safety system, the device needs to be considered from both the pneumatic circuit and the electric side.

Devices (including valves) need to be selected based on whether their functions are in line with the safety level of the equipment as a whole.

The use of valves that have been validated as being compliant with ISO 13849-2 may be required.

For details on valves that have been validated, please contact SMC.

In addition, refer to "Safety Instructions" for precautions on model selection.

		2-position single/double	5	10 ^{*1}
		4-position dual 3-port valve	3	—
		3-position	3	10 ^{*1}
Manual override		Non-locking push type Push-turn locking slotted type Push-turn locking lever type Slide locking type		
Pilot exhaust type	Internal pilot	Main/Pilot valve common exhaust	Main/Pilot valve individual exhaust	
	External pilot	Pilot valve individual exhaust		
Lubrication		Not required		
Mounting orientation^{*2}		Unrestricted	Single: Unrestricted Double/3-position: Main valve is horizontal.	
Impact/Vibration resistance^{*2} [m/s²]		150/30		
Enclosure		IP67 (Based on IEC60529) ^{*3}		
Coil rated voltage [DC]		24, 12 V		
Allowable voltage fluctuation [V]		±10% of rated voltage ^{*4}		
Power consumption [W]	Standard		0.35 (With indicator light: 0.4)	
	High pressure type, Quick response type		0.9 (With indicator light: 0.95)	
	With power saving circuit		Standard: 0.1 ^{*5} (With indicator light only) [Inrush 0.4, Holding 0.1], High pressure type: 0.4 ^{*5} (With indicator light only) [Inrush 0.95, Holding 0.4]	
Surge voltage suppressor		Diode (Varistor for non-polar type)		
Indicator light		LED		

*1 Use below 5 Hz with the power saving circuit.

*2 Impact resistance: No malfunction occurred when it is tested in the axial direction and at the right angles to the main valve and armature in both energized and de-energized states every once for each condition. (Values at the initial period)

Vibration resistance: No malfunction occurred in a one-sweep test between 45 and 2000 Hz. The test was performed at both energized and de-energized states in the axial direction and at the right angles to the main valve and armature. (Values at the initial period)

Refer to page 708 for the fixation of DIN rail mounting type manifold.

*3 In the case of a metal seal, there are restrictions in the operating environment. Refer to the "Specific Product Precautions" on page 703.

*4 Due to voltage drops by the internal circuit in S/Z type and T type (with power saving circuit), use within the allowable voltage fluctuation as follows.

S/Z type { 24 VDC: -7% to +10%
12 VDC: -4% to +10% } T type { 24 VDC: -8% to +10%
12 VDC: -6% to +10% }

*5 For details, refer to page 705.

* The part number is not indicated on the product.

How to Order Pilot Valve Assembly (With a gasket and two mounting screws)

V112 - A

Pilot valve option

Nil	Standard (0.7 MPa)
B	Quick response type (0.7 MPa)
K	High pressure type (1.0 MPa) ^{*1}

*1 Only the metal seal type is available for the high pressure type. (1.0 MPa)

Coil type

Nil	Standard
T	With power saving circuit

Rated voltage

5	24 VDC
6	12 VDC

Caution

1. The coil specification and voltage (including light/surge voltage suppressor) cannot be changed by changing the pilot valve assembly.
2. When selecting the coil type with power saving circuit, it is not possible to change to high pressure/power saving circuit type.

How to replace pilot valves

Pilot cover assembly

Series	Part no.
SY3000	SY30V-25A
SY5000	SY50V-25A
SY7000	SY50V-25A

* Pilot cover x 1 + B tight flat head screw x 1

- Loosen B tight flat head screw to remove the pilot cover in the direction indicated by the arrow ①.

- Remove the pilot valve mounting screws.
- Remove the pilot valve in the direction indicated by the arrow ②.

* Assemble by following the removal procedure in reverse.

- * Ensure the gasket is mounted, and take care not to bend the socket.
- * Be noted for mounting that there are two types of lengths for the pilot valve mounting screws.

SY5000/7000 Series

With Residual Pressure Release Valve

Mountable manifold
 SS5Y5/7-50/51 type manifold
 SS5Y5/7-(M)10/11 type manifold
 Sub-plate single unit (Except top-ported type)

How to Order (With mounting screw)

SY **5** **3** **0** **0** **0** **0** - **5** **0** **0** **1** - **E**

Series

5	SY5000
7	SY7000

Base mounted

(The top-ported type is not available.)

Type of actuation

3	3-position closed center ^{*1}
---	--

*1 Only the closed center type is available.

With residual pressure release valve

E	With residual pressure release valve ^{*1}
---	--

*1 Mounting screw types, hexagon socket head cap screw B and drop prevention type K, H are not available.

1 Seal type

0	Rubber seal
1	Metal seal

2 Pilot valve option

NII	Standard (0.7 MPa)
B	Quick response type (0.7 MPa)
K ^{*1}	High pressure type (1.0 MPa)

*1 Only the metal seal type is available for the high pressure type.

3 Coil type

NII	Standard
T	With power saving circuit (Continuous duty type)

- * Be sure to select the power saving circuit type if the valve is to be continuously energized for long periods of time.
- * Be careful of the energizing time when the power saving circuit is selected. Refer to page 705 for details.

4 Rated voltage

5	24 VDC
6	12 VDC

* The applicable rated voltage varies depending on the manifold wiring type. Refer to the "How to Order Manifolds" pages.

5 Light/surge voltage suppressor and common specification

Symbol	With light	Surge voltage suppressor	Common specification
NII	—	—	Non-polar
R	—	—	
U	●	—	
S	—	●	
Z	●	—	Positive common
NS	—	—	Negative common
NZ	●	—	Negative common

- * For the non-polar type, be careful of surge voltage intrusion. Refer to page 706 for details. (Excludes when an SI unit manifold is used)
- * Only "Z" and "NZ" types are available with a power saving circuit.

6 Manual override

- * Refer to page 423 for the safety slide locking manual override.
- * **When ordering a valve individually, the base gasket is not included.** Since the base gasket is attached to the manifold, please order the base gasket separately if it is needed for maintenance. Refer to page 611 or 679 for base gasket part numbers. Refer to Table 1 for mounting screw part numbers.

Table 1. Valve mounting screw

SY5000	SY7000
SY5000-221-2A (2 pcs.)	SY7000-221-10A (3 pcs.)

Valve Specifications

Valve construction	Rubber seal	Metal seal
	3-position closed center valve with residual pressure release valve ^{*1}	
Fluid	Air	
Operating pressure range [MPa] ^{*2}	0.3 to 0.7 (High pressure: 0.3 to 1)	
Weight [g]	SY5000	128
	SY7000	177

- *1 Rubber seal is used for the residual pressure release valve.
- *2 Internal pilot type only
- * Other specifications are common to the valve specifications on page 404.
- * When using in combination with an individual SUP/EXH spacer or an interface regulator, the length of the required mounting screws will differ. Please contact SMC for details.

Symbol

<When the 1(P) port is exhausted>

<When the 1(P) port is pressurized>

A mechanism is used that exhausts the pressure of the cylinder port when the P port supply pressure of the 3-position closed center valve is exhausted.

1 Series

3	SY3000
5	SY5000

2 Pilot type

R	External pilot
---	----------------

* Pay attention to the pilot pressure. Refer to the valve specifications on page 416 for further details.

4 Rated voltage

5	24 VDC
6	12 VDC

6 Manual override

* Refer to page 423 for the safety slide locking manual override.

3 Coil type

Nil	Standard
T	With power saving circuit (Continuous duty type)

* Be sure to select the power saving circuit type if the valve is to be continuously energized for long periods of time.
* Be careful of the energizing time when the power saving circuit is selected.
Refer to page 705 for details.

5 Light/surge voltage suppressor and common specification

Symbol	With light	Surge voltage suppressor	Common specification
Nil	—	—	Non-polar
R	—	—	
U	●	—	
S	—	●	
Z	●	—	Positive common
NS	—	—	Negative common
NZ	●	—	Negative common

* For the non-polar type, be careful of surge voltage intrusion. Refer to page 706 for details. (Excludes when an SI unit manifold is used)

* Only "Z" and "NZ" types are available with a power saving circuit.

How to Order Manifold Assembly

Example (SS5Y3-10F1-□□R)

3-position 3-port valve with restrictor (24 VDC)
SY3A0R-5U1

Manifold base (5 stations)
SS5Y3-10F1-05DR-C6

SS5Y3-10F1-05DR-C6--1 set (Type 10 5-station manifold base part no.)
*SY3A0R-5U1 (3-position 3-port with restrictor part no.)--5 sets

The asterisk denotes the symbol for the assembly.
Prefix it to the part numbers of the valve, etc.

* For the valve arrangement, the valve closest to the D side is considered the 1st station.
* Under the manifold part number, state the valves to be mounted in order starting with the 1st station as shown in the figure above. If the arrangement becomes too complicated, specify the details on a manifold specification sheet.

7 B port size

One-touch fitting (Metric size)

Symbol	B port	SY3000	SY5000
C4	ø4 One-touch fitting	●	●
C6	ø6 One-touch fitting	●	●
C8	ø8 One-touch fitting	—	●

One-touch fitting (Inch size)

Symbol	B port	SY3000	SY5000
N3	ø5/32" One-touch fitting	●	●
N7	ø1/4" One-touch fitting	●	●
N9	ø5/16" One-touch fitting	—	●

* When selecting the port size for each station, specify on a manifold specification sheet separately.

* When mounting on the manifold base or sub-plate, the A port is plugged. When a manifold base or sub-plate is ordered separately, mount a plug on the A port.

8 Type of mounting screw

Nil	Round head combination screw
B	Hexagon socket head cap screw

* When ordering a valve individually, the base gasket is not included.

Since the base gasket is attached to the manifold, please order the base gasket separately if it is needed for maintenance. Refer to page 611 or 679 for base gasket and mounting screw part numbers.

* "B" and "H" cannot be selected for the individual SUP/EXH spacer assembly or interface regulator.

SY3000/5000 Series

Symbol

Valve Specifications

Valve construction		3-position 3-port valve with restrictor
Seal		Rubber seal
Fluid		Air
Type of actuation		Normally closed
Operating pressure range [MPa]	Release pressure port 1(P)	0 to 0.6
	Vacuum pressure port 3(EB), 3/5(E)	-100 kPa to 0.7 ^{*1}
	Pilot X port	Release pressure + 0.1 or more (Min. 0.25) to 0.7
Restrictor operation		Manual

- *1 Can be used with positive pressure to suit the application
- * Other specifications are common to the valve specifications on page 404.
- * Quick response type is not available.

Circuit Example

<Example 1: When the 2-position double solenoid valve is combined with the individual EXH spacer>

<Example 2: When the 2-position double solenoid valve is combined with the individual EXH block and blocking disk>

* For standard valve to be combined, both the internal pilot and external pilot can be selected. If the pressure drop may occur when the 1(P) port releases the vacuum, use the external pilot type.

SY5000/7000 Series Valve with Pressure Sensor

Mountable manifold
Metal base: SS5Y5/7-50/51 type manifold
Connector connecting base: SS5Y5/7-10/11 type manifold

How to Order Valves (With mounting screw)

① Series

5	SY5000
7	SY7000

② Type of actuation

1	2-position	Single
2		Double
3	3-position	Closed center
4		Exhaust center
5		Pressure center
A*1	4-position dual 3-port	N.C./N.C.
B*1		N.C./N.O.
C*1		N.C./N.O.

*1 Only the rubber seal type is available for the 4-position dual 3-port valve.

③ Seal type

0	Rubber seal
1	Metal seal

④ Pilot type

NII	Internal pilot
R	External pilot

* When selecting the external pilot specification for the 4-position dual 3-port valve, pay attention to the pilot pressure. Refer to the valve specifications on page 404 for further details.

⑤ Back pressure check valve (Built-in valve type)

NII	None
H	Built-in

- * Only the rubber seal type is available. A manifold installed type is available if a back pressure check valve with a metal seal is required. Refer to page 625 for ordering examples. However, it is not recommended to use the built-in valve type and the manifold installed type at the same time because it will reduce the flow.
- * The built-in valve type back pressure check valve is not available for the 3-position type or the SY7000.

⑥ Pilot valve option

NII	Standard (0.7 MPa)
B	Quick response type (0.7 MPa)
K*1	High pressure type (1.0 MPa)

*1 Only the metal seal type is available for the high pressure type.

⑦ Coil type

NII	Standard
T	With power saving circuit (Continuous duty type)

- * Be sure to select the power saving circuit type if the valve is to be continuously energized for long periods of time.
- * Be careful of the energizing time when the power saving circuit is selected. Refer to page 705 for details.

⑧ Rated voltage

5	24 VDC
6	12 VDC

* The applicable rated voltage varies depending on the manifold wiring type.

⑨ Light/surge voltage suppressor and common specification

Symbol	With light	Surge voltage suppressor	Common specification
NII	—	—	Non-polar
R	—	—	
U	●	—	
S	—	●	Positive common
Z	●	—	
NS	—	—	Negative common
NZ	●	—	

- * For the non-polar type, be careful of surge voltage intrusion. Refer to page 706 for details. (Excludes when an SI unit manifold is used)
- * Only "Z" and "NZ" are available with a power saving circuit.
- * Select "R," "U," "S," or "Z" for the valve when the SI unit output polarity is positive common. Select "R," "U," "NS," or "NZ" for the valve when the SI unit output polarity is negative common.

⑩ Manual override

⑪ A, B port size

Symbol	A, B port	SY5000	SY7000
C6	ø6	●	●

⑫ Type of mounting screw

NII	Round head combination screw
B	Hexagon socket head cap screw
K	Round head combination screw (Drop prevention type)
H	Hexagon socket head cap screw (Drop prevention type)

- * For "K" and "H," the valve body cover has a drop prevention construction to stop the mounting screws from falling out when the valve is removed for maintenance, etc.
- * **When ordering a valve individually, the base gasket is not included.** Since the base gasket is attached to the manifold, please order the base gasket separately if it is needed for maintenance. Refer to page 611 for base gasket and mounting screw part numbers
- * "B" and "H" cannot be selected for the individual SUP/EXH spacer assembly or interface regulator.

⑬ Pressure sensor

Symbol	Included quantity
P1	1 pc.
P2	2 pcs.

- * The top-ported type valve and the C6 (ø6) One-touch fitting are used.
- * The PSE540-R06 pressure sensor is included in the product package.
- * When "P1" is selected, one plug (KQ2P-06) is included in the product package.

How to Order Manifold Assembly

Example (SS5Y5-10F1-□)

SS5Y5-10F1-05D-C8

...1 set (Type 10 5-station manifold base part no.)

• SY5130-5U1-C6-P1

...2 sets (2-position single part no.)

• SY5130-5U1-C6-P2

...1 set (2-position double part no.)

• SY5230-5U1-C6-P2

...1 set (2-position double part no.)

• SY5330-5U1-C6-P2

...1 set (3-position closed center part no.)

→ The asterisk denotes the symbol for the assembly. Prefix it to the part numbers of the valve, etc.

2-position double (24 VDC)
SY5230-5U1-C6-P2 (1 set)
2-position single (24 VDC)
SY5130-5U1-C6-P2 (1 set)
2-position single (24 VDC)
SY5130-5U1-C6-P1 (2 sets)

3-position closed center (24 VDC)
SY5330-5U1-C6-P2 (1 set)

The illustration shows a mounting example. The pressure sensor and plug are included in the product package.

Manifold base (5 stations)
SS5Y5-10F1-05D-C8

- For the valve arrangement, the valve closest to the D side is considered the 1st station.
- Under the manifold part number, state the valves to be mounted in order starting with the 1st station as shown in the figure above. If the arrangement becomes too complicated, specify the details on a manifold specification sheet.

SY5000/7000 Series

Pressure Sensor Specifications

Model		PSE540
Rated pressure range		0 to 1 MPa*1
Power supply voltage		12 to 24 VDC $\pm 10\%$, Ripple (p-p) 10% or less (with reverse connection protection)
Current consumption		15 mA or less
Output specifications		Analog output 1 to 5 V (within rated pressure range), 0.6 to 1 V (within extension analog output range), Output impedance: Approx. 1 k Ω
Linearity		$\pm 0.7\%$ F.S. or less
Environment	Enclosure*2	IP40
Temperature characteristics		$\pm 2\%$ F.S. (25°C reference)
Sensor cable		Oilproof heavy-duty vinyl cable (ellipse), 3 cores, 2.7 x 3.2, 3 m, Conductor area: 0.15 mm ² , Insulator O.D.: 0.9 mm

*1 Set the pressure within the operating pressure range of the valve.

*2 Please note that even if the manifold is IP67, the product will remain IP40.

Made to Order

Please contact SMC for detailed dimensions, specifications, and lead times.

1 Main Valve Fluororubber Specification

Symbol
-X90

Fluororubber is used for rubber parts of the main valve to allow use in applications such as the following.

- When using a lubricant other than the recommended turbine oil, and there is a possibility of malfunction due to swelling of the spool valve seals.

Applicable valves series SY3□□₃0, SY5□□₃0, SY7□□₃0 (Only rubber seal type)

SY³₅□□₇ 0□□□□□□ - □□□□ 1 - □□□□ - □□□ - X90

- Entry is the same as standard products. Specifications and performance are the same as standard products.

2 With Safety Slide Locking Manual Override

Symbol
-X13

A safety lock is added to the slide locking manual override. (Refer to page 391.)

SY³₅□□₇ 00□□□□□□ - □□□□ G1 - □□□ - X13

- Entry is the same as standard products. Specifications and performance are the same as standard products.

3 2-Position Single Solenoid Valve with Built-in Return Spring (Only rubber seal type)

Symbol
-X350

A 2-position single solenoid valve with a spring built into the main valve. The main valve returns to origin (the OFF position) via the spring when it is not pressurized.

SY³₅ 1□□₇ 0□□□□□□ - □□□□ 1 - □□□□ - □□□ - X350

- Rubber seal type
- Entry is the same as standard products. Specifications and performance are the same as standard products.

Internal pilot type

External pilot type

- * For the external pilot type, exhaust the external pilot (X) port and the main pressure simultaneously. If the main pressure cannot be exhausted due to the system specifications, please contact SMC separately.

- * The manual option is only applicable to the non-locking push type.

*1 The value is for manifold base with 5 stations and individually operated 2-position type.

*2 Weight: W is the value of the internal pilot, and D-sub connector manifold with One-touch fitting straight piping type.

To obtain the weight with valves attached, add the valve weights given on page 406 for the appropriate number of stations.

* Calculation of effective area S and sonic conductance C: S = 5.0 x C

Connector Wiring Layout

For both serial and parallel wiring, additional valves are sequentially assigned pins on the connector. This makes it completely unnecessary to disassemble the connector unit.

■ Single solenoid valve is installed to all double wiring. (in the case of all double wiring) (Manifold specification sheet is not necessary.)

■ Single/double wiring are mixed. (Manifold specification sheet is necessary.)

* These diagrams are for the purpose of explanation, and differ from the connector wiring used for testing.

Type 10
Side Ported

Type 11
Bottom Ported

Plug-in Connector Connecting Base

D-sub Connector Flat Ribbon Cable

SY3000/5000/7000 Series

How to Order Manifolds

Refer to pages 569 (SY5000) and 570 (SY7000) for the dimensions of Type 11/Bottom-ported type.

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Type

10	Side ported
11	Bottom ported*1

*1 The SY5000 manifold part is used for the bottom-ported SY3000. When ordering, refer to the "Plug-in Mixed Mounting Type Manifold" (from page 574).

4 Connector entry direction

* The connector entry direction for connector type "FW" D-sub connector <IP67> cannot be rotated. If it is necessary to change, order the connector block assembly (page 592) separately.

3 Connector type

How to Order Manifold Assembly

Example (SS5Y3-10F1-□)

Manifold base
(5 stations)
SS5Y3-10F1-05D-C6

SS5Y3-10F1-05D-C6... 1 set (Type 10 5-station manifold base part no.)
 *SY3100-5U1..... 3 sets (2-position single part no.)
 *SY3200-5U1..... 1 set (2-position double part no.)
 *SY3300-5U1..... 1 set (3-position closed center part no.)

→ The asterisk denotes the symbol for the assembly. Prefix it to the part numbers of the valve, etc.

- For the valve arrangement, the valve closest to the D side is considered the 1st station.
- Under the manifold part number, state the valves to be mounted in order starting with the 1st station as shown in the figure above. If the arrangement becomes too complicated, specify the details on a manifold specification sheet.

* When mixing top-ported configurations, select from those listed on page 443. In such cases, use caution as there is also output on the A and B ports on the base side. Specify on the manifold specification sheet if plugs are required for the A and B ports on the base side.

5 Valve stations

:	:		:	:	
09	9 stations		04	4 stations	
02	2 stations	Specified layout*2 (Up to 18 solenoids available)	02	2 stations	Specified layout*2 (Up to 8 solenoids available)
:	:		:	:	
18	18 stations		08	8 stations	

- *1 Double wiring: 2-position single, double, 3-position, and 4-position valves can be used on all manifold stations. Use of a 2-position single solenoid will result in an unused control signal. If this is not desired, order with a specified layout.
- *2 Specified layout: Indicate the wiring specifications on the manifold specification sheet. (Note that 2-position double, 3-position, and 4-position valves cannot be used where single wiring has been specified.)
- * This also includes the number of the blanking plate assembly.

6 P, E port entry

U	U side (2 to 10 stations)
D	D side (2 to 10 stations)
B	Both sides (2 to 24 stations)

7 SUP/EXH block assembly

Nil	Internal pilot
S	Internal pilot, Built-in silencer
R	External pilot

* 3/5(E) port is plugged for the built-in silencer type.

9 Mounting and Option

Symbol	Mounting	Option	
		Name plate	Station number
Nil	Direct mounting	—	—
AA		●	—
BA		●	—
D <input type="checkbox"/>	DIN rail mounting	—	—
A <input type="checkbox"/>		●	●
B <input type="checkbox"/>		●	—

DIN Rail Option

Nil	Direct mounting
0	Without DIN rail (with bracket)
3	For 3 stations Specify a longer rail than the total length of specified stations.
24	For 24 stations

* Enter the number of stations inside when it is larger than the number of valve stations. (Refer to "DIN Rail Option" above.)

* Only direct mounting is available for the type 11 bottom-ported type.

* Refer to page 708 for the fixation of DIN rail mounting type manifold.

8 A, B port size (Metric/One-touch fitting)

Symbol	A, B port	Type 10/Side ported			Type 11/Bottom ported	
		SY3000	SY5000	SY7000	SY5000	SY7000
C2	ø2	●	—	—	—	—
C3	ø3.2	●	—	—	—	—
C4	ø4	●	●	—	●	—
C6	ø6	●	●	●	●	●

B6	ø6	●	●	●	—	—
B8	ø8	—	●	●	—	—
B10	ø10	—	—	●	—	—
B12	ø12	—	—	●	—	—
LM⁻¹	Elbow port, mixed sizes (including upward and downward piping)	●	●	●	—	—
P, E port size (One-touch fittings)		ø8	ø10	ø12	ø10	ø12

*1 Indicate the sizes on the manifold specification sheet in the case of "CM" or "LM."

The direction of P, E port fittings is the same as for the A, B port. If selecting "LM," indicate it on the manifold specification sheet for the P, E port fitting direction.

*2 To avoid interference with the body or piping, select a downward elbow port when mounting the optional spacer assembly (pages 617 to 619).

SY3000/5000/7000 Series

How to Order Valves (With mounting screw)

Refer to page 404 for valve specifications.

1 2 3 4 5 6 7 8 9 10 11

Base mounted

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Type of actuation

1	2-position	Single
2		Double
3	3-position	Closed center
4		Exhaust center
5		Pressure center
A ^{*1}	4-position dual	N.C./N.C.
B ^{*1}		N.O./N.O.
C ^{*1}		3-port

*1 Only the rubber seal type is available for the 4-position dual 3-port valve.

3 Seal type

0	Rubber seal
1	Metal seal

4 Pilot type

Nil	Internal pilot
R	External pilot

* When selecting the external pilot specification for the 4-position dual 3-port valve, pay attention to the pilot pressure. Refer to the valve specifications on page 404 for further details.

5 Back pressure check valve (Built-in valve type)

Nil	None
H	Built-in

* Only the rubber seal type is available. A manifold installed type is available if a back pressure check valve with a metal seal is required. Refer to page 625 for ordering examples. However, it is not recommended to use the built-in valve type and the manifold installed type at the same time because it will reduce the flow.

* The built-in valve type back pressure check valve is not available for the 3-position type or the SY7000.

6 Pilot valve option

Nil	Standard (0.7 MPa)
B	Quick response type (0.7 MPa)
K ^{*1}	High pressure type (1.0 MPa)

*1 Only the metal seal type is available for the high pressure type.

7 Coil type

Nil	Standard
T	With power saving circuit (Continuous duty type)

* Be sure to select the power saving circuit type if the valve is to be continuously energized for long periods of time.
* Be careful of the energizing time when the power saving circuit is selected. Refer to page 705 for details.

8 Rated voltage

5	24 VDC
6	12 VDC

9 Light/surge voltage suppressor and common specification

Symbol	With light	Surge voltage suppressor	Common specification
Nil	—	—	Non-polar
R	—	—	
U	●	—	
S	—	—	
Z	●	●	Positive common
NS	—	—	Negative common
NZ	●	—	

* For the non-polar type, be careful of surge voltage intrusion. Refer to page 706 for details.

* Only "Z" and "NZ" types are available with a power saving circuit.

10 Manual override

* Refer to page 423 for the safety slide locking manual override.

11 Type of mounting screw

Nil	Round head combination screw
B	Hexagon socket head cap screw
K	Round head combination screw (Drop prevention type)
H	Hexagon socket head cap screw (Drop prevention type)

* For "K" and "H," the valve body cover has a drop prevention construction to stop the mounting screws from falling out when the valve is removed for maintenance, etc.

* **When ordering a valve individually, the base gasket is not included.** Since the base gasket is attached to the manifold, please order the base gasket separately if it is needed for maintenance. Refer to page 611 for base gasket and mounting screw part numbers.

* "B" and "H" cannot be selected for the individual SUP/EXH spacer assembly, interface regulator, or double check spacer assembly with residual pressure release valve.

Plug-in Connector Connecting Base

D-sub Connector Flat Ribbon Cable

Type 12
Top Ported

SY3000/5000/7000 Series

How to Order Manifolds

Refer to pages 571 to 573 for the dimensions of Type 12/Top ported type.

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Connector type

5 P, E port entry

U ⁺	U side (2 to 10 stations)
D ⁺	D side (2 to 10 stations)
B	Both sides (2 to 24 stations)

*1 6 For type "S", SUP/EXH block assembly with a built-in silencer, choose U or D for P, E port entry.

3 Connector entry direction

* The connector entry direction for connector type "FW" D-sub connector <IP67> cannot be rotated. If it is necessary to change, order the connector block assembly (page 592) separately.

4 Valve stations

F/FW: D-sub connector (25 pins)

Symbol	Stations	Note
02	2 stations	Double wiring*1
:	:	
:	:	
12	12 stations	Specified layout*2 (Up to 24 solenoids available)
02	2 stations	
:	:	
24	24 stations	

P: Flat ribbon cable (26 pins)

Symbol	Stations	Note
02	2 stations	Double wiring*1
:	:	
:	:	
12	12 stations	Specified layout*2 (Up to 24 solenoids available)
02	2 stations	
:	:	
24	24 stations	

PG: Flat ribbon cable (20 pins)

Symbol	Stations	Note
02	2 stations	Double wiring*1
:	:	
:	:	
09	9 stations	Specified layout*2 (Up to 18 solenoids available)
02	2 stations	
:	:	
18	18 stations	

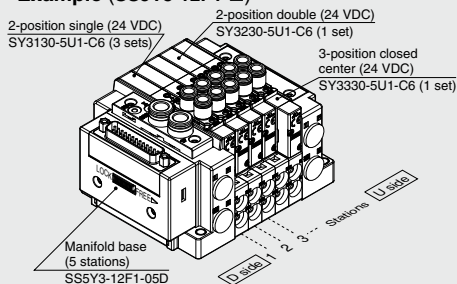

PH: Flat ribbon cable (10 pins)

Symbol	Stations	Note
02	2 stations	Double wiring*1
:	:	
:	:	
04	4 stations	Specified layout*2 (Up to 8 solenoids available)
02	2 stations	
:	:	
08	8 stations	

- *1 Double wiring: 2-position single, double, 3-position, and 4-position manifolds can be used on all manifold stations. Use of a 2-position single solenoid will result in an unused control signal. If this is not desired, order with a specified layout.
- *2 Specified layout: Indicate the wiring specifications on the manifold specification sheet. (Note that 2-position double, 3-position, and 4-position valves cannot be used where single wiring has been specified.)
- * This also includes the number of the blanking plate assembly.

How to Order Manifold Assembly

Example (SS5Y3-12F1-□)

SS5Y3-12F1-05D 1 set (Type 12 5-station manifold base part no.)
 *SY3130-5U1-C6 3 sets (2-position single part no.)
 *SY3230-5U1-C6 1 set (2-position double part no.)
 *SY3330-5U1-C6 1 set (3-position closed center part no.)
 The asterisk denotes the symbol for the assembly. Prefix it to the part numbers of the valve, etc.

- For the valve arrangement, the valve closest to the D side is considered the 1st station.
- Under the manifold part number, state the valves to be mounted in order starting with the 1st station as shown in the figure above. If the arrangement becomes too complicated, specify the details on a manifold specification sheet.

6 SUP/EXH block assembly

Nil	Internal pilot
S	Internal pilot, Built-in silencer
R	External pilot

* The P and E ports are only available on the U and D sides for the built-in silencer type. 3/5(E) port is plugged. The silencer exhaust port is located on the opposite side of the P and E port entry. (Example: When the P and E port entry is on the D side, the silencer exhaust port is on the U side.)

8 Mounting

Nil	Direct mounting
D	DIN rail mounting (With DIN rail)
D0	DIN rail mounting (Without DIN rail)
D3	For 3 stations
:	:
D24	For 24 stations

* Refer to page 708 for the fixation of DIN rail mounting type manifold. Specify a length longer than that of the standard rail.

7 P, E port size (One-touch fittings)

Symbol	SY3000	SY5000	SY7000
Nil	ø8	ø10	ø12
N	ø5/16"	ø3/8"	ø1/2"

* For N, sizes are in inches.

How to Order Valves (With mounting screw) Refer to page 404 for valve specifications.

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Type of actuation

1	2-position	Single
2		Double
3	3-position	Closed center
4		Exhaust center
5		Pressure center
A ⁻¹	4-position dual	N.C./N.C.
B ⁻¹		N.O./N.O.
C ⁻¹	3-port	N.C./N.O.

*1 Only the rubber seal type is available for the 4-position dual 3-port valve.

3 Seal type

0	Rubber seal
1	Metal seal

4 Pilot type

Nil	Internal pilot
R	External pilot

* When selecting the external pilot specification for the 4-position dual 3-port valve, pay attention to the pilot pressure. Refer to the valve specifications on page 404 for further details.

5 Back pressure check valve (Built-in valve type)

Nil	None
H	Built-in

* Only the rubber seal type is available. A manifold installed type is available if a back pressure check valve with a metal seal is required. Refer to page 625 for ordering examples. However, it is not recommended to use the built-in valve type and the manifold installed type at the same time because it will reduce the flow.

* The built-in valve type back pressure check valve is not available for the 3-position type or the SY7000.

6 Pilot valve option

Nil	Standard (0.7 MPa)
B	Quick response type (0.7 MPa)
K ⁻¹	High pressure type (1.0 MPa)

*1 Only the metal seal type is available for the high pressure type.

7 Coil type

Nil	Standard
T	With power saving circuit (Continuous duty type)

* Be sure to select the power saving circuit type if the valve is to be continuously energized for long periods of time.

* Be careful of the energizing time when the power saving circuit is selected. Refer to page 705 for details.

8 Rated voltage

5	24 VDC
6	12 VDC

9 Light/surge voltage suppressor and common specification

Symbol	With light	Surge voltage suppressor	Common specification
Nil	—	—	Non-polar
R	—	—	
U	●	—	
S	—	●	Positive common
Z	●	—	Negative common
NS	—	—	
NZ	●	—	

* For the non-polar type, be careful of surge voltage intrusion. Refer to page 706 for details.

* Only "Z" and "NZ" types are available with a power saving circuit.

10 Manual override

* Refer to page 423 for the safety slide locking manual override.

11 A, B port size

Symbol	Port size	Applicable series
M5	M5 x 0.8	SY3000
01	1/8	SY5000
02	1/4	SY7000

One-touch fitting (Metric)

Symbol	A, B port	SY3000	SY5000	SY7000
C2	ø2	●	—	—
C3	ø3.2	●	—	—
C4	ø4	●	●	—
C6	ø6	●	●	●
C8	ø8	—	●	●
C10	ø10	—	—	●
C12	ø12	—	—	●

One-touch fitting (Inch)

Symbol	A, B port	SY3000	SY5000	SY7000
N1	ø1/8"	●	—	—
N3	ø5/32"	●	—	—
N7	ø1/4"	—	●	●
N9	ø5/16"	—	●	●
N11	ø3/8"	—	—	●

12 Thread type

Nil	Rc
F	G
N	NPT
T	NPTF

* Only Nil is available for M5.

13 Type of mounting screw

Nil	Round head combination screw
B	Hexagon socket head cap screw
K	Round head combination screw (Drop prevention type)
H	Hexagon socket head cap screw (Drop prevention type)

* For "K" and "H," the valve body cover has a drop prevention construction to stop the mounting screws from falling out when the valve is removed for maintenance, etc.

* **When ordering a valve individually, the base gasket is not included.** Since the base gasket is attached to the manifold, please order the base gasket separately if it is needed for maintenance. Refer to page 611 for base gasket and mounting screw part numbers.

* "B" and "H" cannot be selected for the individual SUP/EXH spacer assembly or interface regulator.

SY3000/5000/7000 Series

Electrical Wiring Specifications

D-sub connector

If alignment is not specified, the internal wiring will be double wiring (connected to SOL. a and SOL. b) regardless of number of stations, valve types, and option types.

Connector terminal no.

Station	Terminal no.	Polarity	Symbol

- Fujitsu Limited
- Japan Aviation Electronics Industry, Limited
- J.S.T. Mfg. Co., Ltd.
- Oki Electric Cable Co., Ltd.

- * When using a standard commercial connector, use a 26-pin, 20-pin, or 10-pin type connector conforming to MIL-C-83503 with strain relief.
- * Cannot be used for movable wiring
- * Lengths other than the above are also available. Please contact SMC for details.

Specified Layout

(P: 26 pins)

(PG: 20 pins)

(PH: 10 pins)

A mixture of single and double wiring can be specified on the manifold specification. The maximum number of stations is determined according to the number of solenoids. The total number of solenoids should be 24 or less for P, 18 or less for PG, and 8 or less for PH. 1 solenoid is required for the 2-position single, and 2 solenoids for the 2-position double, 3-position, and 4-position.

Type 10
Side Ported

Type 11
Bottom Ported

Plug-in Connector Connecting Base

Terminal Block Box (Spring Type)

SY3000/5000/7000 Series

How to Order Manifolds

Refer to pages 569 (SY5000) and 570 (SY7000) for the dimensions of Type 11/Bottom ported type.

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Type

10	Side ported
11	Bottom ported *1

*1 The SY5000 manifold base is used for the bottom ported SY3000. When ordering, refer to the "Plug-in Mixed Mounting Type Manifold" (from page 574).

4 P, E port entry

U	U side (2 to 10 stations)
D	D side (2 to 10 stations)
B	Both sides (2 to 24 stations)

5 SUP/EXH block assembly

Nil	Internal pilot
S	Internal pilot, Built-in silencer
R	External pilot

*3 3/5(E) port is plugged for the built-in silencer type.

* When the built-in silencer type is used, keep the exhaust port from coming into direct contact with water or other liquids.

3 Valve stations

TC: Spring type terminal block box

Symbol	Stations	Note
02	2 stations	Double wiring *1
:	:	
:	:	
16	16 stations	Specified layout *2 (Up to 32 solenoids available)
02	2 stations	
:	:	
24	24 stations	

*1 Double wiring: 2-position single, double, 3-position, and 4-position valves can be used on all manifold stations.

Use of a 2-position single solenoid will result in an unused control signal. If this is not desired, order with a specified layout.

*2 Specified layout: Indicate the wiring specifications with the manifold specification sheet. (Note that 2-position double, 3-position, and 4-position valves cannot be used where single wiring has been specified.)

* This also includes the number of the blanking plate assembly.

7 Mounting and Option

Symbol	Mounting	Option
Nil	Direct mounting	None
AA	Direct mounting	Name plate (with station number)
BA		Name plate (without station number)
D		Without name plate
D	DIN rail mounting	Without name plate
A		Name plate (with station number)
B		Name plate (without station number)

DIN Rail Option

Nil	DIN rail mounting (with DIN rail)
0	DIN rail mounting (without DIN rail)
3	For 3 stations
:	:
:	Specify a length longer than that of the standard rail.
24	For 24 stations

* Enter the number of stations inside □. (Refer to "DIN Rail Option" above).
* Only direct mounting is available for the type 11 bottom ported type.

6 A, B port size (Metric/One-touch fitting)

P, E port size (One-touch fittings)		ø5/16"	ø3/8"	ø1/2"	ø3/8"				ø1/2"				

*1 Indicate the sizes on the manifold specification sheet in the case of "CM" or "LM."
The direction of P, E port fittings is the same as for the A, B port. If selecting "LM," indicate it on the manifold specification sheet for the P, E port fitting direction.
*2 To avoid interference with the body or piping, select a downward elbow port when mounting the optional spacer assembly.

How to Order Manifold Assembly

Example (SS5Y3-10TC-□)

SS5Y3-10TC-05D-C6.....1 set (Type 10 5-station manifold base part no.)
* SY3100-5U1 3 sets (2-position single part no.)
* SY3200-5U1 1 set (2-position double part no.)
* SY3300-5U1 1 set (3-position closed center part no.)

— The asterisk denotes the symbol for the assembly.
Prefix it to the part numbers of the valve, etc.

* For the valve arrangement, the valve closest to the D side is considered the 1st station.
* Under the manifold part number, state the valves to be mounted in order starting with the 1st station as shown in the figure above. If the arrangement becomes too complicated, specify the details on a manifold specification sheet.

How to Order Valves (With mounting screw) Refer to page 404 for valve specifications.

• Base mounted

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Type of actuation

1	2-position	Single
2		Double
3	3-position	Closed center
4		Exhaust center
5		Pressure center
A*1	4-position dual 3-port	N.C./N.C.
B*1		N.O./N.O.
C*1		N.C./N.O.

*1 Only the rubber seal type is available for the 4-position dual 3-port valve.

3 Seal type

0	Rubber seal
1	Metal seal

4 Pilot type

NII	Internal pilot
R	External pilot

* When selecting the external pilot specification for the 4-position dual 3-port valve, pay attention to the pilot pressure. Refer to the valve specifications on page 404 for further details.

5 Back pressure check valve (Built-in valve type)

NII	None
H	Built-in

* Only the rubber seal type is available. A manifold installed type is available if a back pressure check valve with a metal seal is required. Refer to page 625 for ordering examples. However, it is not recommended to use the built-in valve type and the manifold installed type at the same time because it will reduce the flow.

* The built-in valve type back pressure check valve is not available for the 3-position type or the SY7000.

6 Pilot valve option

NII	Standard (0.7 MPa)
B	Quick response type (0.7 MPa)
K*1	High pressure type (1.0 MPa)

*1 Only the metal seal type is available for the high pressure type.

7 Coil type

NII	Standard
T	With power saving circuit (Continuous duty type)

* Be sure to select the power saving circuit type if the valve is to be continuously energized for long periods of time.

* Be careful of the energizing time when the power saving circuit is selected. Refer to page 705 for details.

8 Rated voltage

5	24 VDC
6	12 VDC

9 Light/surge voltage suppressor and common specification

Symbol	With light	Surge voltage suppressor	Common specification
NII	—	—	Non-polar
R	—	—	
U	●	—	
S	—	●	Positive common
Z	●	—	Negative common
NS	—	—	
NZ	●	—	

* For the non-polar type, be careful of surge voltage intrusion. Refer to page 706 for details.

* Only "Z" and "NZ" types are available with a power saving circuit.

10 Manual override

* Refer to page 423 for the safety slide locking manual override.

11 Type of mounting screw

NII	Round head combination screw
B	Hexagon socket head cap screw
K	Round head combination screw (Drop prevention type)
H	Hexagon socket head cap screw (Drop prevention type)

* For "K" and "H," the valve body cover has a drop prevention construction to stop the mounting screws from falling out when the valve is removed for maintenance, etc.

* **When ordering a valve individually, the base gasket is not included.** Since the base gasket is attached to the manifold, please order the base gasket separately if it is needed for maintenance. Refer to page 611 for base gasket and mounting screw part numbers.

* "B" and "H" cannot be selected for the individual SUP/EXH spacer assembly, interface regulator, or double check spacer assembly with residual pressure release valve.

Plug-in Connector Connecting Base

Terminal Block Box (Spring Type)

Type 12
Top Ported

SY3000/5000/7000 Series

How to Order Manifolds

Refer to pages 571 to 573 for the dimensions of Type 12/Top-ported type.

① Series

3	SY3000
5	SY5000
7	SY7000

② Type

12	Top ported
-----------	------------

③ Valve stations

TC: Spring type terminal block box

Symbol	Stations	Note
02	2 stations	Double wiring *1
⋮	⋮	
16	16 stations	
02	2 stations	Specified layout *2 (Up to 32 solenoids available)
⋮	⋮	
24	24 stations	

*1 Double wiring: 2-position single, double, 3-position, and 4-position valves can be used on all manifold stations.
Use of a 2-position single solenoid will result in an unused control signal. If this is not desired, order with a specified layout.

*2 Specified layout: Indicate the wiring specifications with the manifold specification sheet. (Note that 2-position double, 3-position, and 4-position valves cannot be used where single wiring has been specified.)

* This also includes the number of the blanking plate assembly.

④ P, E port entry

U	U side (2 to 10 stations)
D	D side (2 to 10 stations)
B	Both sides (2 to 24 stations)

⑤ SUP/EXH block assembly

Nii	Internal pilot
S	Internal pilot, Built-in silencer
R	External pilot

* The P and E ports are only available on the U and D sides for the built-in silencer type. 3/5(E) port is plugged. The silencer exhaust port is located on the opposite side of the P and E port entry. (Example: When the P and E port entry is on the D side, the silencer exhaust port is on the U side.)
* When the built-in silencer type is used, keep the exhaust port from coming into direct contact with water or other liquids.

How to Order Manifold Assembly

Example (SS5Y3-12TC-□)

SS5Y3-12TC-05D 1 set (Type 12 5-station manifold base part no.)
 * **SY3130-5U1-C6** 3 sets (2-position single part no.)
 * **SY3230-5U1-C6** 1 set (2-position double part no.)
 * **SY3330-5U1-C6** 1 set (3-position closed center part no.)
 The asterisk denotes the symbol for the assembly.
 Prefix it to the part numbers of the valve, etc.

* For the valve arrangement, the valve closest to the D side is considered the 1st station.
 * Under the manifold part number, state the valves to be mounted in order starting with the 1st station as shown in the figure above. If the arrangement becomes too complicated, specify the details on a manifold specification sheet.

⑥ P, E port size (One-touch fittings)

Symbol	SY3000	SY5000	SY7000
Nii	ø8	ø10	ø12
N	ø5/16"	ø3/8"	ø1/2"

* For N, sizes are in inches.

⑦ Mounting

Nii	Direct mounting
D	DIN rail mounting (with DIN rail)
D0	DIN rail mounting (without DIN rail)
D3	For 3 stations
⋮	⋮
D24	For 24 stations

Specify a length longer than that of the standard rail.

* Refer to page 708 (SY3000/5000/7000 series: Specific product precautions 6) for instructions on fastening the DIN rail mounting type manifold.

SY3000/5000/7000 Series

How to Order Valves (With mounting screw) Refer to page 404 for valve specifications.

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Type of actuation

1	2-position	Single
2		Double
3	3-position	Closed center
4		Exhaust center
5		Pressure center
A*1	4-position dual 3-port	N.C./N.O.
B*1		N.O./N.O.
C*1		N.C./N.O.

*1 Only the rubber seal type is available for the 4-position dual 3-port valve.

3 Seal type

0	Rubber seal
1	Metal seal

4 Pilot type

NII	Internal pilot
R	External pilot

* When selecting the external pilot specification for the 4-position dual 3-port valve, pay attention to the pilot pressure. Refer to the valve specifications on page 404 for further details.

5 Back pressure check valve (Built-in valve type)

NII	None
H	Built-in

* Only the rubber seal type is available. A manifold installed type is available if a back pressure check valve with a metal seal is required. Refer to page 625 for ordering examples. However, it is not recommended to use the built-in valve type and the manifold installed type at the same time because it will reduce the flow.

* The built-in valve type back pressure check valve is not available for the 3-position type or the SY7000.

6 Pilot valve option

NII	Standard (0.7 MPa)
B	Quick response type (0.7 MPa)
K*1	High pressure type (1.0 MPa)

*1 Only the metal seal type is available for the high pressure type.

7 Coil type

NII	Standard
T	With power saving circuit (Continuous duty type)

* Be sure to select the power saving circuit type if the valve is to be continuously energized for long periods of time.

* Be careful of the energizing time when the power saving circuit is selected. Refer to page 705 for details.

8 Rated voltage

5	24 VDC
6	12 VDC

9 Light/surge voltage suppressor and common specification

Symbol	With light	Surge voltage suppressor	Common specification
NII	—	—	Non-polar
R	—	—	
U	●	—	
S	—	●	Positive common
Z	●	—	Negative common
NS	—	—	
NZ	●	—	

* For the non-polar type, be careful of surge voltage intrusion.

Refer to page 706 for details.

* Only "Z" and "NZ" types are available with a power saving circuit.

10 Manual override

* Refer to page 423 for the safety slide locking manual override.

11 A, B port size

Thread piping

Symbol	Port size	Applicable series
M5	M5 x 0.8	SY3000
O1	1/8	SY5000
O2	1/4	SY7000

One-touch fitting (Metric)

Symbol	A, B port	SY3000	SY5000	SY7000
C2	ø2	●	—	—
C3	ø3.2	●	—	—
C4	ø4	●	●	—
C6	ø6	●	●	●
C8	ø8	—	●	●
C10	ø10	—	—	●
C12	ø12	—	—	●

One-touch fitting (Inch)

Symbol	A, B port	SY3000	SY5000	SY7000
N1	ø1/8"	●	—	—
N3	ø5/32"	●	●	—
N7	ø1/4"	●	●	●
N9	ø5/16"	—	●	●
N11	ø3/8"	—	—	●

12 Thread type

NII	Rc
F	G
N	NPT
T	NPTF

* Only NII is available for M5.

13 Type of mounting screw

NII	Round head combination screw
B	Hexagon socket head cap screw
K	Round head combination screw (Drop prevention type)
H	Hexagon socket head cap screw (Drop prevention type)

* For "K" and "H," the valve body cover has a drop prevention construction to stop the mounting screws from falling out when the valve is removed for maintenance, etc.

* **When ordering a valve individually, the base gasket is not included.**

Since the base gasket is attached to the manifold, please order the base gasket separately if it is needed for maintenance. Refer to page 611 for base gasket and mounting screw part numbers.

* "B" and "H" cannot be selected for the individual SUP/EXH spacer assembly or interface regulator.

Terminal Block Connection

Step 1. Remove the terminal block cover
Loosen the 4 mounting screws (M3) to remove the terminal block cover.

Step 3. Mount the terminal block cover
Securely tighten the mounting screws (M3) to the torque shown in the table below only after confirming that the gasket is installed correctly.

Proper tightening torque [N·m]
0.54 to 0.66

• Applicable wire range: Conductor diameter $\phi 0.5$ to $\phi 1.2$ mm, Stranded wire AWG24 to 16

Step 2. The diagram below shows the terminal block wiring. All stations are provided with double wiring regardless of the mounted valves.

Connect each wire to the power supply side, according to the markings provided inside the terminal block.
Be sure to connect the wire with the push button pressed down.

Electrical Wiring Specifications (IP67 compatible)

Standard wiring

	Terminal no.	Polarity	
Station 1	SOL.a	1A (-)	(+)
	SOL.b	1B (-)	(+)
Station 2	SOL.a	2A (-)	(+)
	SOL.b	2B (-)	(+)
Station 3	SOL.a	3A (-)	(+)
	SOL.b	3B (-)	(+)
Station 4	SOL.a	4A (-)	(+)
	SOL.b	4B (-)	(+)
Station 5	SOL.a	5A (-)	(+)
	SOL.b	5B (-)	(+)
Station 6	SOL.a	6A (-)	(+)
	SOL.b	6B (-)	(+)

Station 16	SOL.a	16A (-)	(+)
	SOL.b	16B (-)	(+)
	COM.	(+)	(-)
	COM.	(+)	(-)

Positive Negative
common common

If alignment is not specified, the internal wiring will be double wiring (connected to SOL. a and SOL. b) regardless of number of stations, valve types, and option types.

* When using a valve with no polarity, either positive common or negative common can be used.

Specified Layout

A mixture of single and double wiring can be specified on the manifold specification sheet. The maximum number of stations is determined according to the number of solenoids. The total number of solenoids should be 32 or less. 1 solenoid is required for the 2-position single, and 2 solenoids for the 2-position double, 3-position, and 4-position.

Type 10
Side Ported

Type 11
Bottom Ported

Plug-in Connector Connecting Base

Terminal Block Box

SY3000/5000/7000 Series

How to Order Manifolds

Refer to pages 569 (SY5000) and 570 (SY7000) for the dimensions of Type 11/Bottom-ported type.

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Type

10	Side ported
11	Bottom ported ¹

*1 The SY5000 manifold base is used for the bottom-ported SY3000. When ordering, refer to the "Plug-in Mixed Mounting Type Manifold" (from page 574).

3 Valve stations

Symbol	Stations	Note
02	2 stations	Double wiring ¹
⋮	⋮	
10	10 stations	
02	2 stations	Specified layout ² (Up to 20 solenoids available)
⋮	⋮	
20	20 stations	

*1 Double wiring: 2-position single, double, 3-position, and 4-position valves can be used on all manifold stations. Use of a 2-position single solenoid will result in an unused control signal. If this is not desired, order with a specified layout.

*2 Specified layout: Indicate the wiring specifications with the manifold specification sheet. (Note that 2-position double, 3-position, and 4-position valves cannot be used where single wiring has been specified.)

* This also includes the number of the blanking plate assembly.

4 P, E port entry

U	U side (2 to 10 stations)
D	D side (2 to 10 stations)
B	Both sides (2 to 20 stations)

5 SUP/EXH block assembly

Nii	Internal pilot
S	Internal pilot, Built-in silencer
R	External pilot

* 3/5(E) port is plugged for the built-in silencer type.
* When the built-in silencer type is used, keep the exhaust port from coming into direct contact with water or other liquids.

Refer to the page on the right for 6.

How to Order Manifold Assembly

Example (SS5Y3-10T-□)

SS5Y3-10T-05D-C6 ... 1 set (Type 10 5-station manifold base part no.)
 *SY3100-5U1 3 sets (2-position single part no.)
 *SY3200-5U1 1 set (2-position double part no.)
 *SY3300-5U1 1 set (3-position closed center part no.)

→ The asterisk denotes the symbol for the assembly.
Prefix it to the part numbers of the valve, etc.

• For the valve arrangement, the valve closest to the D side is considered the 1st station.
• Under the manifold part number, state the valves to be mounted in order starting with the 1st station as shown in the figure above. If the arrangement becomes too complicated, specify the details on a manifold specification sheet.

* When mixing top-ported configurations, select from those listed on page 463. In such cases, use caution as there is also output on the A and B ports on the base side. Specify on the manifold specification sheet if plugs are required for the A and B ports on the base side.

7 Mounting and Option

Symbol	Mounting	Option	
		Name plate	Station number
Nii	Direct mounting	●	●
AA		—	—
BA		●	—
D□	DIN rail mounting	—	—
A□		●	●
B□		●	—

* Enter the number of stations inside □ when it is larger than the number of valve stations. (Refer to "DIN Rail Option" below.)
* Only direct mounting is available for the type 11 bottom-ported type.
* Refer to page 708 for the fixation of DIN rail mounting type manifold.

DIN Rail Option

Nii	Standard length	
0	Without DIN rail (with bracket)	
3	For 3 stations	Specify a longer rail than the total length of specified stations.
⋮	⋮	
20	For 20 stations	

6 A, B port size (Metric/One-touch fitting)

Symbol	A, B port	Type 10/Side ported			Type 11/Bottom ported					
		SY3000	SY5000	SY7000	SY5000	SY7000				
C2 C3 C4 C6 C8 C10 C12 CM ^{*1}	Straight	ø2	●	—	—	—

		ø6	●	●	●	—		—		
		ø8	—	●	—	—		—		
		ø10	—	—	●	—		—		
		Downward	ø4	●	●	—		—		
			ø6	●	●	●		—		—
			ø8	—	●	●		—		—
B10 B12	Downward	ø10	—	—	●	—				
		ø12	—	—	●	—				
LM ^{*1}	Elbow port, mixed sizes (Including upward and downward piping)	●	●	●	—	—				
P, E port size (One-touch fittings)		ø8	ø10	ø12	ø10	ø12				

A, B port size (Inch/One-touch fitting)

Symbol	A, B port	Type 10/Side ported			Type 11/Bottom ported					
		SY3000	SY5000	SY7000	SY5000	SY7000				
N1 N3 N7 N9 N11 CM ^{*1}	Straight	ø1/8"	●	—	—	—				
		ø5/32"	●	●	—	●		—		
		ø1/4"	●	●	●	●		●		
		ø5/16"	—	●	●	●		●		
		ø3/8"	—	—	●	—		●		
LN3 LN7 LN9 LN11 BN3 BN7 BN9 BN11 LM ^{*1}	Elbow ^{*2}	Upward	ø5/32"	●	—	—	—			
			ø1/4"	●	●	—	—		—	
			ø5/16"	—	●	—	—		—	
		Downward	ø3/8"	—	—	●	—		—	
			ø5/32"	●	—	—	—		—	
			ø1/4"	●	●	—	—		—	
			ø5/16"	—	●	—	—		—	
ø3/8"	—	—	●	—	—					
LM ^{*1}	Elbow port, mixed sizes (Including upward and downward piping)	●	●	●	—	—				
P, E port size (One-touch fittings)		ø5/16"	ø3/8"	ø1/2"	ø3/8"	ø1/2"				

*1 Indicate the sizes on the manifold specification sheet in the case of "CM" or "LM."

The direction of P, E port fittings is the same as for the A, B port. If selecting "LM," indicate it on the manifold specification sheet for the P, E port fitting direction.

*2 To avoid interference with the body or piping, select a downward elbow port when mounting the optional spacer assembly (pages 617 to 619).

SY3000/5000/7000 Series

How to Order Valves (With mounting screw) Refer to page 404 for valve specifications.

• Base mounted

① Series

3	SY3000
5	SY5000
7	SY7000

② Type of actuation

1	2-position	Single
2		Double
3	3-position	Closed center
4		Exhaust center
5		Pressure center
A ^{*1}	4-position dual 3-port	N.C./N.C.
B ^{*1}		N.O./N.O.
C ^{*1}		N.C./N.O.

*1 Only the rubber seal type is available for the 4-position dual 3-port valve.

③ Seal type

0	Rubber seal
1	Metal seal

④ Pilot type

Nil	Internal pilot
R	External pilot

* When selecting the external pilot specification for the 4-position dual 3-port valve, pay attention to the pilot pressure. Refer to the valve specifications on page 404 for further details.

⑤ Back pressure check valve (Built-in valve type)

Nil	None
H	Built-in

* Only the rubber seal type is available. A manifold installed type is available if a back pressure check valve with a metal seal is required. Refer to page 625 for ordering examples. However, it is not recommended to use the built-in valve type and the manifold installed type at the same time because it will reduce the flow.

* The built-in valve type back pressure check valve is not available for the 3-position type or the SY7000.

⑥ Pilot valve option

Nil	Standard (0.7 MPa)
B	Quick response type (0.7 MPa)
K ^{*1}	High pressure type (1.0 MPa)

*1 Only the metal seal type is available for the high pressure type.

⑦ Coil type

Nil	Standard
T	With power saving circuit (Continuous duty type)

* Be sure to select the power saving circuit type if the valve is to be continuously energized for long periods of time.
* Be careful of the energizing time when the power saving circuit is selected. Refer to page 705 for details.

⑧ Rated voltage

5	24 VDC
6	12 VDC

⑨ Light/surge voltage suppressor and common specification

Symbol	With light	Surge voltage suppressor	Common specification
Nil	—	—	Non-polar
R	—	—	
U	●	—	
S	—	●	Positive common
Z	●	—	Negative common
NS	—	—	
NZ	●	—	

* For the non-polar type, be careful of surge voltage intrusion. Refer to page 706 for details.
* Only "Z" and "NZ" types are available with a power saving circuit.

⑩ Manual override

* Refer to page 423 for the safety slide locking manual override.

⑪ Type of mounting screw

Nil	Round head combination screw
B	Hexagon socket head cap screw
K	Round head combination screw (Falling-out-prevention type)
H	Hexagon socket head cap screw (Falling-out-prevention type)

* For "K" and "H," the valve body cover has a drop prevention construction to stop the mounting screws from falling out when the valve is removed for maintenance, etc.
* **When ordering a valve individually, the base gasket is not included.** Since the base gasket is attached to the manifold, please order the base gasket separately if it is needed for maintenance. Refer to page 611 for base gasket and mounting screw part numbers.
* "B" and "H" cannot be selected for the individual SUP/EXH spacer assembly, interface regulator, or double check spacer assembly with residual pressure release valve.

Plug-in Connector Connecting Base

Terminal Block Box

Type 12
Top Ported

SY3000/5000/7000 Series

How to Order Manifolds

Refer to pages 571 to 573 for the dimensions of Type 12/Top ported type.

1 Series

3	SY3000
5	SY5000
7	SY7000

3 P, E port entry

U ^{*1}	U side (2 to 10 stations)
D ^{*1}	D side (2 to 10 stations)
B	Both sides (2 to 20 stations)

*1 For type "S", SUP/EXH block assembly with a built-in silencer, choose U or D for P, E port entry.

2 Valve stations

Symbol	Stations	Note
02	2 stations	Double wiring ^{*1}
⋮	⋮	
10	10 stations	
02	2 stations	Specified layout ^{*2} (Up to 20 solenoids available)
⋮	⋮	
20	20 stations	

*1 Double wiring: 2-position single, double, 3-position, and 4-position valves can be used on all manifold stations.

Use of a 2-position single solenoid will result in an unused control signal. If this is not desired, order with a specified layout.

*2 Specified layout: Indicate the wiring specifications on the manifold specification sheet. (Note that 2-position double, 3-position, and 4-position valves cannot be used where single wiring has been specified.)

* This also includes the number of the blanking plate assembly.

4 SUP/EXH block assembly

NII	Internal pilot
S	Internal pilot, Built-in silencer
R	External pilot

* The P and E ports are only available on the U and D sides of the built-in silencer type. 3/5(E) port is plugged. The silencer exhaust port is located on the opposite side of the P and E port entry. (Example: When the P and E port entry is on the D side, the silencer exhaust port is on the U side.)

* When the built-in silencer type is used, keep the exhaust port from coming into direct contact with water or other liquids.

5 P, E port size (One-touch fittings)

Symbol	SY3000	SY5000	SY7000
NII	ø8	ø10	ø12
N	ø5/16"	ø3/8"	ø1/2"

* For N, sizes are in inches.

How to Order Manifold Assembly

Example (SS5Y3-12T-□)

SS5Y3-12T-05D 1 set (Type 12 5-station manifold base part no.)
 *SY3130-5U1-C6 3 sets (2-position single part no.)
 *SY3230-5U1-C6 1 set (2-position double part no.)
 *SY3330-5U1-C6 1 set (3-position closed center part no.)

→ The asterisk denotes the symbol for the assembly.
Prefix it to the part numbers of the valve, etc.

- For the valve arrangement, the valve closest to the D side is considered the 1st station.
- Under the manifold part number, state the valves to be mounted in order starting with the 1st station as shown in the figure above. If the arrangement becomes too complicated, specify the details on a manifold specification sheet.

6 Mounting

NII	Direct mounting	
D	DIN rail mounting (With DIN rail)	
D0	DIN rail mounting (Without DIN rail)	
D3	For 3 stations	Specify a length longer than that of the standard rail.
⋮	⋮	
D20	For 20 stations	

* Refer to page 708 for the fixation of DIN rail mounting type manifold.

How to Order Valves (With mounting screw)

Refer to page 404 for valve specifications.

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Type of actuation

1		Single
2	2-position	Double
3		Closed center
4	3-position	Exhaust center
5		Pressure center
A ⁻¹	4-position dual 3-port	N.C./N.O.
B ⁻¹		N.O./N.O.
C ⁻¹		N.C./N.O.

*1 Only the rubber seal type is available for the 4-position dual 3-port valve.

3 Seal type

0	Rubber seal
1	Metal seal

4 Pilot type

Nil	Internal pilot
R	External pilot

* When selecting the external pilot specification for the 4-position dual 3-port valve, pay attention to the pilot pressure. Refer to the valve specifications on page 404 for further details.

5 Back pressure check valve (Built-in valve type)

Nil	None
H	Built-in

* Only the rubber seal type is available. A manifold installed type is available if a back pressure check valve with a metal seal is required. Refer to page 625 for ordering examples. However, it is not recommended to use the built-in valve type and the manifold installed type at the same time because it will reduce the flow.

* The built-in valve type back pressure check valve is not available for the 3-position type or the SY7000.

6 Pilot valve option

Nil	Standard (0.7 MPa)
B	Quick response type (0.7 MPa)
K ⁻¹	High pressure type (1.0 MPa)

*1 Only the metal seal type is available for the high pressure type.

7 Coil type

Nil	Standard
T	With power saving circuit (Continuous duty type)

* Be sure to select the power saving circuit type if the valve is to be continuously energized for long periods of time.
* Be careful of the energizing time when the power saving circuit is selected. Refer to page 705 for details.

8 Rated voltage

5	24 VDC
6	12 VDC

9 Light/surge voltage suppressor and common specification

Symbol	With light	Surge voltage suppressor	Common specification
Nil	—	—	Non-polar
R	—	—	
U	●	—	
S	—	●	Positive common
Z	●	—	Negative common
NS	—	—	
NZ	●	—	

* For the non-polar type, be careful of surge voltage intrusion. Refer to page 706 for details.

* Only "Z" and "NZ" types are available with a power saving circuit.

10 Manual override

* Refer to page 423 for the safety slide locking manual override.

11 A, B port size

Thread piping

Symbol	Port size	Applicable series
M5	M5 x 0.8	SY3000
O1	1/8	SY5000
O2	1/4	SY7000

C12	ø12	—	—	●

One-touch fitting (Inch)

Symbol	A, B port	SY3000	SY5000	SY7000
N1	ø1/8"	●	—	—
N3	ø5/32"	●	●	—
N7	ø1/4"	●	●	●
N9	ø5/16"	—	●	●
N11	ø3/8"	—	—	●

12 Thread type

Nil	Rc
F	G
N	NPT
T	NPTF

* Only Nil is available for M5.

13 Type of mounting screw

Nil	Round head combination screw
B	Hexagon socket head cap screw
K	Round head combination screw (Drop prevention type)
H	Hexagon socket head cap screw (Drop prevention type)

* For "K" and "H," the valve body cover has a drop prevention construction to stop the mounting screws from falling out when the valve is removed for maintenance, etc.

* **When ordering a valve individually, the base gasket is not included.**

Since the base gasket is attached to the manifold, please order the base gasket separately if it is needed for maintenance. Refer to page 611 for base gasket and mounting screw part numbers.

* "B" and "H" cannot be selected for the individual SUP/EXH spacer assembly or interface regulator.

SY3000/5000/7000 Series

Terminal Block Connection

Step 1. Remove the terminal block cover

Loosen the 4 mounting screws (M4) to remove the terminal block cover.

Step 3. Mount the terminal block cover

Securely tighten the screws to the torque shown in the table below only after confirming that the gasket is installed correctly.

Proper tightening torque [N·m]
0.7 to 1.2

Step 2. The diagram below shows the terminal block wiring.

All stations are provided with double wiring regardless of the mounted valves.

Connect each wire to the power supply side, according to the markings provided inside the terminal block.

- Applicable crimped terminal: 1.25-3S, 1.25Y-3, 1.25Y-3N, 1.25Y-3.5
- Name plate: VVQ5000-N-T
- Drip-proof plug assembly (for G3/4): AXT100-B06A

Electrical Wiring Specifications (IP67 compatible)

If alignment is not specified, the internal wiring will be double wiring (connected to SOL_a and SOL_b) regardless of number of stations, valve types, and option types.

* When using a valve with no polarity, either positive common or negative common can be used.

Standard wiring

Station no.	Terminal no.		Polarity	
	SOL_a	SOL_b	(-)	(+)
Station 1	1A	1B	(-)	(+)
	2A	2B	(-)	(+)
Station 2	3A	3B	(-)	(+)
	4A	4B	(-)	(+)
Station 3	5A	5B	(-)	(+)
	6A	6B	(-)	(+)
Station 4	7A	7B	(-)	(+)
	8A	8B	(-)	(+)
Station 5	9A	9B	(-)	(+)
	10A	10B	(-)	(+)
Station 6	COM		(+)	(-)

Specified Layout

A mixture of single and double wiring can be specified on the manifold specification sheet. The maximum number of stations is determined according to the number of solenoids. The total number of solenoids should be 20 or less. 1 solenoid is required for the 2-position single, and 2 solenoids for the 2-position double, 3-position, and 4-position.

Type 10
Side Ported

Type 11
Bottom Ported

Plug-in Connector Connecting Base

Lead Wire

SY3000/5000/7000 Series

How to Order Manifolds

Refer to pages 569 (SY5000) and 570 (SY7000) for the dimensions of Type 11/Bottom-ported type.

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Type

10	Side ported
11	Bottom ported*1

*1 The SY5000 manifold base is used for the bottom-ported SY3000. When ordering, refer to the "Plug-in Mixed Mounting Type Manifold" (from page 574).

3 Number of cores (Lead wire)

L1	34 cores
L2	17 cores
L3	9 cores

4 Lead wire length

1	0.6 m
2	1.5 m
3	3 m

5 Valve stations

(L1□)

Symbol	Stations	Note
02	2 stations	Double wiring*1
16	16 stations	
02	2 stations	Specified layout*2 (Up to 32 solenoids available)
24	24 stations	

(L3□)

Symbol	Stations	Note
02	2 stations	Double wiring*1
04	4 stations	
02	2 stations	Specified layout*2 (Up to 8 solenoids available)
08	8 stations	

(L2□)

Symbol	Stations	Note
02	2 stations	Double wiring*1
08	8 stations	
02	2 stations	Specified layout*2 (Up to 16 solenoids available)
16	16 stations	

*1 Double wiring: 2-position single, double, 3-position, and 4-position valves can be used on all manifold stations.

Use of a 2-position single solenoid will result in an unused control signal. If this is not desired, order with a specified layout.

*2 Specified layout: Indicate the wiring specifications on the manifold specification sheet. (Note that 2-position double, 3-position, and 4-position valves cannot be used where single wiring has been specified.)

* This also includes the number of the blanking plate assembly.

How to Order Manifold Assembly

Example (SS5Y3-10L11-□)

SS5Y3-10L11-05D-C6 ... 1 set (Type 10 5-station manifold base part no.)
 *SY3100-5U1 3 sets (2-position single part no.)
 *SY3200-5U1 1 set (2-position double part no.)
 *SY3300-5U1 1 set (3-position closed center part no.)

→ The asterisk denotes the symbol for the assembly.
Prefix it to the part numbers of the valve, etc.

- For the valve arrangement, the valve closest to the D side is considered the 1st station.
- Under the manifold part number, state the valves to be mounted in order starting with the 1st station as shown in the figure above. If the arrangement becomes too complicated, specify the details on a manifold specification sheet.

* When mixing top-ported configurations, select from those listed on page 473. In such cases, use caution as there is also output on the A and B ports on the base side. Specify on the manifold specification sheet if plugs are required for the A and B ports on the base side.

6 P, E port entry

U	U side (2 to 10 stations)
D	D side (2 to 10 stations)
B	Both sides (2 to 24 stations)

7 SUP/EXH block assembly

Nil	Internal pilot
S	Internal pilot, Built-in silencer
R	External pilot

* 3/5(E) port is plugged for the built-in silencer type.

* When the built-in silencer type is used, keep the exhaust port from coming into direct contact with water or other liquids.

8 A, B port size (Metric/One-touch fitting)

Symbol	A, B port	Type 10/Side ported			Type 11/Bottom ported	
		SY3000	SY5000	SY7000	SY5000	SY7000
C2 C3 C4 C6 C8 C10 C12	Straight	ø2	●	—	—	—
		ø3.2	●	—	—	—
		ø4	●	●	—	●
		ø6	●	●	●	●
		ø8	—	●	●	●
		ø10	—	—	●	—
CM ¹	Straight port, mixed sizes	●	●	●	●	
L4 L6 L8 L10 L12 B4 B6 B8 B10 B12	Upward	ø4	●	●	—	—
		ø6	●	●	—	—
		ø8	—	●	●	—
		ø10	—	—	●	—
		ø12	—	—	—	—
		ø4	●	●	—	—
	Downward	ø6	●	●	—	—
		ø8	—	●	●	—
		ø10	—	—	●	—
		ø12	—	—	—	—
		ø10	—	—	●	—
		ø12	—	—	—	—
LM ¹	Elbow port, mixed sizes (including upward and downward piping)	●	●	●	—	
P, E port size (One-touch fittings)		ø8	ø10	ø12	ø10	ø12

A, B port size (Inch/One-touch fitting)

Symbol	A, B port	Type 10/Side ported			Type 11/Bottom ported	
		SY3000	SY5000	SY7000	SY5000	SY7000
N1 N3 N7 N9 N11	Straight	ø1/8"	●	—	—	—
		ø5/32"	●	●	—	—
		ø1/4"	●	●	●	●
		ø5/16"	—	●	●	●
		ø3/8"	—	—	●	●
		ø3/8"	—	—	—	—
CM ¹	Straight port, mixed sizes	●	●	●	●	
LN3 LN7 LN9 LN11 BN3 BN7 BN9 BN11 LM ¹	Upward	ø5/32"	●	—	—	—
		ø1/4"	●	●	—	—
		ø5/16"	—	●	—	—
		ø3/8"	—	—	●	—
		ø5/32"	●	—	—	—
		ø1/4"	●	●	—	—
	Downward	ø3/8"	—	—	●	—
		ø5/16"	—	●	—	—
		ø5/16"	—	—	●	—
		ø3/8"	—	—	—	—
		ø3/8"	—	—	●	—
LM ¹	Elbow port, mixed sizes (including upward and downward piping)	●	●	●	—	
P, E port size (One-touch fittings)		ø5/16"	ø3/8"	ø1/2"	ø3/8"	ø1/2"

*1 Indicate the sizes on the manifold specification sheet in the case of "CM" or "LM."

The direction of P, E port fittings is the same as for the A, B port. If selecting "LM," indicate it on the manifold specification sheet for the P, E port fitting direction.

*2 To avoid interference with the body or piping, select a downward elbow port when mounting the optional spacer assembly (pages 617 to 619).

9 Mounting and Option

Symbol	Mounting	Option	
		Name plate	Station number
Nil	Direct mounting	—	—
AA		●	●
BA		●	—
D □	DIN rail mounting	—	—
A □		●	●
B □		●	—

DIN Rail Option

Standard length	
0	Without DIN rail (with bracket)
3	For 3 stations
:	:
24	For 24 stations

Specify a longer rail than the total length of specified stations.

* Enter the number of stations inside □ when it is larger than the number of valve stations. (Refer to "DIN Rail Option" above.)

* Only direct mounting is available for the type 11 bottom ported type.

* Refer to page 708 for the fixation of DIN rail mounting type manifold.

SY3000/5000/7000 Series

How to Order Valves (With mounting screw) Refer to page 404 for valve specifications.

SY 3 1 0 0 - 5 1 -

1 2 3 4 5 6 7 8 9 10 11

• Base mounted

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Type of actuation

1		Single
2	2-position	Double
3		Closed center
4	3-position	Exhaust center
5		Pressure center
A ^{*1}	4-position dual 3-port	N.C./N.C.
B ^{*1}		N.O./N.O.
C ^{*1}		N.C./N.O.

*1 Only the rubber seal type is available for the 4-position dual 3-port valve.

3 Seal type

0	Rubber seal
1	Metal seal

4 Pilot type

Nii	Internal pilot
R	External pilot

* When selecting the external pilot specification for the 4-position dual 3-port valve, pay attention to the pilot pressure. Refer to the valve specifications on page 404 for further details.

5 Back pressure check valve (Built-in valve type)

Nii	None
H	Built-in

* Only the rubber seal type is available. A manifold installed type is available if a back pressure check valve with a metal seal is required. Refer to page 625 for ordering examples. However, it is not recommended to use the built-in valve type and the manifold installed type at the same time because it will reduce the flow.

* The built-in valve type back pressure check valve is not available for the 3-position type or the SY7000.

6 Pilot valve option

Nii	Standard (0.7 MPa)
B	Quick response type (0.7 MPa)
K ^{*1}	High pressure type (1.0 MPa)

*1 Only the metal seal type is available for the high pressure type.

7 Coil type

Nii	Standard
T	With power saving circuit (Continuous duty type)

* Be sure to select the power saving circuit type if the valve is to be continuously energized for long periods of time.

* Be careful of the energizing time when the power saving circuit is selected. Refer to page 705 for details.

8 Rated voltage

5	24 VDC
6	12 VDC

9 Light/surge voltage suppressor and common specification

Symbol	With light	Surge voltage suppressor	Common specification
Nii	—	—	Non-polar
R	—	—	
U	●	—	
S	—	●	Positive common
Z	●	—	Negative common
NS	—	—	
NZ	●	—	

* For the non-polar type, be careful of surge voltage intrusion. Refer to page 706 for details.

* Only "Z" and "NZ" types are available with a power saving circuit.

10 Manual override

* Refer to page 423 for the safety slide locking manual override.

11 Type of mounting screw

Nii	Round head combination screw
B	Hexagon socket head cap screw
K	Round head combination screw (Drop prevention type)
H	Hexagon socket head cap screw (Drop prevention type)

* For "K" and "H," the valve body cover has a drop prevention construction to stop the mounting screws from falling out when the valve is removed for maintenance, etc.

* **When ordering a valve individually, the base gasket is not included.**

Since the base gasket is attached to the manifold, please order the base gasket separately if it is needed for maintenance. Refer to page 611 for base gasket and mounting screw part numbers.

* "B" and "H" cannot be selected for the individual SUP/EXH spacer assembly, interface regulator, or double check spacer assembly with residual pressure release valve.

Top Ported

SY3000/5000/7000 Series

How to Order Manifolds

Refer to pages 571 to 573 for the dimensions of Type 12/Top ported type.

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Number of cores (Lead wire)

L1	34 cores
L2	17 cores
L3	9 cores

3 Lead wire length

1	0.6 m
2	1.5 m
3	3 m

5 P, E port entry

U*1	U side (2 to 10 stations)
D*1	D side (2 to 10 stations)
B	Both sides (2 to 24 stations)

*1 For type "S", SUP/EXH block assembly with a built-in silencer, choose U or D for P, E port entry.

4 Valve stations

(L1□)

Symbol	Stations	Note
02	2 stations	Double wiring*1
16	16 stations	
02	2 stations	Specified layout*2 (Up to 32 solenoids available)
24	24 stations	

(L3□)

Symbol	Stations	Note
02	2 stations	Double wiring*1
04	4 stations	
02	2 stations	Specified layout*2 (Up to 8 solenoids available)
08	8 stations	

(L2□)

Symbol	Stations	Note
02	2 stations	Double wiring*1
08	8 stations	
02	2 stations	Specified layout*2 (Up to 16 solenoids available)
16	16 stations	

*1 Double wiring: 2-position single, double, 3-position, and 4-position valves can be used on all manifold stations.

Use of a 2-position single solenoid will result in an unused control signal. If this is not desired, order with a specified layout.

*2 Specified layout: Indicate the wiring specifications on the manifold specification sheet. (Note that 2-position double, 3-position, and 4-position valves cannot be used where single wiring has been specified.)

* This also includes the number of the blanking plate assembly.

How to Order Manifold Assembly

Example (SS5Y3-12L11-□)

SS5Y3-12L11-05D ... 1 set (Type 12 5-station manifold base part no.)
 *SY3130-5U1-C6 3 sets (2-position single part no.)
 *SY3230-5U1-C6 1 set (2-position double part no.)
 *SY3330-5U1-C6 1 set (3-position closed center part no.)

The asterisk denotes the symbol for the assembly. Prefix it to the part numbers of the valve, etc.

- For the valve arrangement, the valve closest to the D side is considered the 1st station.
- Under the manifold part number, state the valves to be mounted in order starting with the 1st station as shown in the figure above. If the arrangement becomes too complicated, specify the details on a manifold specification sheet.

6 SUP/EXH block assembly

Nil	Internal pilot
S	Internal pilot, Built-in silencer
R	External pilot

* The P and E ports are only available on the U and D sides for the built-in silencer type. 3/5(E) port is plugged. The silencer exhaust port is located on the opposite side of the P and E port entry. (Example: When the P and E port entry is on the D side, the silencer exhaust port is on the U side.)

* When the built-in silencer type is used, keep the exhaust port from coming into direct contact with water or other liquids.

7 P, E port size (One-touch fittings)

Symbol	SY3000	SY5000	SY7000
Nil	ø8	ø10	ø12
N	ø5/16"	ø3/8"	ø1/2"

* For N, sizes are in inches.

8 Mounting

Nil	Direct mounting
D	DIN rail mounting (With DIN rail)
D0	DIN rail mounting (Without DIN rail)
D3	For 3 stations Specify a length longer than that of the standard rail.
24	For 24 stations

* Refer to page 708 for the fixation of DIN rail mounting type manifold.

How to Order Valves (With mounting screw)

Refer to page 404 for valve specifications.

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Type of actuation

1	2-position	Single
2		Double
3	3-position	Closed center
4		Exhaust center
5		Pressure center
A ⁻¹	4-position dual 3-port	N.C./N.C.
B ⁻¹		N.O./N.O.
C ⁻¹		N.C./N.O.

*1 Only the rubber seal type is available for the 4-position dual 3-port valve.

3 Seal type

0	Rubber seal
1	Metal seal

4 Pilot type

NII	Internal pilot
R	External pilot

* When selecting the external pilot specification for the 4-position dual 3-port valve, pay attention to the pilot pressure. Refer to the valve specifications on page 404 for further details.

5 Back pressure check valve (Built-in valve type)

NII	None
H	Built-in

* Only the rubber seal type is available. A manifold installed type is available if a back pressure check valve with a metal seal is required. Refer to page 625 for ordering examples. However, it is not recommended to use the built-in valve type and the manifold installed type at the same time because it will reduce the flow.

* The built-in valve type back pressure check valve is not available for the 3-position type or the SY7000.

6 Pilot valve option

NII	Standard (0.7 MPa)
B	Quick response type (0.7 MPa)
K ⁻¹	High pressure type (1.0 MPa)

*1 Only the metal seal type is available for the high pressure type.

7 Coil type

NII	Standard
T	With power saving circuit (Continuous duty type)

* Be sure to select the power saving circuit type if the valve is to be continuously energized for long periods of time.
* Be careful of the energizing time when the power saving circuit is selected. Refer to page 705 for details.

8 Rated voltage

5	24 VDC
6	12 VDC

9 Light/surge voltage suppressor and common specification

Symbol	With light	Surge voltage suppressor	Common specification
NII	—	—	Non-polar
R	—	—	
U	●	—	
S	—	●	Positive common
Z	●	—	Negative common
NS	—	—	
NZ	●	—	

* For the non-polar type, be careful of surge voltage intrusion.
Refer to page 706 for details.
* Only "Z" and "NZ" types are available with a power saving circuit.

10 Manual override

* Refer to page 423 for the safety slide locking manual override.

11 A, B port size

Thread piping

Symbol	Port size	Applicable series

N1	ø1/8"	●	—	—
N3	ø5/32"	●	●	—
N7	ø1/4"	●	●	●
N9	ø5/16"	—	●	●
N11	ø3/8"	—	—	●

12 Thread type

NII	Rc
F	G
N	NPT
T	NPTF

* Only NII is available for M5.

13 Type of mounting screw

NII	Round head combination screw
B	Hexagon socket head cap screw
K	Round head combination screw (Drop prevention type)
H	Hexagon socket head cap screw (Drop prevention type)

* For "K" and "H," the valve body cover has a drop prevention construction to stop the mounting screws from falling out when the valve is removed for maintenance, etc.
* **When ordering a valve individually, the base gasket is not included.**

Since the base gasket is attached to the manifold, please order the base gasket separately if it is needed for maintenance. Refer to page 611 for base gasket and mounting screw part numbers.

* "B" and "H" cannot be selected for the individual SUP/EXH spacer assembly or interface regulator.

SY3000/5000/7000 Series

Electrical Wiring Specifications

Lead wire

34 cores

If alignment is not specified, the internal wiring will be double wiring (connected to SOL. a and SOL. b) regardless of number of stations, valve types, and option types.

Electrical characteristics

Item	Property
Conductor resistance $\Omega/\text{km}, 20^\circ\text{C}$	143 or less
Voltage limit V, 1 minute, AC	2000
Insulation resistance $\text{M}\Omega/\text{km}, 20^\circ\text{C}$	10 or more

* Cannot be used for movable wiring
The minimum bending radius of the cable is 55 mm.

Station	Lead wire no.	Polarity	Printed mark (Both sides)

Positive common Negative common

* For negative common specification, a valve for negative common or a valve without polarity should be used.

Specified Layout

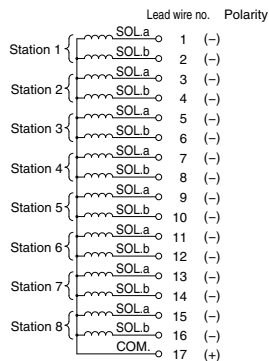

A mixture of single and double wiring can be specified on the manifold specification. The maximum number of stations is determined according to the number of solenoids. The total number of solenoids should be 32 or less. 1 solenoid is required for the 2-position single, and 2 solenoids for the 2-position double, 3-position, and 4-position.

Electrical Wiring Specifications

Lead wire

* Cannot be used for movable wiring
The minimum bending radius of the cable is 45 mm.

Positive common Negative common

* For negative common specification, a valve for negative common or a valve without polarity should be used.

Lead wire color	Printed mark (Both sides)	
	Type	Color
Orange	—	Red Black
Light gray	—	Red Black
White	—	Red Black
Yellow	—	Red Black
Pink	—	Red Black
Orange	--	Red Black
Light gray	--	Red Black
White	--	Red Black
Yellow	--	Red

Electrical characteristics

Item	Property
Conductor resistance $\Omega/\text{km}, 20^\circ\text{C}$	143 or less
Voltage limit V, 1 minute, AC	2000
Insulation resistance $\text{M}\Omega/\text{km}, 20^\circ\text{C}$	10 or more

* Cannot be used for movable wiring
The minimum bending radius of the cable is 40 mm.

Positive common Negative common

Type 11
Bottom Ported

Plug-in Connector Connecting Base

Circular Connector

SY3000/5000/7000 Series

How to Order Manifolds

Refer to pages 569 (SY5000) and 570 (SY7000) for the dimensions of Type 11/Bottom-ported type.

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Type

10	Side ported
11	Bottom ported ¹⁾

*1 The SY5000 manifold base is used for the bottom-ported SY3000. When ordering, refer to the "Plug-in Mixed Mounting Type Manifold" (from page 574).

3 Valve stations

Symbol	Stations	Note
02	2 stations	Double wiring ^{*1}
⋮	⋮	
12	12 stations	
02	2 stations	Specified layout ^{*2} (Up to 24 solenoids available)
⋮	⋮	
24	24 stations	

*1 Double wiring: 2-position single, double, 3-position, and 4-position valves can be used on all manifold stations. Use of a 2-position single solenoid will result in an unused control signal. If this is not desired, order with a specified layout.

*2 Specified layout: Indicate the wiring specifications on the manifold specification sheet. (Note that 2-position double, 3-position, and 4-position valves cannot be used where single wiring has been specified.)

* This also includes the number of the blanking plate assembly.

4 P, E port entry

U	U side (2 to 10 stations)
D	D side (2 to 10 stations)
B	Both sides (2 to 24 stations)

5 SUP/EXH block assembly

Nil	Internal pilot
S	Internal pilot, Built-in silencer
R	External pilot

* 3/5(E) port is plugged for the built-in silencer type.

* When the built-in silencer type is used, keep the exhaust port from coming into direct contact with water or other liquids.

Refer to the page on the right for 6.

How to Order Manifold Assembly

SS5Y3-10M-05D-C6 ... 1 set (Type 10 5-station manifold base part no.)

*SY3100-5U1 3 sets (2-position single part no.)

*SY3200-5U1 1 set (2-position double part no.)

*SY3300-5U1 1 set (3-position closed center part no.)

→ The asterisk denotes the symbol for the assembly. Prefix it to the part numbers of the valve, etc.

- For the valve arrangement, the valve closest to the D side is considered the 1st station.
- Under the manifold part number, state the valves to be mounted in order starting with the 1st station as shown in the figure above. If the arrangement becomes too complicated, specify the details on a manifold specification sheet.

* When mixing top-ported configurations, select from those listed on page 483. In such cases, use caution as there is also output on the A and B ports on the base side. Specify on the manifold specification sheet if plugs are required for the A and B ports on the base side.

7 Mounting and Option

Symbol	Mounting	Option	
		Name plate	Station number
Nil	Direct mounting	—	—
AA		●	●
BA		●	—
D□	DIN rail mounting	—	—
A□		●	●
B□		●	—

* Enter the number of stations inside □ when it is larger than the number of valve stations. (Refer to "DIN Rail Option" below.)

* Only direct mounting is available for the type 11 bottom-ported type.

* Refer to page 708 for the fixation of DIN rail mounting type manifold.

DIN Rail Option

Nil	Standard length
0	Without DIN rail (with bracket)
3	For 3 stations
⋮	⋮
24	For 24 stations

Specify a longer rail than the total length of specified stations.

6 A, B port size (Metric/One-touch fitting)

Symbol	A, B port	Type 10/Side ported			Type 11/Bottom ported			
		SY3000	SY5000	SY7000	SY5000	SY7000

		ø6	●	●	●	—	—	
Elbow ^{*2}	Downward	ø8	—	●	●	—		
		ø10	—	—	●	—		
LM ^{*1}	Elbow port, mixed sizes (Including upward and downward piping)	ø8	●	●	●	—		
		ø10	—	—	—	—		
P, E port size (One-touch fittings)		ø8	ø10	ø12	ø10	ø12		

A, B port size (Inch/One-touch fitting)

Symbol	A, B port	Type 10/Side ported			Type 11/Bottom ported				
		SY3000	SY5000	SY7000	SY5000	SY7000			
N1 N3 N7 N9 N11 CM ^{*1} LN3 LN7 LN9 LN11 BN3 BN7 BN9 BN11 LM ^{*1}	Straight	ø1/8"	●	—	—	—			
		ø5/32"	●	●	—	●		—	
		ø1/4"	●	●	●	●		●	
		ø5/16"	—	●	●	●		●	
		ø3/8"	—	—	●	—		●	
		Straight port, mixed sizes		●	●	●		●	●
		LN3 LN7 LN9 LN11 BN3 BN7 BN9 BN11 LM ^{*1}	Upward	ø5/32"	●	—		—	—
ø1/4"	●			●	—	—	—		
ø5/16"	—			●	—	—	—		
Downward	ø3/8"		—	—	●	—	—		
	ø5/32"		●	●	—	—	—		
	ø1/4"		●	●	—	—	—		
	ø5/16"		—	●	—	—	—		
Elbow ^{*2}	Downward	ø3/8"	—	—	●	—			
		Elbow port, mixed sizes (Including upward and downward piping)		●	●	●		—	
P, E port size (One-touch fittings)		ø5/16"	ø3/8"	ø1/2"	ø3/8"	ø1/2"			

*1 Indicate the sizes on the manifold specification sheet in the case of "CM" or "LM."

The direction of P, E port fittings is the same as for the A, B port. If selecting "LM," indicate it on the manifold specification sheet for the P, E port fitting direction.

*2 To avoid interference with the body or piping, select a downward elbow port when mounting the optional spacer assembly (pages 617 to 619).

SY3000/5000/7000 Series

How to Order Valves (With mounting screw) Refer to page 404 for valve specifications.

• Base mounted

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Type of actuation

		Single
2	2-position	Double
3	3-position	Closed center
4		Exhaust center
5		Pressure center
A ^{*1}	4-position dual 3-port	N.C./N.C.
B ^{*1}		N.O./N.O.
C ^{*1}		N.C./N.O.

*1 Only the rubber seal type is available for the 4-position dual 3-port valve.

3 Seal type

0	Rubber seal
1	Metal seal

4 Pilot type

NII	Internal pilot
R	External pilot

* When selecting the external pilot specification for the 4-position dual 3-port valve, pay attention to the pilot pressure. Refer to the valve specifications on page 404 for further details.

5 Back pressure check valve (Built-in valve type)

NII	None
H	Built-in

* Only the rubber seal type is available. A manifold installed type is available if a back pressure check valve with a metal seal is required. Refer to page 625 for ordering examples. However, it is not recommended to use the built-in valve type and the manifold installed type at the same time because it will reduce the flow.

* The built-in valve type back pressure check valve is not available for the 3-position type or the SY7000.

6 Pilot valve option

NII	Standard (0.7 MPa)
B	Quick response type (0.7 MPa)
K ^{*1}	High pressure type (1.0 MPa)

*1 Only the metal seal type is available for the high pressure type.

7 Coil type

NII	Standard
T	With power saving circuit (Continuous duty type)

* Be sure to select the power saving circuit type if the valve is to be continuously energized for long periods of time.

* Be careful of the energizing time when the power saving circuit is selected. Refer to page 705 for details.

8 Rated voltage

5	24 VDC
6	12 VDC

9 Light/surge voltage suppressor and common specification

Symbol	With light	Surge voltage suppressor	Common specification
NII	—	—	Non-polar
R	—	—	
U	●	—	
S	—	—	
Z	●	●	Positive common
NS	—	—	Negative common
NZ	●	—	

* For the non-polar type, be careful of surge voltage intrusion. Refer to page 706 for details.

* Only "Z" and "NZ" types are available with a power saving circuit.

10 Manual override

* Refer to page 423 for the safety slide locking manual override.

11 Type of mounting screw

NII	Round head combination screw
B	Hexagon socket head cap screw
K	Round head combination screw (Drop prevention type)
H	Hexagon socket head cap screw (Drop prevention type)

* For "K" and "H," the valve body cover has a drop prevention construction to stop the mounting screws from falling out when the valve is removed for maintenance, etc.

* **When ordering a valve individually, the base gasket is not included.**

Since the base gasket is attached to the manifold, please order the base gasket separately if it is needed for maintenance. Refer to page 611 for base gasket and mounting screw part numbers.

* "B" and "H" cannot be selected for the individual SUP/EXH spacer assembly, interface regulator, or double check spacer assembly with residual pressure release valve.

Plug-in Connector Connecting Base

Circular Connector

Type 12
Top Ported

SY3000/5000/7000 Series

How to Order Manifolds

SS5Y **3** - 12M - **05** **U** - - -

① ② ③ ④ ⑤ ⑥

Refer to pages 571 to 573 for the dimensions of Type 12/Top ported type.

① Series

3	SY3000
5	SY5000
7	SY7000

② Valve stations

Symbol	Stations	Note
02	2 stations	Double wiring*1
⋮	⋮	
12	12 stations	
02	2 stations	Specified layout*2 (Up to 24 solenoids available)
⋮	⋮	
24	24 stations	

*1 Double wiring: 2-position single, double, 3-position, and 4-position valves can be used on all manifold stations.

Use of a 2-position single solenoid will result in an unused control signal. If this is not desired, order with a specified layout.

*2 Specified layout: Indicate the wiring specifications on the manifold specification sheet. (Note that 2-position double, 3-position, and 4-position valves cannot be used where single wiring has been specified.)

* This also includes the number of the blanking plate assembly.

③ P, E port entry

U*1	U side (2 to 10 stations)
D*1	D side (2 to 10 stations)
B	Both sides (2 to 24 stations)

*1 ④ For type "S", SUP/EXH block assembly with a built-in silencer, choose U or D for P, E port entry.

④ SUP/EXH block assembly

NII	Internal pilot
S	Internal pilot, Built-in silencer
R	External pilot

* The P and E ports are only available on the U and D sides for the built-in silencer type. 3/5(E) port is plugged. The silencer exhaust port is located on the opposite side of the P and E port entry. (Example: When the P and E port entry is on the D side, the silencer exhaust port is on the U side.)

* When the built-in silencer type is used, keep the exhaust port from coming into direct contact with water or other liquids.

How to Order Manifold Assembly

Example (SS5Y3-12M-□)

SS5Y3-12M-05D 1 set (Type 12 5-station manifold base part no.)

*SY3130-5U1-C6 3 sets (2-position single part no.)

*SY3230-5U1-C6 1 set (2-position double part no.)

*SY3330-5U1-C6 1 set (3-position closed center part no.)

→ The asterisk denotes the symbol for the assembly.

Prefix it to the part numbers of the valve, etc.

- For the valve arrangement, the valve closest to the D side is considered the 1st station.
- Under the manifold part number, state the valves to be mounted in order starting with the 1st station as shown in the figure above. If the arrangement becomes too complicated, specify the details on a manifold specification sheet.

⑤ P, E port size (One-touch fittings)

Symbol	SY3000	SY5000	SY7000
NII	ø8	ø10	ø12
N	ø5/16"	ø3/8"	ø1/2"

* For N, sizes are in inches.

⑥ Mounting

NII	Direct mounting	
D	DIN rail mounting (With DIN rail)	
D0	DIN rail mounting (Without DIN rail)	
D3	For 3 stations	Specify a length longer than that of the standard rail.
D24	For 24 stations	

* Refer to page 708 for the fixation of DIN rail mounting type manifold.

How to Order Valves (With mounting screw)

Refer to page 404 for valve specifications.

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Type of actuation

1	2-position	Single
2		Double
3	3-position	Closed center
4		Exhaust center
5		Pressure center
A ⁻¹	4-position dual 3-port	N.C./N.C.
B ⁻¹		N.O./N.O.
C ⁻¹		N.C./N.O.

*1 Only the rubber seal is available for the 4-position dual 3-port valve.

3 Seal type

0	Rubber seal
1	Metal seal

4 Pilot type

NII	Internal pilot
R	External pilot

* When selecting the external pilot specification for the 4-position dual 3-port valve, pay attention to the pilot pressure. Refer to the valve specifications on page 404 for further details.

5 Back pressure check valve (Built-in valve type)

NII	None
H	Built-in

* Only the rubber seal type is available. A manifold installed type is available if a back pressure check valve with a metal seal is required. Refer to page 625 for ordering examples. However, it is not recommended to use the built-in valve type and the manifold installed type at the same time because it will reduce the flow.

* The built-in valve type back pressure check valve is not available for the 3-position type or the SY7000.

6 Pilot valve option

NII	Standard (0.7 MPa)
B	Quick response type (0.7 MPa)
K ⁻¹	High pressure type (1.0 MPa)

*1 Only the metal seal type is available for the high pressure type.

7 Coil type

NII	Standard
T	With power saving circuit (Continuous duty type)

* Be sure to select the power saving circuit type if the valve is to be continuously energized for long periods of time.
* Be careful of the energizing time when the power saving circuit is selected. Refer to page 705 for details.

8 Rated voltage

5	24 VDC
6	12 VDC

9 Light/surge voltage suppressor and common specification

Symbol	With light	Surge voltage suppressor	Common specification
NII	—	—	Non-polar
R	—	—	
U	●	—	
S	—	●	
Z	●	—	Positive common
NS	—	—	Negative common
NZ	●	—	

* For the non-polar type, be careful of surge voltage intrusion.
Refer to page 706 for details.
* Only "Z" and "NZ" types are available with a power saving circuit.

10 Manual override

* Refer to page 423 for the safety slide locking manual override.

11 A, B port size

Symbol	Port size	Applicable series
M5	M5 x 0.8	SY3000
O1	1/8	SY5000
O2	1/4	SY7000

12 Thread type

NII	Rc
F	G
N	NPT
T	NPTF

* Only NII is available for M5.

13 Type of mounting screw

NII	Round head combination screw
B	Hexagon socket head cap screw
K	Round head combination screw (Falling-out-prevention type)
H	Hexagon socket head cap screw (Falling-out-prevention type)

* For "K" and "H," the valve body cover has a drop prevention construction to stop the mounting screws from falling out when the valve is removed for maintenance, etc.

* **When ordering a valve individually, the base gasket is not included.**

Since the base gasket is attached to the manifold, please order the base gasket separately if it is needed for maintenance. Refer to page 611 for base gasket and mounting screw part numbers.

* "B" and "H" cannot be selected for the individual SUP/EXH spacer assembly or interface regulator.

SY3000/5000/7000 Series

Electrical Wiring Specifications

Circular connector

If alignment is not specified, the internal wiring will be double wiring (connected to SOL. a and SOL. b) regardless of number of stations, valve types, and option types.

Station	SOL. a	SOL. b	Terminal no.	Polarity	Terminal no.	Polarity
Station 1	SOL. a		1	(-)	(+)	
		SOL. b	2	(-)	(+)	
Station 2	SOL. a		3	(-)	(+)	
		SOL. b	4	(-)	(+)	
Station 3	SOL. a		5	(-)	(+)	
		SOL. b	6	(-)	(+)	
Station 4	SOL. a		7	(-)	(+)	
		SOL. b	8	(-)	(+)	
Station 5	SOL. a		9	(-)	(+)	
		SOL. b	10	(-)	(+)	
Station 6	SOL. a		11	(-)	(+)	
		SOL. b	12	(-)	(+)	
Station 7	SOL. a		13	(-)	(+)	
		SOL. b	14	(-)	(+)	
Station 8	SOL. a		15	(-)	(+)	
		SOL. b	16	(-)	(+)	
Station 9	SOL. a		17	(-)	(+)	
		SOL. b	18	(-)	(+)	
Station 10	SOL. a		19	(-)	(+)	
		SOL. b	20	(-)	(+)	
Station 11	SOL. a		21	(-)	(+)	
		SOL. b	22	(-)	(+)	
Station 12	SOL. a		23	(-)	(+)	
		SOL. b	24	(-)	(+)	
	COM.		25	(+)	(-)	
	COM.		26	(+)	(-)	

Positive Negative
common common

* When using a valve with no polarity, either positive common or negative common can be used.

Specified Layout

A mixture of single and double wiring can be specified on the manifold specification sheet. The maximum number of stations is determined according to the number of solenoids. The total number of solenoids should be 24 or less. 1 solenoid is required for the 2-position single, and 2 solenoids for the 2-position double, 3-position, and 4-position.

Cable Assembly

015
AXT100-MC26-030
050

Lead wire color for circular connector cable assembly by terminal number

Terminal no.	Lead wire color	Dot marking
1	Black	None
2	Brown	None
3	Red	None
4	Orange	None
5	Yellow	None
6	Pink	None
7	Blue	None
8	Purple	White
9	Gray	Black
10	White	Black
11	White	Red
12	Yellow	Red
13	Orange	Red
14	Yellow	Black
15	Pink	Black
16	Blue	White
17	Purple	None
18	Gray	None
19	Orange	Black
20	Red	White
21	Brown	White
22	Pink	Red
23	Gray	Red
24	Black	White
25	White	None
26	White	None

* Terminal no. 25 is connected to 25 inside the connector.

Electrical characteristics

Item	Property
Conductor resistance Ω/km , 20°C	65 or less
Voltage limit V, 1 minute, AC	1000
Insulation resistance $\text{M}\Omega/\text{km}$, 20°C	5 or more

Circular connector cable assembly

Cable length (L)	Assembly part no.
	26 pins
1.5 m	AXT100-MC26-015
3 m	AXT100-MC26-030
5 m	AXT100-MC26-050

* Cannot be used for movable wiring
* Lengths other than the above is also available. Please contact SMC for details.

* The minimum bending radius of the circular connector cable is 20 mm.

Type 10
Side Ported

Type 11
Bottom Ported

Plug-in Connector Connecting Base

EX500 Gateway Decentralized System 2 (128 Points)

SY3000/5000/7000 Series

How to Order Manifolds

Refer to pages 569 (SY5000) and 570 (SY7000) for the dimensions of Type 11/Bottom-ported type.

1 Series

3	SY3000
5	SY5000
7	SY7000

* For mixed mounting, refer to page 574 and later.

2 Type

10	Side ported
11	Bottom ported*1

*1 The SY5000 manifold base is used for the bottom-ported SY3000. When ordering, refer to the "Plug-in Mixed Mounting Type Manifold" (from page 574).

* When mixing top-ported configurations, select from those listed on page 499. In such cases, use caution as there is also output on the A and B ports on the base side. Specify on the manifold specification sheet if plugs are required for the A and B ports on the base side.

3 SI unit (Number of outputs, Output polarity, Max. number of valve stations)

0	Without SI unit
A3N	32 outputs*1*4, 2 to 16 stations (24 stations*3), Negative common*2

- *1 16 outputs can be set by switching the built-in setting switch.
- *2 Ensure a match with the common specification of the valve.
- *3 (): Maximum number of stations for mixed single and double wiring
- *4 When using the SI unit with 32 outputs, use the GW unit compatible with the EX500 Gateway Decentralized System 2 (128 points).

4 Valve stations

Valve stations	Note
02	2 stations
⋮	⋮
16	16 stations
02	2 stations
⋮	⋮
24	24 stations

- *1 Double wiring: 2-position single, double, 3-position, and 4-position valves can be used on all manifold stations. Use of a 2-position single solenoid will result in an unused control signal. If this is not desired, order with a specified layout.
- *2 Specified layout: Indicate the wiring specifications on the manifold specification sheet. (Note that 2-position double, 3-position, and 4-position valves cannot be used where single wiring has been specified.)
- * When the product without the SI unit (S0) is selected, note the maximum number of solenoids of the SI unit that will be mounted. If the layout is specified, indicate it on the manifold specification sheet.
- * This also includes the number of the blanking plate assembly.

How to Order Manifold Assembly

Example

SS5Y3-10SA3N-05D-C6--1 set (Manifold base part number)
 * SY3200-SU1 5 sets (2-position double part number)
 The asterisk denotes the symbol for the assembly.
 Prefix it to the part numbers of the valve, etc.

- For the valve arrangement, the valve closest to the D side is considered the 1st station.
- Under the manifold base part number, state the valves to be mounted in order starting with the 1st station as shown in the figure above. If the arrangement becomes too complicated, specify the details on a manifold specification sheet.

5 P, E port entry

U	U side (2 to 10 stations)
D	D side (2 to 10 stations)
B	Both sides (2 to 24 stations)

6 SUP/EXH block assembly

Nii	Internal pilot
S	Internal pilot, Built-in silencer*1*2
R	External pilot

- *1 3/5(E) port is plugged for the built-in silencer type.
- *2 When built-in silencer type is used, keep the exhaust port from coming into direct contact with water or other liquids.

* A separate GW unit and communication cable are required.

For details on the EX500 Gateway Type Serial Transmission System, refer to the **Web Catalog** and the **Operation Manual**. For the part numbers of the SI units to be mounted, refer to page 597. Please download the **Operation Manual** via the SMC website, <https://www.smccworld.com>

7 A, B port size (Metric/One-touch fitting)

	A, B port	Type 10/Side ported			Type 11/Bottom ported		
		SY3000	SY5000	SY7000	SY5000	SY7000	
C2 C3 C4 C6 C8 C10 C12	Straight	ø2	●	—	—	—

		ø8	—	●	●	—	
		ø10	—	—	●	—	
		ø12	—	—	●	—	
		Mixed sizes		●	●	●	—
		P, E port ^{*3}		ø8	ø10	ø12	ø10

A, B port size (Inch/One-touch fitting)

	A, B port	Type 10/Side ported			Type 11/Bottom ported		
		SY3000	SY5000	SY7000	SY5000	SY7000	
N1 N3 N7 N9 N11	Straight	ø1/8"	●	—	—	—	
		ø5/32"	●	●	—	●	
		ø1/4"	●	●	●	●	
		ø5/16"	—	●	●	●	
		ø3/8"	—	—	●	●	
		Mixed sizes	●	●	●	●	
LN3 LN7 LN9 LN11 BN3 BN7 BN9 BN11 LM^{*1}	Upward	ø5/32"	●	—	—	—	
		ø1/4"	●	●	—	—	
		ø5/16"	—	●	—	—	
		ø3/8"	—	—	●	—	
		ø5/32"	●	—	—	—	
		ø1/4"	●	●	—	—	
	Downward	ø5/16"	—	●	—	—	
		ø3/8"	—	—	●	—	
		Mixed sizes	●	●	●	—	
	P, E port ^{*3}		ø5/16"	ø3/8"	ø1/2"	ø3/8"	ø1/2"

*1 Indicate the sizes on the manifold specification sheet.

*2 To avoid interference with the body or piping, select a downward elbow port when mounting the optional spacer assembly (pages 617 to 619).

*3 The direction of P, E port fittings is the same as for the A, B port. If selecting "LM," indicate it on the manifold specification sheet for the P, E port fitting direction.

8 Mounting and Option

	Mounting	Option	
		Name plate	Station number
Nii	Direct mounting	—	—
AA		●	●
BA		●	—
D ^{*1}	DIN rail mounting	—	—
A ^{*1}		●	●
B ^{*1}		●	—

*1 Refer to "DIN Rail Option" below.

* Select the direct mounting type for Type 11 (Bottom ported).

DIN Rail Option

Nii	With DIN bracket, DIN rail with standard length
0	With DIN bracket, without DIN rail
3 ^{*1}	With DIN bracket, DIN rail for 3 stations
⋮	⋮
24 ^{*1}	With DIN bracket, DIN rail for 24 stations

*1 Specify a longer rail than the length of valve stations.

* If the DIN rail must be mounted without an SI unit, select "D0" and order the DIN rail separately. Refer to L3 of the dimensions for the DIN rail length. Refer to page 616 for the DIN rail part number.

* Refer to page 708 for the fixation of DIN rail mounting type manifold.

SY3000/5000/7000 Series

How to Order Valves (With mounting screw) Refer to page 404 for valve specifications.

 11

• Base mounted

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Type of actuation

1	2-position	Single
2		Double
3	3-position	Closed center
4		Exhaust center
5		Pressure center
A ^{*1}	4-position dual 3-port valve	N.C./N.C.
B ^{*1}		N.O./N.O.
C ^{*1}		N.C./N.O.

*1 Select the rubber seal type for the 4-position dual 3-port valve.

3 Seal type

0	Rubber seal
1	Metal seal

4 Pilot type

Nii	Internal pilot
R	External pilot

* When selecting the external pilot specification for the 4-position dual 3-port valve, pay attention to the pilot pressure. Refer to the valve specifications on page 404 for further details.

5 Back pressure check valve

Nii	None
H ^{*1}	Built-in

*1 Select the rubber seal type when the back pressure check valve is built-in. A manifold installed type is available if a back pressure check valve with a metal seal is required. Refer to page 625 for ordering examples. However, it is not recommended to use the built-in valve type and the manifold installed type at the same time because it will reduce the flow.

* Select "Nii" for the 3-position type or the SY7000.

6 Pilot valve option

Nii	Standard (0.7 MPa)
B	Quick response type (0.7 MPa)
K ^{*1}	High pressure type (1.0 MPa)

*1 Select the metal seal type for the high pressure type.

7 Coil type

Nii	Standard
T	With power saving circuit (Continuous duty type) ^{*1*2}

*1 Be sure to select the power saving circuit type if the valve is to be continuously energized for long periods of time.

*2 Be careful of the energizing time when the power saving circuit is selected. For details, refer to page 705.

8 Rated voltage

5	24 VDC
----------	--------

9 Light/surge voltage suppressor and common specification

	With light	Surge voltage suppressor	Common specification
R	—	●	Non-polar
U	●		
NS	—		Negative common
NZ	●		

* Select "NZ" for models with a power saving circuit.

10 Manual override

* Refer to page 423 for the safety slide locking manual override.

11 Type of mounting screw

Nii	Round head combination screw
B	Hexagon socket head cap screw
K	Round head combination screw (Drop prevention type) ^{*1}
H	Hexagon socket head cap screw (Drop prevention type) ^{*1}

*1 For "K" and "H," the valve body cover has a drop prevention construction to stop the mounting screws from falling out when the valve is removed for maintenance, etc.

* **When ordering a valve individually, the base gasket is not included.** Since the base gasket is attached to the manifold, please order the base gasket separately if it is needed for maintenance. Refer to page 611 for base gasket and mounting screw part numbers.

* Select "Nii" or "K" for the optional individual SUP/EXH spacer assembly, interface regulator, or double check spacer assembly with residual pressure release valve.

3	SY3000
5	SY5000
7	SY7000

* For mixed mounting, refer to page 574 and later.

2 SI unit (Number of outputs, Output polarity, Max. number of valve stations)

0	Without SI unit
A3N	32 outputs ^{*1,4} , 2 to 16 stations (24 stations ^{*3}), Negative common ^{*2}

- *1 16 outputs can be set by switching the built-in setting switch.
- *2 Ensure a match with the common specification of the valve.
- *3 () : Maximum number of stations for mixed single and double wiring
- *4 When using the SI unit with 32 outputs, use the GW unit compatible with the EX500 Gateway Decentralized System 2 (128 points).

3 Valve stations

Stations	Note
02 2 stations	Double wiring ^{*1}
⋮	
16 16 stations	
02 2 stations	Specified layout ^{*2} (Up to 32 solenoids available)
⋮	
24 24 stations	

- *1 Double wiring: 2-position single, double, 3-position, and 4-position valves can be used on all manifold stations. Use of a 2-position single solenoid will result in an unused control signal. If this is not desired, order with a specified layout.
- *2 Specified layout: Indicate the wiring specifications on the manifold specification sheet. (Note that 2-position double, 3-position, and 4-position valves cannot be used where single wiring has been specified.)
- * When the product without the SI unit (S0) is selected, note the maximum number of solenoids of the SI unit that will be mounted. If the layout is specified, indicate it on the manifold specification sheet.
- * This also includes the number of the blanking plate assembly.

4 P, E port entry

U ^{*1}	U side (2 to 10 stations)
D ^{*1}	D side (2 to 10 stations)
B	Both sides (2 to 24 stations)

*1 For type "S", SUP/EXH block assembly with a built-in silencer, choose U or D for P, E port entry.

5 SUP/EXH block assembly

Nil	Internal pilot
S ^{*1}	Internal pilot, Built-in silencer ^{*2}
R	External pilot

- *1 For type "S", SUP/EXH block assembly with a built-in silencer, choose U or D for P, E port entry. 3/5(E) port is plugged. The silencer exhaust port is located on the opposite side of the P and E port entry. (Example: When the P and E port entry is on the D side, the silencer exhaust port is on the U side.)
- *2 When the built-in silencer type is used, keep the exhaust port from coming into direct contact with water or other liquids.

How to Order Manifold Assembly

Example

SS5Y3-12SA3N-05D 1 set (Manifold base part number)
 * SY3230-SU1-C6 5 sets (2-position double part number)
 The asterisk denotes the symbol for the assembly.
 Prefix it to the part numbers of the valve, etc.

- * For the valve arrangement, the valve closest to the D side is considered the 1st station.
- * Under the manifold base part number, state the valves to be mounted in order starting with the 1st station as shown in the figure above. If the arrangement becomes too complicated, specify the details on a manifold specification sheet.

6 P, E port size (One-touch fittings)

	SY3000	SY5000	SY7000
Nil	ø8	ø10	ø12
N ^{*1}	ø5/16"	ø3/8"	ø1/2"

*1 For N, sizes are in inches.

7 Mounting

Nil	Direct mounting
D	With DIN bracket, DIN rail with standard length
D0	With DIN bracket, without DIN rail
D3 ^{*1}	With DIN bracket, DIN rail for 3 stations
⋮	⋮
D24 ^{*1}	With DIN bracket, DIN rail for 24 stations

- *1 Specify a longer rail than the length of valve stations.
- * If the DIN rail must be mounted without an SI unit, select "D0." Then, refer to L3 of the dimensions for the DIN rail length and order separately. Refer to page 616 for the DIN rail part number.
- * Refer to page 708 for the fixation of DIN rail mounting type manifold.

* A separate GW unit and communication cable are required.

For details on the EX500 Gateway Type Serial Transmission System, refer to the **Web Catalog** and the Operation Manual. For the part numbers of the SI units to be mounted, refer to page 597. Please download the Operation Manual via the SMC website, <https://www.smcworld.com>

How to Order Valves (With mounting screw)

Refer to page 404 for valve specifications.

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Type of actuation

1	2-position	Single
2		Double
3	3-position	Closed center
4		Exhaust center
5		Pressure center
A ⁻¹	4-position dual 3-port valve	N.C./N.C.
B ⁻¹		N.O./N.O.
C ⁻¹		N.C./N.O.

*1 Select the rubber seal type for the 4-position dual 3-port valve.

3 Seal type

0	Rubber seal
1	Metal seal

4 Pilot type

Nil	Internal pilot
R	External pilot

* When selecting the external pilot specification for the 4-position dual 3-port valve, pay attention to the pilot pressure. Refer to the valve specifications on page 404 for further details.

5 Back pressure check valve (Built-in valve type)

Nil	None
H ⁻¹	Built-in

*1 Select the rubber seal type when the back pressure check valve is built-in. A manifold installed type is available if a back pressure check valve with a metal seal is required. Refer to page 625 for ordering examples.

However, it is not recommended to use the built-in valve type and the manifold installed type at the same time because it will reduce the flow.

* Select "Nil" for the 3-position type or the SY7000.

6 Pilot valve option

Nil	Standard (0.7 MPa)
B	Quick response type (0.7 MPa)
K ⁻¹	High pressure type (1.0 MPa)

*1 Select the metal seal type for the high pressure type.

7 Coil type

Nil	Standard
T	With power saving circuit (Continuous duty type) ¹⁺²

*1 Be sure to select the power saving circuit type if the valve is to be continuously energized for long periods of time.

*2 Be careful of the energizing time when the power saving circuit is selected. Refer to page 705 for details.

8 Rated voltage

5	24 VDC
---	--------

9 Light/surge voltage suppressor and common specification

	With light	Surge voltage suppressor	Common specification
R	—	●	Non-polar
U	●		
NS	—		
NZ	●		

* Select "NZ" for models with a power saving circuit.

10 Manual override

* Refer to page 423 for the safety slide locking manual override.

11 A, B port size

Thread piping	Port size	SY3000	SY5000	SY7000
M5	M5 x 0.8	●	—	—
O1	1/8	—	●	—
O2	1/4	—	—	●

One-touch fitting (Metric)

A, B port	SY3000	SY5000	SY7000
C2	ø2	●	—
C3	ø3.2	●	—
C4	ø4	●	●
C6	ø6	●	●
C8	ø8	—	●

N1	ø1/8"	●	—
N3	ø5/32"	●	●
N7	ø1/4"	●	●
N9	ø5/16"	—	●
N11	ø3/8"	—	●

12 A, B port thread type

Nil	Rc
F	G
N	NPT
T	NPTF

* Select "Nil" for M5.

13 Type of mounting screw

Nil	Round head combination screw
B	Hexagon socket head cap screw
K	Round head combination screw (Drop prevention type ¹)
H	Hexagon socket head cap screw (Drop prevention type ¹)

*1 For "K" and "H," the valve body cover has a drop prevention construction to stop the mounting screws from falling out when the valve is removed for maintenance, etc.

* **When ordering a valve individually, the base gasket is not included.**

Since the base gasket is attached to the manifold, please order the base gasket separately if it is needed for maintenance. Refer to page 611 for base gasket and mounting screw part numbers.

* Select "Nil" or "K" for the optional individual SUP/EXH spacer assembly or interface regulator.

Type 10
Side Ported

Type 11
Bottom Ported

Plug-in Connector Connecting Base

EX600

RoHS

SY3000/5000/7000 Series

How to Order Manifolds

Refer to pages 569 (SY5000) and 570 (SY7000) for the dimensions of Type 11/Bottom-ported type.

① Series

3	SY3000
5	SY5000
7	SY7000

② Type

10	Side ported
11	Bottom ported* ¹

*1 The SY5000 manifold base is used for the bottom-ported SY3000. When ordering, refer to the "Plug-in Mixed Mounting Type Manifold" (from page 574).

③ SI unit

0	Without SI unit
Q	DeviceNet®
N	PROFIBUS DP
V	CC-Link
EA	EtherNet/IP™
EB	EtherNet/IP™ (IO-Link unit)
DA	EtherCAT (IO-Link unit)
F	PROFINET
FA	PROFINET (IO-Link unit)
WE	EtherNet/IP™ compatible wireless base* ¹
WF	PROFINET compatible wireless base* ¹
WS	Wireless remote* ¹

*1 The wireless system is suitable for use only in a country where it is in accordance with the Radio Act and regulations of that country.
* I/O unit cannot be mounted without SI unit.
* Valve plate which connects manifold and SI unit is included, but it is not mounted to a valve without SI unit. For mounting, refer to the EX600 series in the **Web Catalog**.

④ SI unit output polarity, end plate type

SI unit output polarity	M12 power supply connector B-coded (EX600-ED2)	7/8 inch power supply connector (EX600-ED3)	M12 power supply connector IN/OUT, A-coded	
			Pin arrangement 1 (EX600-ED4)	Pin arrangement 2 (EX600-ED5)
Without SI unit	Nil			
SI unit positive common	2	3	6	8
SI unit negative common	4	5	7	9

* Ensure a match with the common specification of the valve to be used.
* When not selecting an SI unit, the symbol will be "nil."

⑤ I/O unit stations

Nil	None
1	1 station
:	:
9	9 stations

* When not selecting an SI unit, the symbol will be "nil."
* SI unit is not included in I/O unit stations.
* When I/O unit is selected, it is shipped separately, and assembled by users. Refer to the attached operation manual for mounting.

⑥ Valve stations

Symbol	Stations	Note
02	2 stations	Double wiring* ¹
:	:	
16	16 stations	
02	2 stations	Specified layout* ² (Up to 32 solenoids available)
:	:	
24	24 stations	

*1 Double wiring: 2-position single, double, 3-position, and 4-position valves can be used on all manifold stations.
Use of a 2-position single solenoid will result in an unused control signal. If this is not desired, order with a specified layout.
*2 Specified layout: Indicate the wiring specifications on the manifold specification sheet. (Note that 2-position double, 3-position, and 4-position valves cannot be used where single wiring has been specified.)
* This also includes the number of the blanking plate assembly.

⑨ Mounting and Option

Symbol	Mounting	Option	
		Name plate	Station number
Nil	Direct mounting	—	—
AA		●	●
BA		●	—
D□	DIN rail mounting	—	—
A□		—	●
B□		●	—
		●	—

* Enter the number of stations inside □ when it is larger than the number of valve stations. (Refer to "DIN Rail Option" below.)
* Only direct mounting is available for the type 11 bottom-ported type.
* Refer to page 708 for the fixation of DIN rail mounting type manifold.

DIN Rail Option

Nil	Standard length	
0	Without DIN rail (with bracket)	
3	For 3 stations	Specify a longer rail than the total length of specified stations.
:	:	
24	For 24 stations	

* If the DIN rail must be mounted without an SI unit, select D0. Then, refer to L3 of the dimensions for the DIN rail length and order separately. (Refer to page 616 for the DIN rail part number.)

⑦ P, E port entry, SUP/EXH block assembly

P, E port entry	Internal pilot	Internal pilot, Built-in silencer	External pilot
U side (2 to 10 stations)	U	C	G
D side (2 to 10 stations)	D	E	H
Both sides (2 to 24 stations)	B	F	J

* 3/5(E) port is plugged for the built-in silencer type.
* When the built-in silencer type is used, keep the exhaust port from coming into direct contact with water or other liquids.

Refer to the page on the right for ⑧.

For details on the EX600 Integrated Type (For Input/Output) Serial Transmission System, refer to the **Web Catalog** and the Operation Manual. For the part numbers of the SI units to be mounted, refer to page 600. (IP40 specifications may be required according to the I/O unit to be selected.) Please download the Operation Manual via the SMC website, <https://www.smccworld.com>

8 A, B port size (Metric/One-touch fitting)

Symbol	A, B port	Type 10/Side ported			Type 11/Bottom ported	
		SY3000	SY5000	SY7000	SY5000	SY7000
C2 C3 C4 C6 C8 C10 C12	Straight	ø2	●	—	—	—
		ø3.2	●	—	—	—
		ø4	●	●	—	—
		ø6	●	●	●	●
		ø8	—	—	●	●
		ø10	—	—	●	●
C12	ø12	—	—	●	●	
CM ^{*1}	Straight port, mixed sizes	●	●	●	●

How to Order Manifold Assembly

Example (SS5Y3-10S6□-□)

SS5Y3-10S6Q72-05B-C6... 1 set (Type 10 5-station manifold base part no.)
 *SY3100-5U1 3 sets (2-position single part no.)
 *SY3200-5U1 2 sets (2-position double part no.)
 *EX600-DXPD 1 set I/O unit part number (Station 1)
 *EX600-DYPB 1 set I/O unit part number (Station 2)

The asterisk denotes the symbol for the assembly.
 Prefix it to the part numbers of the valve, etc.

- For the valve arrangement, the valve closest to the D side is considered the 1st station.
- Under the manifold part number, state the valves to be mounted, then the I/O units in order starting with the 1st station as shown in the figure above. If the arrangement becomes too complicated, specify the details on a manifold specification sheet.

- *1 Do not enter the SI unit part number and the end plate part number together.
- * When mixing top-porting configurations, select from those listed on page 513. In such cases, use caution as there is also output on the A and B ports on the base side. Specify on the manifold specification sheet if plugs are required for the A and B ports on the base side.

SY3000/5000/7000 Series

How to Order Valves (With mounting screw) Refer to page 404 for valve specifications.

• Base mounted

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Type of actuation

1	2-position	Single
2		Double
3	3-position	Closed center
4		Exhaust center
5		Pressure center
A ^{*1}	4-position dual 3-port	N.C./N.C.
B ^{*1}		N.O./N.O.
C ^{*1}		N.C./N.O.

*1 Only the rubber seal type is available for the 4-position dual 3-port valve.

3 Seal type

0	Rubber seal
1	Metal seal

4 Pilot type

NII	Internal pilot
R	External pilot

* When selecting the external pilot specification for the 4-position dual 3-port valve, pay attention to the pilot pressure. Refer to the valve specifications on page 404 for further details.

5 Back pressure check valve (Built-in valve type)

NII	None
H	Built-in

* Only the rubber seal type is available. A manifold installed type is available if a back pressure check valve with a metal seal is required. Refer to page 625 for ordering examples. However, it is not recommended to use the built-in valve type and the manifold installed type at the same time because it will reduce the flow.

* The built-in valve type back pressure check valve is not available for the 3-position type or the SY7000.

6 Pilot valve option

NII	Standard (0.7 MPa)
B	Quick response type (0.7 MPa)
K ^{*1}	High pressure type (1.0 MPa)

*1 Only the metal seal type is available for the high pressure type.

7 Coil type

NII	Standard
T	With power saving circuit (Continuous duty type)

* Be sure to select the power saving circuit type if the valve is to be continuously energized for long periods of time.
* Be careful of the energizing time when the power saving circuit is selected. Refer to page 705 for details.

8 Rated voltage

5	24 VDC
---	--------

9 Light/surge voltage suppressor and common specification

Symbol	With light	Surge voltage suppressor	Common specification
R	—	●	Non-polar
U	●		
S	—		
Z	●		Positive common
NS	—		Negative common
NZ	●		

* Select "R," "U," "S," or "Z" for the valve when the SI unit output polarity is positive common. Select "R," "U," "NS," or "NZ" for the valve when the SI unit output polarity is negative common.

* Only "Z" and "NZ" types are available with a power saving circuit.

10 Manual override

* Refer to page 423 for the safety slide locking manual override.

11 Type of mounting screw

NII	Round head combination screw
B	Hexagon socket head cap screw
K	Round head combination screw (Drop prevention type)
H	Hexagon socket head cap screw (Drop prevention type)

* For "K" and "H," the valve body cover has a drop prevention construction to stop the mounting screws from falling out when the valve is removed for maintenance, etc.

* **When ordering a valve individually, the base gasket is not included.**

Since the base gasket is attached to the manifold, please order the base gasket separately if it is needed for maintenance. Refer to page 611 for base gasket and mounting screw part numbers.

* "B" and "H" cannot be selected for the individual SUP/EXH spacer assembly, interface regulator, or double check spacer assembly with residual pressure release valve.

SY3000/5000/7000 Series

How to Order Manifolds

Refer to pages 571 to 573 for the dimensions of Type 12/Top ported type.

1 Series

3	SY3000
5	SY5000
7	SY7000

3 SI unit output polarity, end plate type

SI unit output polarity	M12 power supply connector B-coded (EX600-ED2)	7/8 inch power supply connector (EX600-ED3)	M12 power supply connector IN/OUT, A-coded	
			Pin arrangement 1 (EX600-ED4)	Pin arrangement 2 (EX600-ED5)
Without SI unit	Nil			
SI unit positive common	2	3	6	8
SI unit negative common	4	5	7	9

- * When not selecting an SI unit, the symbol will be "nil."
- * Ensure a match with the common specification of the valve to be used.

5 Valve stations

Symbol	Stations	Note
02	2 stations	Double wiring*1
:	:	
16	16 stations	Specified layout*2 (Up to 32 solenoids available)
02	2 stations	
:	:	
24	24 stations	

- *1 Double wiring: 2-position single, double, 3-position, and 4-position valves can be used on all manifold stations. Use of a 2-position single solenoid will result in an unused control signal. If this is not desired, order with a specified layout.
- *2 Specified layout: Indicate the wiring specifications on the manifold specification sheet. (Note that 2-position double, 3-position, and 4-position valves cannot be used where single wiring has been specified.)
- * This also includes the number of the blanking plate assembly.

2 SI unit

0	Without SI unit
Q	DeviceNet® (Version A)
N	PROFIBUS DP (Version A)
V	CC-Link
EA	EtherNet/IP™ (2 ports)
F	PROFINET
FA	PROFINET (IO-Link unit)
WE	EtherNet/IP™ compatible wireless base*1
WF	PROFINET compatible wireless base*1
WS	Wireless remote*1

- *1 The wireless system is suitable for use only in a country where it is in accordance with the Radio Act and regulations of that country.
- * I/O unit cannot be mounted without SI unit.
- * Valve plate which connects manifold and SI unit is included, but it is not mounted to a valve without SI unit. For mounting, refer to the EX600 series in the **Web Catalog**.

4 I/O unit stations

Nil	None
1	1 station
:	:
9	9 stations

- * When not selecting an SI unit, the symbol will be "nil."
- * SI unit is not included in I/O unit stations.
- * When I/O unit is selected, it is shipped separately, and assembled by users. Refer to the attached operation manual for mounting.

6 P, E port entry, SUP/EXH block assembly

P, E port entry	Internal pilot	Internal pilot, Built-in silencer	External pilot
U side (2 to 10 stations)	U	C-1	G
D side (2 to 10 stations)	D	E-1	H
Both sides (2 to 24 stations)	B	—	J

- *1 For SUP/EXH block assembly specifications, built-in silencer types will have P port entry stipulated.
- * The P and E ports are only available on the U and D sides for the built-in silencer type. 3/5(E) port is plugged. The silencer exhaust port is located on the opposite side of the P and E port entry. (Example: When the P and E port entry is on the D side, the silencer exhaust port is on the U side.)
- * When the built-in silencer type is used, keep the exhaust port from coming into direct contact with water or other liquids.

7 P, E port size (One-touch fittings)

Symbol	SY3000	SY5000	SY7000
Nil	ø8	ø10	ø12
N	ø5/16"	ø3/8"	ø1/2"

- * For N, sizes are in inches.

8 Mounting

Nil	Direct mounting
D	DIN rail mounting (With DIN rail)
D0	DIN rail mounting (Without DIN rail)
D3	For 3 stations
:	:
D24	For 24 stations

- * If the DIN rail must be mounted without an SI unit, select D0. Then, refer to L3 of the dimensions for the DIN rail length and order separately. (Refer to page 616 for the DIN rail part number.)
- * Refer to page 708 for the fixation of DIN rail mounting type manifold.

How to Order Manifold Assembly

Example (SS5Y3-12S6□-□)

SS5Y3-12S6Q72-05B 1 set (Type 12-5-station manifold base part no.)
 *SY3130-5U1-C6 3 sets (2-position single part no.)
 *SY3230-5U1-C6 2 sets (2-position double part no.)
 *EX600-DXP 1 set I/O unit part number (Station 1)
 *EX600-DYP 1 set I/O unit part number (Station 2)

The asterisk denotes the symbol for the assembly.
 Prefix it to the part numbers of the valve, etc.

- * For the valve arrangement, the valve closest to the D side is considered the 1st station.
- * Under the manifold part number, state the valves to be mounted, then the I/O units in order starting with the 1st station as shown in the figure above. If the arrangement becomes too complicated, specify the details on a manifold specification sheet.
- *1 Do not enter the SI unit part number and the end plate part number together.

For details on the EX600 Integrated Type (For Input/Output) Serial Transmission System, refer to the **Web Catalog** and the Operation Manual. For the part numbers of the SI units to be mounted, refer to page 600. (IP40 specifications may be required according to the I/O unit to be selected.) Please download the Operation Manual via the SMC website, <https://www.smcworld.com>

How to Order Valves (With mounting screw)

Refer to page 404 for valve specifications.

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Type of actuation

1	2-position	Single
2		Double
3	3-position	Closed center
4		Exhaust center
5		Pressure center
A ^{*1}	4-position dual 3-port	N.C./N.C.
B ^{*1}		N.O./N.O.
C ^{*1}		N.C./N.O.

*1 Only the rubber seal type is available for the 4-position dual 3-port valve.

3 Seal type

0	Rubber seal
1	Metal seal

4 Pilot type

Nii	Internal pilot
R	External pilot

* When selecting the external pilot specification for the 4-position dual 3-port valve, pay attention to the pilot pressure. Refer to the valve specifications on page 404 for further details.

5 Back pressure check valve

Nii	None
H	Built-in

* Only the rubber seal type is available. A manifold installed type is available if a back pressure check valve with a metal seal is required. Refer to page 625 for ordering examples. However, it is not recommended to use the built-in valve type and the manifold installed type at the same time because it will reduce the flow.

* The built-in valve type back pressure check valve is not available for the 3-position type or the SY7000.

6 Pilot valve option

Nii	Standard (0.7 MPa)
B	Quick response type (0.7 MPa)
K ^{*1}	High pressure type (1.0 MPa)

*1 Only the metal seal type is available for the high pressure type.

7 Coil type

Nii	Standard
T	With power saving circuit (Continuous duty type)

* Be sure to select the power saving circuit type if the valve is to be continuously energized for long periods of time.
* Be careful of the energizing time when the power saving circuit is selected. Refer to page 705 for details.

8 Rated voltage

5	24 VDC
---	--------

9 Light/surge voltage suppressor and common specification

Symbol	With light	Surge voltage suppressor	Common specification
R	—	●	Non-polar
U	●		Positive common
S	—		Negative common
Z	●		
NS	—		
NZ	●		

* Select "R," "U," "S," or "Z" for the valve when the SI unit output polarity is positive common. Select "R," "U," "NS," or "NZ" for the valve when the SI unit output polarity is negative common.

* Only "Z" and "NZ" types are available with a power saving circuit.

10 Manual override

* Refer to page 423 for the safety slide locking manual override.

11 A, B port size

Thread piping

Symbol	Port size	Applicable series
M5	M5 x 0.8	SY3000
O1	1/8	SY5000
O2	1/4	SY7000

One-touch fitting (Metric)

Symbol	A, B port	SY3000	SY5000	SY7000
C2	ø2	●	—	—
C3	ø3.2	●	—	—
C4	ø4	●	—	—
C6	ø6	●	●	●
C8	ø8	—	●	●
C10	ø10	—	—	●
C12	ø12	—	—	●

One-touch fitting (Inch)

Symbol	A, B port	SY3000	SY5000	SY7000
N1	ø1/8"	●	—	—
N3	ø5/32"	●	●	—
N7	ø1/4"	—	●	●
N9	ø5/16"	—	●	●
N11	ø3/8"	—	—	●

12 Thread type

Nii	Rc
F	G
N	NPT
T	NPTF

* Only Nii is available for M5.

13 Type of mounting screw

Nii	Round head combination screw
B	Hexagon socket head cap screw
K	Round head combination screw (Drop prevention type)
H	Hexagon socket head cap screw (Drop prevention type)

* For "K" and "H," the valve body cover has a drop prevention construction to stop the mounting screws from falling out when the valve is removed for maintenance, etc.

* **When ordering a valve individually, the base gasket is not included.**

Since the base gasket is attached to the manifold, please order the base gasket separately if it is needed for maintenance. Refer to page 611 for base gasket and mounting screw part numbers.

* "B" and "H" cannot be selected for the individual SUP/EXH spacer assembly or interface regulator.

Type 10
Side Ported

Type 11
Bottom Ported

Plug-in Connector Connecting Base

EX245

SY3000/5000/7000 Series

How to Order Manifold

Side Ported/Bottom Ported

SS5Y 3 - 10 S AAN - 05 D - C6

Refer to pages 569 (SY5000) and 570 (SY7000) for the dimensions of Type 11/Bottom-ported type.

Only direct mounting is selectable for the manifold.

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Type

10	Side ported
11*1	Bottom ported

*1: The SY5000 manifold base is used for the bottom-ported SY3000. When ordering, refer to the "Plug-in Mixed Mounting Type Manifold" (from page 574).

5 Number of I/O modules

Nii	Without I/O module (Without SI Unit)
1	1 station
⋮	⋮
8	8 stations

6 Valve stations (In the case of the 32-output SI Unit)

Symbol	Stations	Note
02	2 stations	Double wiring*1
⋮	⋮	
16	16 stations	
02	2 stations	Specified layout*2 (Available up to 32 solenoids)
⋮	⋮	
24	24 stations	

*1: Double wiring: 2-position single, double, 3-position and 4-position valves can be used on all manifold stations. Use of a 2-position single solenoid will result in an unused control signal. If this is not desired, order with a specified layout.

*2: Specified layout: Indicate the wiring specifications on the manifold specification sheet. (Note that 2-position double, 3-position and 4-position valves cannot be used where single wiring has been specified.)

*3: This also includes the number of blanking plate assembly.

7 P, E port entry

U	U side (2 to 10 stations)
D	D side (2 to 10 stations)
B	Both sides (2 to 24 stations)

8 SUP/EXH block assembly

Nii	Internal pilot
S	Internal pilot, Built-in silencer
R	External pilot

*3: 5(E) port is plugged for the built-in silencer type.

*4: When the built-in silencer type is used, keep the exhaust port from coming in direct contact with water or other liquids.

For details about the EX245 Integrated-type (For Input/Output) Serial Transmission System, refer to the **Web Catalog** and the **Operation Manual**. For details about part numbers of SI Units to be mounted, refer to pages 602 and 603. Please download the **Operation Manual** via SMC website, <https://www.smcworld.com>

3 SI Unit specifications

Symbol (output polarity) (Negative common (PNP))	Protocol	Communication connector	Power supply connector
0		Without SI Unit	
AAN	PROFINET	Push/Pull (SCRJ): 2 pcs.	Push/Pull (24 V): 2 pcs.
ABN		Push/Pull (RJ45): 2 pcs.	Push/Pull (24 V): 2 pcs.
ACN		M12: 2 pcs.	7/8 inch: 2 pcs.

*: The valve output polarity for the SI unit is negative common (PNP).

4 With or without I/O modules

Nii	Without I/O module
Y	With I/O module

9 A, B port size (Metric)

Symbol	A, B port	10 (Side ported) series			11 (Bottom ported) series

BN7		—	—	●	—	—
BN11		—	—	—	●	—
LM	Elbow port, mixed sizes (Including upward and downward piping)	●	●	●	—	—
P, E port size (One-touch fittings)		ø5/16"	ø3/8"	ø1/2"	ø3/8"	ø1/2"

*1: To avoid interference with the body or piping, select downward elbow port when mounting the optional spacer assembly (pages 617 to 620).

*2: When using mixed sizes for the A and B ports, please indicate so on the separate manifold specification sheet.

How to Order Manifold Assembly

Example (SS5Y3-10SAAN-□)

SS5Y3-10SAANY2-05D-C6 ...1 set (Type 10 5-station manifold base part no.)

- *SY3100-5U13 sets (2-position single part no.)
- *SY3200-5U11 set (2-position double part no.)
- *SY3300-5U11 set (2-position closed center part no.)
- *EX245-DX11set I/O module part no.
- *EX245-DY11set I/O module part no.

—The asterisk denotes the symbol for assembly.
Prefix it to the part numbers of the valve etc.

- * The valve arrangement is numbered as the 1st station from the D side.
- * The I/O module station arrangement is numbered starting from the SI unit side.
- * Under the manifold part number, state the valves to be mounted, then the I/O module in order from the 1st station as shown in the figure above. If the arrangement becomes complicated, specify on a manifold specification sheet.

*1: Do not enter the SI Unit part number and the end plate part number together.
*2: When mixing top ported configurations, select from page 521. In this case, use caution as there is also output on the A and B port on base side.
Specify on a manifold specification sheet if plugs are required on the A and B port on base side.

How to Order Valves (With mounting screw)

Refer to page 404 for valve specifications.

• Base mounted

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Type of actuation

1	2-position	Single
2	2-position	Double
3	3-position	Closed center
4	3-position	Exhaust center
5	3-position	Pressure center
A*1	4-position	N.C./N.C.
B*1	dual 3-port	N.O./N.O.
C*1	dual 3-port	N.C./N.O.

*1: Only rubber seal type is available for the 4-position dual 3-port valve.

3 Seal type

0	Rubber seal
1	Metal seal

4 Pilot type

NII	Internal pilot
R	External pilot

* When selecting the external pilot specification for the 4-position dual 3-port valve, pay attention to the pilot pressure. Refer to the valve specifications on page 404 for further details.

5 Back pressure check valve (Built-in valve type)

NII	None
H	Built-in

*: Only rubber seal type. Manifold installed type is available if the back pressure check valve is required for a valve with metal seal. Refer to page 625 for Ordering Example. However, it is not recommended to use the built-in valve type and the manifold installed type at the same time because it will reduce the flow.

*: The built-in valve type back pressure check valve is not available for the 3-position type or the SY7000.

6 Pilot valve option

NII	Standard (0.7 MPa)
B	Quick response type (0.7 MPa)
K*1	High pressure type (1.0 MPa)

*1: Only metal seal type is available for the high pressure type.

7 Coil type

NII	Standard
T	With power saving circuit (Continuous duty type)

*: Be sure to select the power saving circuit type when the valve is continuously energized for long periods of time.

*: Be careful of the energizing time when the power saving circuit is selected. Refer to page 705 for details.

8 Rated voltage

5	24 VDC
---	--------

9 Light/surge voltage suppressor and common specification

Symbol	With light	Surge voltage suppressor	Common specification
R	—	●	Non-polar
U	●		
NS	—		
NZ	●		Negative common

*: "R" and "U" are applicable for every SI Unit.

*: Only "NZ" types are available for with the power saving circuit.

10 Manual override

*: Refer to page 423 for with the safety slide locking manual override.

11 Type of mounting screw

NII	Round head combination screw
B	Hexagon socket head cap screw
K	Round head combination screw (Falling-out-prevention type)
H	Hexagon socket head cap screw (Falling-out-prevention type)

*: For "K" and "H", the valve body cover has a drop prevention construction to stop the mounting screws from falling out when the valve is removed for maintenance etc.

*: **When ordering a valve individually, the base gasket is not included.**

Since the base gasket is attached to the manifold, please order the base gasket separately if it is needed for maintenance service.

Refer to page 611 for part numbers of the base gasket and mounting screw.

*: "B" and "H" cannot be selected for the individual SUP/EXH spacer assembly, interface regulator or double check spacer assembly with residual pressure release valve.

SY3000/5000/7000 Series

SY3000/5000/7000 Series

How to Order Manifold

Refer to pages 571 to 573 for the dimensions of Type 12/Top ported type.

1 Series

3	SY3000
5	SY5000
7	SY7000

3 With or without I/O modules

Nil	Without I/O module
Y	With I/O module

4 Number of I/O modules

Nil	Without I/O module (Without SI Unit)
1	1 station
:	:
8	8 stations

6 P, E port entry

U	U side (2 to 10 stations)
D	D side (2 to 10 stations)
B	Both sides (2 to 24 stations)

For details about the EX245 Integrated-type (For Input/Output) Serial Transmission System, refer to the **Web Catalog** and the **Operation Manual**. For details about part numbers of SI Units to be mounted, refer to pages 602 and 603. Please download the Operation Manual via SMC website, <https://www.smcworld.com>

2 SI Unit specifications

Symbol (output polarity)	Protocol	Communication connector	Power supply connector
Negative common (PNP)			
0		Without SI Unit	
AAN	PROFINET	Push/Pull (SCRJ): 2 pcs.	Push/Pull (24 V): 2 pcs.
ABN		Push/Pull (RJ45): 2 pcs.	Push/Pull (24 V): 2 pcs.
ACN		M12: 2 pcs.	7/8 inch: 2 pcs.

*: The valve output polarity for the SI unit is negative common (PNP).

5 Valve stations

(In the case of the 32-output SI Unit)

Symbol	Stations	Note
02	2 stations	Double wiring*1
:	:	
16	16 stations	Specified layout*2 (Available up to 32 solenoids)
02	2 stations	
:	:	
24	24 stations	

*1: Double wiring: 2-position single, double, 3-position and 4-position valves can be used on all manifold stations. Use of a 2-position single solenoid will result in an unused control signal. If this is not desired, order with a specified layout

*2: Specified layout: Indicate the wiring specifications on the manifold specification sheet.

(Note that 2-position double, 3-position and 4-position valves cannot be used where single wiring has been specified.)

*: This also includes the number of blanking plate assembly.

7 SUP/EXH block assembly

Nil	Internal pilot
S	Internal pilot, Built-in silencer
R	External pilot

*: 3/5(E) port is plugged for the built-in silencer type. The silencer exhaust port is located on the opposite side of P, E port entry. (Example: When the P, E port entry is D side, the silencer exhaust port is U side.)

*: When the built-in silencer type is used, keep the exhaust port from coming in direct contact with water or other liquids.

8 P, E port size (One-touch fittings)

Symbol	SY3000	SY5000	SY7000
Nil	ø8	ø10	ø12
N	ø5/16"	ø3/8"	ø1/2"

How to Order Manifold Assembly

Example (SS5Y3-12SAAN-□)

SS5Y3-12SAANY2-05DS-N-.....1 set (Type 12 5-station manifold base part no.)
 *SY3130-5U1-C6.....3 sets (2-position single part no.)
 *SY3220-5U1-C6.....1 set (2-position double part no.)
 *SY3330-5U1-C6.....1 set (3-position closed center part no.)
 *EX245-DX1.....1set I/O module part no.
 *EX245-DY1.....1set I/O module part no.

—The asterisk denotes the symbol for assembly. Prefix it to the part numbers of the valve etc.

- The valve arrangement is numbered as the 1st station from the D side.
- The I/O module station arrangement is numbered starting from the SI unit side.
- Under the manifold part number, state the valves to be mounted, then the I/O module in order from the 1st station as shown in the figure above. If the arrangement becomes complicated, specify on a manifold specification sheet.

*1: Do not enter the SI Unit part number and the end plate part number together.

*: When mounting top ported configurations, select from page 521. In this case, use caution as there is also output on the A and B port on base side. Specify on a manifold specification sheet if plugs are required on the A and B port on base side.

How to Order Valves (With mounting screw)

Refer to page 404 for valve specifications.

• Top mounted

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Type of actuation

1	2-position	Single
2		Double
3	3-position	Closed center
4		Exhaust center
5		Pressure center
A ⁻¹	4-position dual 3-port valve	N.C./N.C.
B ⁻¹		N.O./N.O.
C ⁻¹		N.C./N.O.

*1: Select the rubber seal type for the 4-position dual 3-port valve.

3 Seal type

0	Rubber seal
1	Metal seal

4 Pilot type

NII	Internal pilot
R	External pilot

* When selecting the external pilot specification for the 4-position dual 3-port valve, pay attention to the pilot pressure. Refer to the valve specifications on page 404 for further details.

5 Back pressure check valve

NII	None
H ⁻¹	Built-in

*1: Select the rubber seal type when the back pressure check valve is built-in. Manifold installed type is available if the back pressure check valve is required for a valve with metal seal. For ordering example, refer to page 625. However, it is not recommended to use the built-in valve type and the manifold installed type at the same time because it will reduce the flow.

*: The built-in valve type back pressure check valve is not available for the 3-position type or the SY7000.

6 Pilot valve option

NII	Standard (0.7 MPa)
B	Quick response type (0.7 MPa)
K ⁻¹	High pressure type (1.0 MPa)

*1: Select the metal seal type for high pressure type.

7 Coil type

NII	Standard
T	With power saving circuit (Continuous duty type) ^{*1*2}

*1: Be sure to select the power saving circuit type when the valve is continuously energized for long periods of time.

*2: Be careful of the energizing time when the power saving circuit is selected. For details, refer to page 705.

8 Rated voltage

5	24 VDC
---	--------

9 Light/surge voltage suppressor and common specification

	With light	Surge voltage suppressor	Common specification
R	—	●	Non-polar
U	●	—	
NS	—	●	Negative common
NZ	●	—	

*: Select "NZ" for with the power saving circuit.

10 Manual override

*: Refer to page 423 for with the safety slide locking manual override.

11 A, B port size

Thread piping

Symbol	Port size	Applicable series
M5	M5 x 0.8	SY3000
O1	1/8	SY5000
O2	1/4	SY7000

One-touch fitting (Metric)

Symbol	A, B port	SY3000	SY5000	SY7000
C2	ø2	●	—	—
C3	ø3.2	●	—	—
C4	ø4	●	●	—
C6	ø6	●	●	●
C8	ø8	—	●	●
C10	ø10	—	—	●
C12	ø12	—	—	●

One-touch fitting (Inch)

Symbol	A, B port	SY3000	SY5000	SY7000
N1	ø1/8"	●	—	—
N3	ø5/32"	●	●	—
N7	ø1/4"	●	●	●
N9	ø5/16"	—	●	●
N11	ø3/8"	—	—	●

12 Thread type

NII	Rc
F	G
N	NPT
T	NPTF

*: Only NII is available for M5.

13 Type of mounting screw

NII	Round head combination screw
B	Hexagon socket head cap screw
K	Round head combination screw (Falling-out-prevention type) ^{*1}
H	Hexagon socket head cap screw (Falling-out-prevention type) ^{*1}

*1: For "K" and "H", the valve body cover has a drop prevention construction to stop the mounting screws from falling out when the valve is removed for maintenance etc.

*: **When ordering a valve individually, the base gasket is not included.**

Since the base gasket is attached to the manifold, please order the base gasket separately if it is needed for maintenance service.

Refer to page 611 for part numbers of the base gasket and mounting screw.

*: Select "NII" or "K" for the optional individual SUP/EXH spacer assembly, interface regulator or double check spacer assembly with residual pressure release valve.

Type 10
Side Ported

Type 11
Bottom Ported

Plug-in Connector Connecting Base

EX250

SY3000/5000/7000 Series

How to Order Manifolds

Refer to pages 569 (SY5000) and 570 (SY7000) for the dimensions of Type 11/Bottom-ported type.

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Type

10	Side ported
11	Bottom ported*1

*1 The SY5000 manifold base is used for the bottom-ported SY3000. When ordering, refer to the "Plug-in Mixed Mounting Type Manifold" (from page 574).

4 Input block stations

Nil	None
1	1 station
:	:
8	8 stations

* When not selecting an SI unit, the symbol will be "nil." The maximum number of stations is limited for the AS-Interface applicable SI unit.

3 SI unit

0	Without SI unit	
Q	DeviceNet® (Negative common)	
TA	AS-Interface (Negative common)	2 power supply systems
TB		4 in/4 out
TC		8 in/8 out
TD		4 in/4 out
ZE	EtherNet/IP™ (Negative common)	

- * Ensure a match with the common specification of the valve to be used.
- * Input block cannot be mounted without SI unit.
- * The supply current from the SI unit of AS-Interface applicable 1 power supply system specification to the input block and valve is limited.

5 Input block type

	PNP sensor input	NPN sensor input
Without input block	Nil	
M12, 2 inputs	A	D
M12, 4 inputs	B	E
M8, 4 inputs	C	F

* When not selecting an SI unit, the symbol will be "nil."

6 Valve stations

Symbol	Stations	Note
02	2 stations	Double wiring*1
:	:	
16	16 stations	Specified layout*2 (Up to 32 solenoids available)
02	2 stations	
:	:	
24	24 stations	

- *1 Double wiring: 2-position single, double, 3-position, and 4-position valves can be used on all manifold stations. Use of a 2-position single solenoid will result in an unused control signal. If this is not desired, order with a specified layout.
- *2 Specified layout: Indicate the wiring specifications on the manifold specification sheet. (Note that 2-position double, 3-position, and 4-position valves cannot be used where single wiring has been specified.) When determining the number of valve stations, note that the maximum number of solenoids for the AS-Interface applicable SI Unit specification is as follows.
 - 8 in/8 out specification: Max. 8 solenoids
 - 4 in/4 out specification: Max. 4 solenoids
- * This also includes the number of the blanking plate assembly.
- * For the product without the SI unit (S0), note the maximum number of solenoids of the SI unit that will be mounted. If the layout is specified, indicate it on the manifold specification sheet.

How to Order Manifold Assembly

Example (SS5Y3-10S□-□)

SS5Y3-10SQ1C-05D-C6... 1 set (Type 10 5-station manifold base part no.)
 *SY3100-5U1 3 sets (2-position single part no.)
 *SY3200-5U1 1 set (2-position double part no.)
 *SY3300-5U1 1 set (3-position closed center part no.)

The asterisk denotes the symbol for the assembly. Prefix it to the part numbers of the valve, etc.

- For the valve arrangement, the valve closest to the D side is considered the 1st station.
- Under the manifold part number, state the valves to be mounted in order starting with the 1st station as shown in the figure above. If the arrangement becomes too complicated, specify the details on a manifold specification sheet.

* When mixing top-ported configurations, select from those listed on page 529. In such cases, use caution as there is also output on the A and B ports on the base side. Specify on the manifold specification sheet if plugs are required for the A and B ports on the base side.

7 P, E port entry, SUP/EXH block assembly

P, E port entry	Internal pilot	Internal pilot, Built-in silencer	External pilot
U side (2 to 10 stations)	U	C	G
D side (2 to 10 stations)	D	E	H
Both sides (2 to 24 stations)	B	F	J

- * 3/5(E) port is plugged for the built-in silencer type.
- * When the built-in silencer type is used, select the exhaust port from coming into direct contact with water or other liquids.

For details on the EX250 Integrated Type (For Input/Output) Serial Transmission System, refer to the **Web Catalog** and the Operation Manual. For the part numbers of the SI units to be mounted, refer to page 604. Please download the Operation Manual via the SMC website, <https://www.smcworld.com>

8 A, B port size (Metric/One-touch fitting)

Symbol	A, B port	Type 10/Side ported			Type 11/Bottom ported			
		SY3000	SY5000	SY7000	SY5000	SY7000		
C2 C3 C4 C6 C8 C10 C12	Straight	ø2	●	—	—	—		
		ø3.2	●	—	—	—		
		ø4	●	●	—	●		—
		ø6	●	●	●	●		●
		ø8	—	●	●	●		●
		ø10	—	—	●	—		●
CM ^{*1}	Straight port, mixed sizes	●	●	●	●	●		
L4 L6 L8 L10 L12 B4 B6 B8 B10 B12	Upward	ø4	●	●	—	—		
		ø6	●	●	—	—		
		ø8	—	●	●	—		—
		ø10	—	—	●	—		—
		ø12	—	—	—	—		—
		ø4	●	●	—	—		—
Downward	ø6	●	●	—	—	—		
	ø8	—	●	●	—	—		
	ø10	—	—	●	—	—		
	ø12	—	—	—	—	—		
LM ^{*1}	Elbow port, mixed sizes (including upward and downward piping)	●	●	●	—	—		
P, E port size (One-touch fittings)		ø8	ø10	ø12	ø10	ø12		

*1 Indicate the sizes on the manifold specification sheet in the case of "CM" or "LM."

The direction of P, E port fittings is the same as for the A, B port. If selecting "LM," indicate it on the manifold specification sheet for the P, E port fitting direction.

*2 To avoid interference with the body or piping, select a downward elbow port when mounting the optional spacer assembly (pages 617 to 619).

9 Mounting and Option

Symbol	Mounting	Option		DIN Rail Option	
		Name plate	Station number	Nil	Standard length
Nil	Direct mounting	—	—	0	Without DIN rail (with bracket)
AA		●	●	3	For 3 stations
BA		●	—	:	Specify a longer rail than the total length of specified stations.
D □		—	—	24	
A □	DIN rail mounting	●	●		
B □		●	—		

* Enter the number of stations inside □ when it is larger than the number of valve stations. (Refer to "DIN Rail Option" above.)

* Only direct mounting is available for the type 11 bottom ported type.

* Refer to page 708 for the fixation of DIN rail mounting type manifold.

* If the DIN rail must be mounted without an SI unit, select D0. Then, refer to L3 of the dimensions for the DIN rail length and order separately. (Refer to page 616 for the DIN rail part number.)

SY3000/5000/7000 Series

How to Order Valves (With mounting screw)

Refer to page 404 for valve specifications.

• Base mounted

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Type of actuation

1	2-position	Single
2		Double
3	3-position	Closed center
4		Exhaust center
5		Pressure center
A ^{*1}	4-position dual 3-port	N.C./N.C.
B ^{*1}		N.O./N.O.
C ^{*1}		N.C./N.O.

*1 Only the rubber seal type is available for the 4-position dual 3-port valve.

3 Seal type

0	Rubber seal
1	Metal seal

4 Pilot type

Nii	Internal pilot
R	External pilot

* When selecting the external pilot specification for the 4-position dual 3-port valve, pay attention to the pilot pressure. Refer to the valve specifications on page 404 for further details.

5 Back pressure check valve (Built-in valve type)

Nii	None
H	Built-in

* Only the rubber seal type is available. A manifold installed type is available if a back pressure check valve with a metal seal is required. Refer to page 625 for ordering examples. However, it is not recommended to use the built-in valve type and the manifold installed type at the same time because it will reduce the flow.

* The built-in valve type back pressure check valve is not available for the 3-position type or the SY7000.

6 Pilot valve option

Nii	Standard (0.7 MPa)
B	Quick response type (0.7 MPa)
K ^{*1}	High pressure type (1.0 MPa)

*1 Only the metal seal type is available for the high pressure type.

7 Coil type

Nii	Standard
T	With power saving circuit (Continuous duty type)

* Be sure to select the power saving circuit type if the valve is to be continuously energized for long periods of time.

* Be careful of the energizing time when the power saving circuit is selected. Refer to page 705 for details.

8 Rated voltage

5	24 VDC
---	--------

9 Light/surge voltage suppressor and common specification

Symbol	With light	Surge voltage suppressor	Common specification	
R	—	●	Non-polar	
U	●		●	Negative common
NS	—			
NZ	●			

* Only "NZ" type is available with a power saving circuit.

10 Manual override

* Refer to page 423 for the safety slide locking manual override.

11 Type of mounting screw

Nii	Round head combination screw
B	Hexagon socket head cap screw
K	Round head combination screw (Drop prevention type)
H	Hexagon socket head cap screw (Drop prevention type)

* For "K" and "H," the valve body cover has a drop prevention construction to stop the mounting screws from falling out when the valve is removed for maintenance, etc.

* **When ordering a valve individually, the base gasket is not included.** Since the base gasket is attached to the manifold, please order the base gasket separately if it is needed for maintenance. Refer to page 611 for base gasket and mounting screw part numbers.

* "B" and "H" cannot be selected for the individual SUP/EXH spacer assembly, interface regulator, or double check spacer assembly with residual pressure release valve.

Plug-in Connector Connecting Base

EX250

Type 12
Top Ported

SY3000/5000/7000 Series

How to Order Manifolds

Refer to pages 571 to 573 for the dimensions of Type 12/Top ported type.

1 Series

3	SY3000
5	SY5000
7	SY7000

3 Input block stations

Nil	None
1	1 station
⋮	⋮
8	8 stations

* When not selecting an SI unit, the symbol will be "nil." The maximum number of stations is limited for the AS-Interface applicable SI unit.

4 Input block type

	PNP sensor input	NPN sensor input
Without input block	Nil	
M12, 2 inputs	A	D
M12, 4 inputs	B	E
M8, 4 inputs	C	F

* When not selecting an SI unit, the symbol will be "nil."

2 SI unit

0	Without SI unit	
Q	DeviceNet [®] (Negative common)	
TA	AS-Interface (Negative common)	2 power supply systems 8 in/8 out
TB		4 in/4 out
TC		1 power supply system 8 in/8 out
TD		4 in/4 out
ZE	EtherNet/IP [™] (Negative common)	

- * Ensure a match with the common specification of the valve to be used.
- * Input block cannot be mounted without SI unit.
- * The supply current from the SI unit of AS-Interface applicable 1 power supply system specification to the input block and valve is limited.

5 Valve stations

Symbol	Stations	Note
02	2 stations	Double wiring ¹
⋮	⋮	
16	16 stations	
02	2 stations	Specified layout ² (Up to 32 solenoids available)
⋮	⋮	
24	24 stations	

- *1 Double wiring: 2-position single, double, 3-position, and 4-position valves can be used on all manifold stations. Use of a 2-position single solenoid will result in an unused control signal. If this is not desired, order with a specified layout.
- *2 Specified layout: Indicate the wiring specifications on the manifold specification sheet. (Note that 2-position double, 3-position, and 4-position valves cannot be used where single wiring has been specified.) When determining the number of valve stations, note that the maximum number of solenoids for the AS-Interface applicable SI unit specification is as follows.
 - * 8 in/8 out specification: Max. 8 solenoids
 - * 4 in/4 out specification: Max. 4 solenoids
- * This also includes the number of the blanking plate assembly.
- * For the product without the SI unit (S0), note the maximum number of solenoids of the SI unit that will be mounted. If the layout is specified, indicate it on the manifold specification sheet.

How to Order Manifold Assembly

Example (SS5Y3-12S□□)

SS5Y3-12SQ1C-05D ... 1 set (Type 12 5-station manifold base part no.)
 *SY3130-5U1-C6 3 sets (2-position single part no.)
 *SY3230-5U1-C6 1 set (2-position double part no.)
 *SY3330-5U1-C6 1 set (3-position closed center part no.)

The asterisk denotes the symbol for the assembly. Prefix it to the part numbers of the valve, etc.

- * For the valve arrangement, the valve closest to the D side is considered the 1st station.
- * Under the manifold part number, state the valves to be mounted in order starting with the 1st station as shown in the figure above. If the arrangement becomes too complicated, specify the details on a manifold specification sheet.

6 P, E port entry, SUP/EXH block assembly

P, E port entry	Internal pilot	Internal pilot, Built-in silencer	External pilot
U side (2 to 10 stations)	U	C ¹	G
D side (2 to 10 stations)	D	E ¹	H
Both sides (2 to 24 stations)	B	—	J

- *1 For SUP/EXH block assembly specifications, built-in silencer types will have P port entry stipulated.
- * The P and E ports are only available on the U and D sides for the built-in silencer type. 3/5(E) port is plugged. The silencer exhaust port is located on the opposite side of the P and E port entry. (Example: When the P and E port entry is on the D side, the silencer exhaust port is on the U side.)
- * When the built-in silencer type is used, keep the exhaust port from coming into direct contact with water or other liquids.

7 P, E port size (One-touch fittings)

Symbol	SY3000	SY5000	SY7000
Nil	ø8	ø10	ø12
N	ø5/16"	ø3/8"	ø1/2"

* For N, sizes are in inches.

8 Mounting

Nil	Direct mounting
D	DIN rail mounting (With DIN rail)
D0	DIN rail mounting (Without DIN rail)
D3	For 3 stations Specify a length longer than that of the standard rail.
⋮	⋮
D24	For 24 stations

- * If the DIN rail must be mounted without an SI unit, select D0. Then, refer to L3 of the dimensions for the DIN rail length and order separately. (Refer to page 616 for the DIN rail part number.)
- * Refer to page 708 for the fixation of DIN rail mounting type manifold.

For details on the EX250 Integrated Type (For Input/Output) Serial Transmission System, refer to the **Web Catalog** and the Operation Manual. For the part numbers of the SI units to be mounted, refer to page 604. Please download the Operation Manual via the SMC website, <https://www.smccworld.com>

How to Order Valves (With mounting screw)

Refer to page 404 for valve specifications.

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Type of actuation

1	2-position	Single
2		Double
3	3-position	Closed center
4		Exhaust center
5		Pressure center
A ^{*1}	4-position dual 3-port	N.C./N.C.
B ^{*1}		N.O./N.O.
C ^{*1}		N.C./N.O.

*1 Only the rubber seal type is available for the 4-position dual 3-port valve.

3 Seal type

0	Rubber seal
1	Metal seal

4 Pilot type

Nii	Internal pilot
R	External pilot

* When selecting the external pilot specification for the 4-position dual 3-port valve, pay attention to the pilot pressure. Refer to the valve specifications on page 404 for further details.

5 Back pressure check valve (Built-in valve type)

Nii	None
H	Built-in

* Only the rubber seal type is available. A manifold installed type is available if a back pressure check valve with a metal seal is required. Refer to page 625 for ordering examples. However, it is not recommended to use the built-in valve type and the manifold installed type at the same time because it will reduce the flow.

* The built-in valve type back pressure check valve is not available for the 3-position type or the SY7000.

6 Pilot valve option

Nii	Standard (0.7 MPa)
B	Quick response type (0.7 MPa)
K ^{*1}	High pressure type (1.0 MPa)

*1 Only the metal seal type is available for the high pressure type.

7 Coil type

Nii	Standard
T	With power saving circuit (Continuous duty type)

* Be sure to select the power saving circuit type if the valve is to be continuously energized for long periods of time.
* Be careful of the energizing time when the power saving circuit is selected. Refer to page 705 for details.

8 Rated voltage

5	24 VDC
---	--------

9 Light/surge voltage suppressor and common specification

Symbol	With light	Surge voltage suppressor	Common specification
R	—	●	Non-polar
U	●		
S	—		
Z	●		Positive common
NS	—		Negative common
NZ	●		

* "R" and "U" are applicable for every SI unit.
* Only "Z" and "NZ" types are available with a power saving circuit.

10 Manual override

* Refer to page 423 for the safety slide locking manual override.

11 A, B port size

Thread piping

Symbol	Port size	Applicable series
M5	M5 x 0.8	SY3000
O1	1/8	SY5000
O2	1/4	SY7000

One-touch fitting (Metric)

Symbol	A, B port	SY3000	SY5000	SY7000
C2	ø2	●	—	—
C3	ø3.2	●	—	—
C4	ø4	●	●	—
C6	ø6	●	●	●
C8	ø8	—	●	●
C10	ø10	—	—	●
C12	ø12	—	—	●

One-touch fitting (Inch)

Symbol	A, B port	SY3000	SY5000	SY7000
N1	ø1/8"	●	—	—
N3	ø5/32"	●	●	—
N7	ø1/4"	●	●	●
N9	ø5/16"	—	●	●
N11	ø3/8"	—	—	●

12 Thread type

Nii	Rc
F	G
N	NPT
T	NPTF

* Only Nii is available for M5.

13 Type of mounting screw

Nii	Round head combination screw
B	Hexagon socket head cap screw
K	Round head combination screw (Drop prevention type)
H	Hexagon socket head cap screw (Drop prevention type)

* For "K" and "H," the valve body cover has a drop prevention construction to stop the mounting screws from falling out when the valve is removed for maintenance, etc.

* **When ordering a valve individually, the base gasket is not included.**

Since the base gasket is attached to the manifold, please order the base gasket separately if it is needed for maintenance. Refer to page 611 for base gasket and mounting screw part numbers.

* "B" and "H" cannot be selected for the individual SUP/EXH spacer assembly or interface regulator.

Type 10
Side Ported

Type 11
Bottom Ported

Plug-in Connector Connecting Base

EX260

SY3000/5000/7000 Series

Refer to page 534 for details on manifolds that support safety communication (PROFIsafe).

How to Order Manifolds

Refer to pages 569 (SY5000) and 570 (SY7000) for the dimensions of Type 11/Bottom-ported type.

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Type

10	Side ported
11	Bottom ported ^{*1}

*1 The SY5000 manifold base is used for the bottom-ported SY3000. When ordering, refer to the "Plug-in Mixed Type Manifold" (from page 574).

3 SI unit specifications

(Output polarity, Protocol, Number of outputs, Communication connector)

Symbol (Output polarity)	Protocol	Number of outputs	Communication connector
Positive common (NPN)	Negative common (PNP)		
0 ^{*1} Without SI unit			
QA	QAN	32	M12
QB	QBN	16	
NA	NAN	32	M12
NB	NBN	16	
NC	NCN	32	D-sub ^{*4}
ND	NDN	16	
VA	VAN	32	M12
VB	VBN	16	
DA	DAN	32	M12
DB	DBN	16	
FA	FAN	32	M12
FB	FBN	16	
EA	EAN	32	M12
EB	EBN	16	
— ^{*3}	GAN	32	M12
— ^{*3}	GBN	16	
— ^{*3}	KAN	32 ^{*5}	M12

*1 Without SI unit, the output polarity is decided by the SI unit used. Ensure a match with the common specification of the valves to be used.

*2 DIN rail cannot be mounted without SI unit.

*3 Positive common (NPN) type is not applicable.

*4 IP40 for the D-sub applicable communication connector specification

*5 Only the 32 outputs type is available.

4 Valve stations

In the case of the 32-output SI unit

Symbol (Stations)	Note
02	2 stations
⋮	⋮
16	16 stations
02	2 stations
⋮	⋮
24	24 stations

Double wiring^{*1}

Specified layout^{*2}
(Up to 32 solenoids available)

In the case of the 16-output SI unit

Symbol (Stations)	Note
02	2 stations
⋮	⋮
08	8 stations
02	2 stations
⋮	⋮
16	16 stations

Double wiring^{*1}

Specified layout^{*2}
(Up to 16 solenoids available)

*1 Double wiring: 2-position single, double, 3-position, and 4-position valves can be used on all manifold stations.

Use of a 2-position single solenoid will result in an unused control signal. If this is not desired, order with a specified layout

*2 Specified layout: Indicate the wiring specifications on the manifold specification sheet.

(Note that 2-position double, 3-position, and 4-position valves cannot be used where single wiring has been specified.)

* This also includes the number of the blanking plate assembly.

* For the model without the SI unit (S0), note the maximum number of solenoids of the SI unit that will be mounted. If the layout is specified, indicate it on the manifold specification sheet.

5 P, E port entry

U	U side (2 to 10 stations)
D	D side (2 to 10 stations)
B	Both sides (2 to 24 stations)

6 SUP/EXH block assembly

NII	Internal pilot
S	Internal pilot, Built-in silencer
R	External pilot

* 3/5(E) port is plugged for the built-in silencer type.

* When the built-in silencer type is used, keep the exhaust port from coming into direct contact with water or other liquids.

Refer to the page on the right for 7.

8 Mounting and Option

Symbol	Mounting	Option	
		Name plate	Station number
NII	Direct mounting	—	—
AA		●	●
BA		●	—
D□	DIN rail mounting	—	—
A□		●	●
B□		●	—

* Enter the number of stations inside □ when it is larger than the number of valve stations. (Refer to "DIN Rail Option" below.)

* Only direct mounting is available for the type 11 bottom-ported type.

* Refer to page 708 for the fixation of DIN rail mounting type manifold.

DIN Rail Option

Symbol	Standard length	
0	Without DIN rail (with bracket)	
3	For 3 stations	Specify a longer rail than the total length of specified stations.
⋮	⋮	
24	For 24 stations	

* If the DIN rail must be mounted without an SI unit, select D0. Then, refer to L3 of the dimensions for the DIN rail length and order separately. (Refer to page 616 for the DIN rail part number.)

For details on the EX260 Integrated Type (For Output) Serial Transmission System, refer to the **Web Catalog** and the Operation Manual. For the part numbers of the SI units to be mounted, refer to page 605. Please download the Operation Manual via the SMC website, <https://www.smcworld.com>

7 A, B port size (Metric/One-touch fitting)

Symbol	A, B port	Type 10/Side ported			Type 11/Bottom ported	
		SY3000	SY5000	SY7000	SY5000	SY7000
C2 C3 C4 C6 C8 C10 C12	Straight	ø2	●	—	—	—
		ø3.2	—	—	—	—
		ø4	●	●	—	—
		ø6	●	●	●	●
		ø8	—	—	●	●
		ø10	—	—	●	●
C12	Straight port, mixed sizes	ø12	—	—	●	●
CM ⁻¹		●	●	●	●	
L4 L6 L8 L10 L12	Upward	ø4	●	●	—	—
		ø6	●	●	—	—
		ø8	—	—	●	—
		ø10	—	—	●	—
		ø12	—	—	—	—
		ø12	—	—	—	—
B4 B6 B8 B10 B12	Downward	ø4	●	●	—	—
		ø6	●	●	—	—
		ø8	—	—	●	—
		ø10	—	—	—	—
		ø12	—	—	—	—
		ø12	—	—	—	—
LM ⁻¹	Elbow port, mixed sizes (including upward and downward piping)	●	●	●	—	—
P, E port size (One-touch fittings)		ø8	ø10	ø12	ø10	ø12

*1 Indicate the sizes on the manifold specification sheet in the case of "CM" or "LM."

The direction of P, E port fittings is the same as for the A, B port. If selecting "LM," indicate it on the manifold specification sheet for the P, E port fitting direction.

*2 To avoid interference with the body or piping, select a downward elbow port when mounting the optional spacer assembly (pages 617 to 619).

A, B port size (Inch/One-touch fitting)

Symbol	A, B port	Type 10/Side ported			Type 11/Bottom ported	
		SY3000	SY5000	SY7000	SY5000	SY7000

		ø1/4"	●	●	—	—
BN7 BN9 BN11	Downward	ø1/4"	●	●	—	—
		ø5/16"	—	●	—	—
		ø3/8"	—	—	●	—
LM ⁻¹	Elbow port, mixed sizes (including upward and downward piping)	●	●	●	—	—
P, E port size (One-touch fittings)		ø5/16"	ø3/8"	ø1/2"	ø3/8"	ø1/2"

How to Order Manifold Assembly

Example (SS5Y3-10SNAN-□)

SS5Y3-10SNAN-04D-C6--1 set (Type 10 4-station manifold base part no.)
 *SY3100-5U1 2 sets (2-position single part no.)
 *SY3200-5U1 1 set (2-position double part no.)
 *SY3300-5U1 1 set (3-position closed center part no.)
 ↳ The asterisk denotes the symbol for the assembly.
 ↳ Prefix it to the part numbers of the valve, etc.

- For the valve arrangement, the valve closest to the D side is considered the 1st station.
- Under the manifold part number, state the valves to be mounted in order starting with the 1st station as shown in the figure above. If the arrangement becomes too complicated, specify the details on a manifold specification sheet.

* When mixing top ported configurations, select from those listed on page 541. Specify on the manifold specification sheet if plugs are required for the A and B ports on the manifold.

SY3000/5000/7000 Series

How to Order Valves (With mounting screw) Refer to page 404 for valve specifications.

• Base mounted

① Series

3	SY3000
5	SY5000
7	SY7000

② Type of actuation

1	2-position	Single
2		Double
3	3-position	Closed center
4		Exhaust center
5		Pressure center
A ^{*1}	4-position dual 3-port	N.C./N.C.
B ^{*1}		N.O./N.O.
C ^{*1}		N.C./N.O.

*1 Only the rubber seal type is available for the 4-position dual 3-port valve.

③ Seal type

0	Rubber seal
1	Metal seal

④ Pilot type

Nil	Internal pilot
R	External pilot

* When selecting the external pilot specification for the 4-position dual 3-port valve, pay attention to the pilot pressure. Refer to the valve specifications on page 404 for further details.

⑤ Back pressure check valve (Built-in valve type)

Nil	None
H	Built-in

* Only the rubber seal type is available. A manifold installed type is available if a back pressure check valve with a metal seal is required. Refer to page 625 for ordering examples. However, it is not recommended to use the built-in valve type and the manifold installed type at the same time because it will reduce the flow.

* The built-in valve type back pressure check valve is not available for the 3-position type or the SY7000.

⑥ Pilot valve option

Nil	Standard (0.7 MPa)
B	Quick response type (0.7 MPa)
K ^{*1}	High pressure type (1.0 MPa)

*1 Only the metal seal type is available for the high pressure type.

⑦ Coil type

Nil	Standard
T	With power saving circuit (Continuous duty type)

* Be sure to select the power saving circuit type if the valve is to be continuously energized for long periods of time.

* Be careful of the energizing time when the power saving circuit is selected. Refer to page 705 for details.

⑧ Rated voltage

5	24 VDC
---	--------

⑨ Light/surge voltage suppressor and common specification

Symbol	With light	Surge voltage suppressor	Common specification
R	—	●	Non-polar
U	●		
S	—		Positive common
Z	●		Negative common
NS	—		
NZ	●		

* Select "R," "U," "S," or "Z" for the valve when the SI unit output polarity is Nil (positive common). Select "R," "U," "NS," or "NZ" for the valve when the SI unit output polarity is N (negative common).

* Only "Z" and "NZ" types are available with a power saving circuit.

⑩ Manual override

* Refer to page 423 for the safety slide locking manual override.

⑪ Type of mounting screw

Nil	Round head combination screw
B	Hexagon socket head cap screw
K	Round head combination screw (Drop prevention type)
H	Hexagon socket head cap screw (Drop prevention type)

* For "K" and "H," the valve body cover has a drop prevention construction to stop the mounting screws from falling out when the valve is removed for maintenance, etc.

* **When ordering a valve individually, the base gasket is not included.** Since the base gasket is attached to the manifold, please order the base gasket separately if it is needed for maintenance. Refer to page 611 for base gasket and mounting screw part numbers.

* "B" and "H" cannot be selected for the individual SUP/EXH spacer assembly, interface regulator, or double check spacer assembly with residual pressure release valve.

Type 10
Side Ported

Type 11
Bottom Ported

Plug-in Connector Connecting Base

EX260 Safety Communication Protocol (PROFIsafe)

SY3000/5000/7000 Series

RoHS

Using the safety communication protocol

Refer to the EX260 Web Catalog for details on units that support the safety communication protocol. When using a manifold valve within an ISO 13849-compliant safety system, the device needs to be considered from both the pneumatic circuit and the electric side.

Devices (including valves) need to be selected based on whether their functions are in line with the safety level of the equipment as a whole.

The use of valves that have been validated as being compliant with ISO 13849-2 may be required.

For details on valves that have been validated, please contact SMC.

In addition, refer to "Safety Instructions" for precautions on model selection.

Refer to page 530 for details on manifolds that support Fieldbus and Industrial Ethernet.

How to Order Manifolds

Refer to pages 569 (SY5000) and 570 (SY7000) for the dimensions of Type 11/Bottom-ported type.

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Type

10	Side ported
11	Bottom ported ^{*1}

*1 The SY5000 manifold base is used for the bottom-ported SY3000. When ordering, refer to the "Plug-in Mixed Type Manifold" (from page 574).

3 SI unit specifications

(Output polarity, Protocol, Number of outputs, Communication connector)

Symbol (Output polarity)		Protocol	Number of outputs	Communication connector
Positive common (NPN)	Negative common (PNP)			
0 ^{*1}		Without SI unit	32 ^{*4}	M12
— ^{*3}	FPN			

*1 Without SI unit, the output polarity is decided by the SI unit used.

Ensure a match with the common specification of the valves to be used.

*2 DIN rail cannot be mounted without SI unit.

*3 Positive common (NPN) type is not applicable.

*4 Only the 32 outputs type is available.

4 Valve stations

Symbol	Stations	Note
02	2 stations	Double wiring ^{*1}
⋮	⋮	
16	16 stations	
02	2 stations	Specified layout ^{*2} (Up to 32 solenoids available)
⋮	⋮	
24	24 stations	

*1 Double wiring: 2-position single, double, 3-position, and 4-position valves can be used on all manifold stations.

Use of a 2-position single solenoid will result in an unused control signal. If this is not desired, order with a specified layout

*2 Specified layout: Indicate the wiring specifications on the manifold specification sheet.

(Note that 2-position double, 3-position, and 4-position valves cannot be used where single wiring has been specified.)

* This also includes the number of the blanking plate assembly.

5 P, E port entry

U	U side (2 to 10 stations)
D	D side (2 to 10 stations)
B	Both sides (2 to 24 stations)

6 SUP/EXH block assembly

Nil	Internal pilot
S	Internal pilot, Built-in silencer
R	External pilot

* 3/5(E) port is plugged for the built-in silencer type.

* When the built-in silencer type is used, keep the exhaust port from coming into direct contact with water or other liquids.

Refer to the page on the right for 7.

8 Mounting and Option

Symbol	Mounting	Option	
		Name plate	Station number
Nil	Direct mounting	—	—
AA		●	●
BA		●	—
D□	DIN rail mounting	—	—
A□		●	●
B□		●	—

* Enter the number of stations inside □ when it is larger than the number of valve stations. (Refer to "DIN Rail Option" below.)

* Only direct mounting is available for the type 11 bottom-ported type.

* Refer to page 708 for the fixation of DIN rail mounting type manifold.

DIN Rail Option

Nil	Standard length	
0	Without DIN rail (with bracket)	
3	For 3 stations	Specify a longer rail than the total length of specified stations.
⋮	⋮	
24	For 24 stations	

* If the DIN rail must be mounted without an SI unit, select D0. Then, refer to L3 of the dimensions for the DIN rail length and order separately. (Refer to page 616 for the DIN rail part number.)

For details on the EX260 Integrated Type (For Output) Serial Transmission System, refer to the Web Catalog and the Operation Manual. For the part numbers of the SI units to be mounted, refer to page 605. Please download the Operation Manual via the SMC website, <https://www.smcworld.com>

7 A, B port size (Metric/One-touch fitting)

Symbol	A, B port	Type 10/Side ported		Type 11/Bottom ported			
		SY3000	SY5000	SY7000	SY5000		SY7000
C2	ø2	●	—	—	—

LN9	ø5/16"	—	●	—	—	
LN11	ø3/8"	—	—	●	—	
BN3	ø5/32"	●	—	—	—	
BN7	ø1/4"	—	●	—	—	
BN9	ø5/16"	—	●	—	—	
BN11	ø3/8"	—	—	●	—	
LM^{*1}	Elbow port, mixed sizes (including upward and downward piping)	●	●	●	—	
P, E port size (One-touch fittings)		ø5/16"	ø3/8"	ø1/2"	ø3/8"	ø1/2"

*1 Indicate the sizes on the manifold specification sheet in the case of "CM" or "LM."

The direction of P, E port fittings is the same as for the A, B port. If selecting "LM," indicate it on the manifold specification sheet for the P, E port fitting direction.

*2 To avoid interference with the body or piping, select a downward elbow port when mounting the optional spacer assembly (pages 617 to 619).

SY3000/5000/7000 Series

[Validated product examples]

Please contact SMC for further details as supported variations are continually being added.

* 2-position double of rubber seal and manual override with locking function (D, E, F type) are excluded, because they don't comply with safety standard.

How to Order Valves (With mounting screw) Refer to page 404 for valve specifications.

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Type of actuation

1	2-position	Single
2		Double*2
3	3-position	Closed center
4		Exhaust center
5		Pressure center
A*1	4-position dual 3-port	N.C./N.C.
B*1		N.O./N.O.
C*1		N.C./N.O.

*1 Only the rubber seal type is available for the 4-position dual 3-port valve.

*2 Except the rubber seal

3 Seal type

0	Rubber seal
1	Metal seal

4 Pilot type

Nil	Internal pilot
R	External pilot

* When selecting the external pilot specification for the 4-position dual 3-port valve, pay attention to the pilot pressure. Refer to the valve specifications on page 404 for further details.

5 Back pressure check valve (Built-in valve type)

Nil	None
H	Built-in

* Only the rubber seal type is available. A manifold installed type is available if a back pressure check valve with a metal seal is required. Refer to page 625 for ordering examples. However, it is not recommended to use the built-in valve type and the manifold installed type at the same time because it will reduce the flow.

* The back pressure check valve is not available for the 3-position type or the SY7000.

6 Pilot valve option

Nil	Standard (0.7 MPa)
B	Quick response type (0.7 MPa)
K*1	High pressure type (1.0 MPa)

*1 Only the metal seal type is available for the high pressure type.

7 Coil type

Nil	Standard
T	With power saving circuit (Continuous duty type)

* Be sure to select the power saving circuit type if the valve is to be continuously energized for long periods of time.

* Be careful of the energizing time when the power saving circuit is selected. Refer to page 705 for details.

8 Rated voltage

5	24 VDC
---	--------

9 Light/surge voltage suppressor and common specification

Symbol	With light	Surge voltage suppressor	Common specification
Nil	—	—	Non-polar
R	—	—	
U	●	—	Negative common
NS	—	●	
NZ	●	—	

* Only "NZ" type is available with a power saving circuit.

10 Manual override

11 Type of mounting screw

Nil	Round head combination screw
B	Hexagon socket head cap screw
K	Round head combination screw (Drop prevention type)
H	Hexagon socket head cap screw (Drop prevention type)

* For "K" and "H," the valve body cover has a drop prevention construction to stop the mounting screws from falling out when the valve is removed for maintenance, etc.

* **When ordering a valve individually, the base gasket is not included.**

Since the base gasket is attached to the manifold, please order the base gasket separately if it is needed for maintenance. Refer to page 611 for base gasket and mounting screw part numbers.

* "B" and "H" cannot be selected for the individual SUP/EXH spacer assembly, interface regulator, or double check spacer assembly with residual pressure release valve.

Top Ported

SY3000/5000/7000 Series

How to Order Manifolds

Refer to pages 571 to 573 for the dimensions of Type 12/Top ported type.

1 Series

3	SY3000
5	SY5000
7	SY7000

2 SI unit specifications

(Output polarity, Protocol, Number of outputs, Communication connector)

Symbol (Output polarity)		Protocol	Number of outputs	Communication connector
Positive common (NPN)	Negative common (PNP)			
0*1 Without SI unit				
QA	QAN	DeviceNet®	32	M12
QB	QBN		16	
NA	NAN	PROFIBUS DP	32	M12
NB	NBN		16	
NC	NCN	CC-Link	32	M12
ND	NDN		16	
VA	VAN	EtherCAT	32	M12
VB	VBN		16	
DA	DAN	PROFINET	32	M12
DB	DBN		16	
FA	FAN	EtherNet/IP™	32	M12
FB	FBN		16	
EA	EAN	Ethernet POWERLINK	32	M12
EB	EBN		16	
—*3	GAN	IO-Link	32	M12
—*3	GBN		16	
—*3	KAN		32*5	M12

- *1 Without SI unit, the output polarity is decided by the SI unit used. Ensure a match with the common specification of the valves to be used.
- *2 DIN rail cannot be mounted without SI unit.
- *3 Positive common (NPN) type is not applicable.
- *4 IP40 for the D-sub applicable communication connector specification
- *5 Only the 32 outputs type is available.

For details on the EX260 Integrated Type (For Output) Serial Transmission System, refer to the **Web Catalog** and the Operation Manual. For the part numbers of the SI units to be mounted, refer to page 605. Please download the Operation Manual via the SMC website, <https://www.smcworld.com>

3 Valve stations

In the case of the 32-output SI unit

Symbol	Stations	Note
02	2 stations	Double wiring*1
⋮	⋮	
16	16 stations	
02	2 stations	Specified layout*2 (Up to 32 solenoids available)
⋮	⋮	
24	24 stations	

In the case of the 16-output SI unit

Symbol	Stations	Note
02	2 stations	Double wiring*1
⋮	⋮	
08	8 stations	
02	2 stations	Specified layout*2 (Up to 16 solenoids available)
⋮	⋮	
16	16 stations	

- *1 Double wiring: 2-position single, double, 3-position, and 4-position valves can be used on all manifold stations. Use of a 2-position single solenoid will result in an unused control signal. If this is not desired, order with a specified layout.
- *2 Specified layout: Indicate the wiring specifications on the manifold specification sheet. (Note that 2-position double, 3-position, and 4-position valves cannot be used where single wiring has been specified.)
- *3 This also includes the number of the blanking plate assembly.
- *4 For the model without the SI unit (S0), note the maximum number of solenoids of the SI unit that will be mounted. If the layout is specified, indicate it on the manifold specification sheet.

4 P, E port entry

U*1	U side (2 to 10 stations)
D*1	D side (2 to 10 stations)
B	Both sides (2 to 24 stations)

- *1 For type "S", SUP/EXH block assembly with a built-in silencer, choose U or D for P, E port entry.

5 SUP/EXH block assembly

Nii	Internal pilot
S	Internal pilot, Built-in silencer
R	External pilot

- * The P and E ports are only available on the U and D sides for the built-in silencer type. 3/5(E) port is plugged. The silencer exhaust port is located on the opposite side of the P and E port entry. (Example: When the P and E port entry is on the D side, the silencer exhaust port is on the U side.)
- * When the built-in silencer type is used, keep the exhaust port from coming into direct contact with water or other liquids.

6 P, E port size (One-touch fittings)

Symbol	SY3000	SY5000	SY7000
Nii	ø8	ø10	ø12
N	ø5/16"	ø3/8"	ø1/2"

- * For N, sizes are in inches.

7 Mounting

Nii	Direct mounting
D	DIN rail mounting (With DIN rail)
D0	DIN rail mounting (Without DIN rail)
D3	For 3 stations Specify a length longer than that of the standard rail.
⋮	⋮
D24	For 24 stations

- * If the DIN rail must be mounted without an SI unit, select D0. Then, refer to L3 of the dimensions for the DIN rail length and order separately. (Refer to page 616 for the DIN rail part number.)
- * Refer to page 708 for the fixation of DIN rail mounting type manifold.

How to Order Manifold Assembly

Example (SS5Y3-12SNAN-□)

- SS5Y3-12SNAN-04D 1 set (Type 12 4-station manifold base part no.)
- SY3130-5U1-C6 2 sets (2-position single part no.)
- SY3230-5U1-C6 1 set (2-position double part no.)
- SY3330-5U1-C6 1 set (3-position closed center part no.)

→ The asterisk denotes the symbol for the assembly. Prefix it to the part numbers of the valve, etc.

- For the valve arrangement, the valve closest to the D side is considered the 1st station.
- Under the manifold part number, state the valves to be mounted in order starting with the 1st station as shown in the figure above. If the arrangement becomes too complicated, specify the details on a manifold specification sheet.

How to Order Valves (With mounting screw)

Refer to page 404 for valve specifications.

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Type of actuation

1	Single
2	2-position
3	Double
4	Closed center
5	Exhaust center
6	Pressure center
A ⁻¹	4-position dual 3-port
B ⁻¹	N.C./N.C.
C ⁻¹	N.O./N.O.

*1 Only the rubber seal type is available for the 4-position dual 3-port valve.

3 Seal type

0	Rubber seal
1	Metal seal

4 Pilot type

NII	Internal pilot
R	External pilot

* When selecting the external pilot specification for the 4-position dual 3-port valve, pay attention to the pilot pressure. Refer to the valve specifications on page 404 for further details.

5 Back pressure check valve (Built-in valve type)

NII	None
H	Built-in

* Only the rubber seal type is available. A manifold installed type is available if a back pressure check valve with a metal seal is required. Refer to page 625 for ordering examples. However, it is not recommended to use the built-in valve type and the manifold installed type at the same time because it will reduce the flow.

* The built-in valve type back pressure check valve is not available for the 3-position type or the SY7000.

6 Pilot valve option

NII	Standard (0.7 MPa)
B	Quick response type (0.7 MPa)
K ⁻¹	High pressure type (1.0 MPa)

*1 Only the metal seal type is available for the high pressure type.

7 Coil type

NII	Standard
T	With power saving circuit (Continuous duty type)

* Be sure to select the power saving circuit type if the valve is to be continuously energized for long periods of time.

* Be careful of the energizing time when the power saving circuit is selected. Refer to page 705 for details.

8 Rated voltage

5	24 VDC
---	--------

9 Light/surge voltage suppressor and common specification

Symbol	With light	Surge voltage suppressor	Common specification
R	—	●	Non-polar
U	●		
S	—		Positive common
Z	●		
NS	—		
NZ	●		

* Select "R," "U," "S," or "Z" for the valve when the SI unit output polarity is Nil (positive common). Select "R," "U," "NS," or "NZ" for the valve when the SI unit output polarity is N (negative common).

* Only "Z" and "NZ" types are available with a power saving circuit.

10 Manual override

* Refer to page 423 for the safety slide locking manual override.

11 A, B port size

Symbol	Port size	Applicable series
M5	M5 x 0.8	SY3000
O1	1/8	SY5000
O2	1/4	SY7000

One-touch fitting (Metric)

Symbol	A, B port	SY3000	SY5000	SY7000
C2	ø2	●	—	—
C3	ø3.2	●	—	—
C4	ø4	●	●	—
C6	ø6	●	●	●
C8	ø8	—	●	●
C10	ø10	—	—	●
C12	ø12	—	—	●

One-touch fitting (Inch)

Symbol	A, B port	SY3000	SY5000	SY7000
N1	ø1/8"	●	—	—
N3	ø5/32"	●	●	—
N7	ø1/4"	●	●	●
N9	ø5/16"	—	●	●
N11	ø3/8"	—	—	●

12 Thread type

NII	Rc
F	G
N	NPT
T	NPTF

* Only Nil is available for M5.

13 Type of mounting screw

NII	Round head combination screw
B	Hexagon socket head cap screw
K	Round head combination screw (Drop prevention type)
H	Hexagon socket head cap screw (Drop prevention type)

* For "K" and "H," the valve body cover has a drop prevention construction to stop the mounting screws from falling out when the valve is removed for maintenance, etc.

* **When ordering a valve individually, the base gasket is not included.**

Since the base gasket is attached to the manifold, please order the base gasket separately if it is needed for maintenance. Refer to page 611 for base gasket and mounting screw part numbers.

* "B" and "H" cannot be selected for the individual SUP/EXH spacer assembly or interface regulator.

Type 10
Side Ported

Type 11
Bottom Ported

Plug-in Connector Connecting Base

EX126

SY3000/5000/7000 Series

How to Order Manifolds

Refer to pages 569 (SY5000) and 570 (SY7000) for the dimensions of Type 11/Bottom-ported type.

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Type

10	Side ported
11	Bottom ported* ¹

*1 The SY5000 manifold base is used for the bottom-ported SY3000. When ordering, refer to the "Plug-in Mixed Mounting Type Manifold" (from page 574).

3 SI unit

0	Without SI unit
V	CC-Link (Positive common NPN)

* Only a terminal block plate is mounted for the valve without SI unit.

4 Valve stations

Symbol	Stations	Note
02	2 stations	Double wiring* ¹
⋮	⋮	
08	8 stations	
02	2 stations	Specified layout* ² (Up to 16 solenoids available)
⋮	⋮	
16	16 stations	

*1 Double wiring: 2-position single, double, 3-position, and 4-position valves can be used on all manifold stations.

Use of a 2-position single solenoid will result in an unused control signal. If this is not desired, order with a specified layout.

*2 Specified layout: Indicate the wiring specifications with the manifold specification sheet. (Note that 2-position double, 3-position, and 4-position valves cannot be used where single wiring has been specified.)

* This also includes the number of the blanking plate assembly.

How to Order Manifold Assembly

Example (SS5Y3-10S4V-□-□)

SS5Y3-10S4V-05D-C6 ... 1 set (Type 10 5-station manifold base part no.)
 *SY3100-5U1 3 sets (2-position single part no.)
 *SY3200-5U1 1 set (2-position double part no.)
 *SY3300-5U1 1 set (3-position closed center part no.)
 → The asterisk denotes the symbol for the assembly.
 Prefix it to the part numbers of the valve, etc.

- For the valve arrangement, the valve closest to the D side is considered the 1st station.
- Under the manifold part number, state the valves to be mounted in order starting with the 1st station as shown in the figure above. If the arrangement becomes too complicated, specify the details on a manifold specification sheet.

* When mixing top-ported configurations, select from those listed on page 549. In such cases, use caution as there is also output on the A and B ports on the base side.
 Specify on the manifold specification sheet if plugs are required for the A and B ports on the base side.

5 P, E port entry

U	U side (2 to 10 stations)
D	D side (2 to 10 stations)
B	Both sides (2 to 16 stations)

6 SUP/EXH block assembly

Nii	Internal pilot
S	Internal pilot, Built-in silencer
R	External pilot

* 3/5(E) port is plugged for the built-in silencer type.

* When the built-in silencer type is used, keep the exhaust port from coming into direct contact with water or other liquids.

For details on the EX126 Integrated Type (For Output) Serial Transmission System, refer to the **Web Catalog** and the Operation Manual. For the part numbers of the SI units to be mounted, refer to page 606. Please download the Operation Manual via the SMC website, <https://www.smcworld.com>

7 A, B port size (Metric/One-touch fitting)

Symbol	A, B port	Type 10/Side ported			Type 11/Bottom ported	
		SY3000	SY5000	SY7000	SY5000	SY7000
C2 C3 C4 C6 C8 C10 C12	Straight	ø2	●	—	—	—
		ø3.2	●	—	—	—
		ø4	●	●	—	●
		ø6	●	●	●	●
		ø8	—	—	●	●
		ø10	—	—	●	●
C12	Straight port, mixed sizes	ø12	—	●	●	
CM ^{*1}		●	●	●	●	
L4 L6 L8 L10 L12 B4 B6 B8 B10 B12	Upward	ø4	●	●	—	—
		ø6	●	●	●	—
		ø8	—	●	—	—
		ø10	—	—	●	—
		ø12	—	—	●	—
		LM ^{*1}	●	●	●	—
	Downward	ø4	●	●	—	—
		ø6	●	●	●	—
		ø8	—	●	—	—
		ø10	—	—	●	—
		ø12	—	—	●	—
		LM ^{*1}	●	●	●	—
P, E port size (One-touch fittings)		ø8	ø10	ø12	ø10	ø12

*1 Indicate the sizes on the manifold specification sheet in the case of "CM" or "LM."

The direction of P, E port fittings is the same as for the A, B port. If selecting "LM," indicate it on the manifold specification sheet for the P, E port fitting direction.

*2 To avoid interference with the body or piping, select a downward elbow port when mounting the optional spacer assembly (pages 617 to 619).

8 Mounting and Option

Symbol	Mounting	Option	
		Name plate	Station number
Nll	Direct mounting	—	—
AA		●	●
BA		●	—
D□	DIN rail mounting	—	—
A□		●	●
B□		●	—

* Enter the number of stations inside □ when it is larger than the number of valve stations. (Refer to "DIN Rail Option" below.)

* Only direct mounting is available for the type 11 bottom-ported type.

* Refer to page 708 for the fixation of DIN rail mounting type manifold.

DIN Rail Option

Nll	Standard length	
0	Without DIN rail (with bracket)	
3	For 3 stations	Specify a longer rail than the total length of specified stations.
⋮	⋮	
16	For 16 stations

SY3000/5000/7000 Series

How to Order Valves (With mounting screw) Refer to page 404 for valve specifications.

• Base mounted

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Type of actuation

1	2-position	Single
2		Double
3	3-position	Closed center
4		Exhaust center
5		Pressure center
A ^{*1}	4-position dual 3-port	N.C./N.C.
B ^{*1}		N.O./N.O.
C ^{*1}		N.C./N.O.

*1 Only the rubber seal type is available for the 4-position dual 3-port valve.

3 Seal type

0	Rubber seal
1	Metal seal

4 Pilot type

Nii	Internal pilot
R	External pilot

* When selecting the external pilot specification for the 4-position dual 3-port valve, pay attention to the pilot pressure. Refer to the valve specifications on page 404 for further details.

5 Back pressure check valve (Built-in valve type)

Nii	None
H	Built-in

* Only the rubber seal type is available. A manifold installed type is available if a back pressure check valve with a metal seal is required. Refer to page 625 for ordering examples. However, it is not recommended to use the built-in valve type and the manifold installed type at the same time because it will reduce the flow.

* The built-in valve type back pressure check valve is not available for the 3-position type or the SY7000.

6 Pilot valve option

Nii	Standard (0.7 MPa)
B	Quick response type (0.7 MPa)
K ^{*1}	High pressure type (1.0 MPa)

*1 Only the metal seal type is available for the high pressure type.

7 Coil type

Nii	Standard
T	With power saving circuit (Continuous duty type)

* Be sure to select the power saving circuit type if the valve is to be continuously energized for long periods of time.

* Be careful of the energizing time when the power saving circuit is selected. Refer to page 705 for details.

8 Rated voltage

5	24 VDC
---	--------

9 Light/surge voltage suppressor and common specification

Symbol	With light	Surge voltage suppressor	Common specification
R	—	●	Non-polar
U	●		
S	—		Positive common
Z	●		

* Only "Z" type is available with a power saving circuit.

10 Manual override

* Refer to page 423 for the safety slide locking manual override.

11 Type of mounting screw

Nii	Round head combination screw
B	Hexagon socket head cap screw
K	Round head combination screw (Drop prevention type)
H	Hexagon socket head cap screw (Drop prevention type)

* For "K" and "H," the valve body cover has a drop prevention construction to stop the mounting screws from falling out when the valve is removed for maintenance, etc.

* **When ordering a valve individually, the base gasket is not included.**

Since the base gasket is attached to the manifold, please order the base gasket separately if it is needed for maintenance. Refer to page 611 for base gasket and mounting screw part numbers.

* "B" and "H" cannot be selected for the individual SUP/EXH spacer assembly, interface regulator, or double check spacer assembly with residual pressure release valve.

Plug-in Connector Connecting Base

EX126

Type 12
Top Ported

SY3000/5000/7000 Series

How to Order Manifolds

Refer to pages 571 to 573 for the dimensions of Type 12/Top ported type.

1 Series

3	SY3000
5	SY5000
7	SY7000

2 SI unit

0	Without SI unit
V	CC-Link (Positive common NPN)

* Only a terminal block plate is mounted for the valve without SI unit.

3 Valve stations

Symbol	Stations	Note
02	2 stations	Double wiring*1
⋮	⋮	
08	8 stations	
02	2 stations	Specified layout*2 (Up to 16 solenoids available)
⋮	⋮	
⋮	⋮	
16	16 stations	

*1 Double wiring: 2-position single, double, 3-position, and 4-position valves can be used on all manifold stations.

Use of a 2-position single solenoid will result in an unused control signal. If this is not desired, order with a specified layout.

*2 Specified layout: Indicate the wiring specifications on the manifold specification sheet. (Note that 2-position double, 3-position, and 4-position valves cannot be used where single wiring has been specified.)

* This also includes the number of the blanking plate assembly.

4 P, E port entry

U*1	U side (2 to 10 stations)
D*1	D side (2 to 10 stations)
B	Both sides (2 to 16 stations)

*1 ④ For type "S", SUP/EXH block assembly with a built-in silencer, choose U or D for P, E port entry.

5 SUP/EXH block assembly

NII	Internal pilot
S	Internal pilot, Built-in silencer
R	External pilot

* The P and E ports are only available on the U and D sides for the built-in silencer type. 3/5(E) port is plugged. The silencer exhaust port is located on the opposite side of the P and E port entry. (Example: When the P and E port entry is on the D side, the silencer exhaust port is on the U side.)

* When the built-in silencer type is used, keep the exhaust port from coming into direct contact with water or other liquids.

How to Order Manifold Assembly

Example (SS5Y3-12S4V-□-□)

SS5Y3-12S4V-05D ... 1 set (Type 12 5-station manifold base part no.)
 *SY3130-5U1-C6 3 sets (2-position single part no.)
 *SY3230-5U1-C6 1 set (2-position double part no.)
 *SY3330-5U1-C6 1 set (3-position closed center part no.)

→ The asterisk denotes the symbol for the assembly. Prefix it to the part numbers of the valve, etc.

• For the valve arrangement, the valve closest to the D side is considered the 1st station.
 • Under the manifold part number, state the valves to be mounted in order starting with the 1st station as shown in the figure above. If the arrangement becomes too complicated, specify the details on a manifold specification sheet.

6 P, E port size (One-touch fittings)

Symbol	SY3000	SY5000	SY7000
NII	ø8	ø10	ø12
N	ø5/16"	ø3/8"	ø1/2"

* For N, sizes are in inches.

7 Mounting

NII	Direct mounting
D	DIN rail mounting (With DIN rail)
D0	DIN rail mounting (Without DIN rail)
D3	For 3 stations
⋮	⋮
⋮	Specify a length longer than that of the standard rail.
D16	For 16 stations

* Refer to page 708 for the fixation of DIN rail mounting type manifold.

For details on the EX126 Integrated Type (For Output) Serial Transmission System, refer to the **Web Catalog** and the Operation Manual. For the part numbers of the SI units to be mounted, refer to page 606. Please download the Operation Manual via the SMC website, <https://www.smcworld.com>

How to Order Valves (With mounting screw)

Refer to page 404 for valve specifications.

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Type of actuation

1	2-position	Single
2	2-position	Double
3	3-position	Closed center
4	3-position	Exhaust center
5	3-position	Pressure center
A ^{*1}	4-position dual 3-port	N.C./N.C.
B ^{*1}		N.O./N.O.
C ^{*1}		N.C./N.O.

*1 Only the rubber seal type is available for the 4-position dual 3-port valve.

3 Seal type

0	Rubber seal
1	Metal seal

4 Pilot type

NII	Internal pilot
R	External pilot

* When selecting the external pilot specification for the 4-position dual 3-port valve, pay attention to the pilot pressure. Refer to the valve specifications on page 404 for further details.

5 Back pressure check valve (Built-in valve type)

NII	None
H	Built-in

* Only the rubber seal type is available. A manifold installed type is available if a back pressure check valve with a metal seal is required. Refer to page 625 for ordering examples. However, it is not recommended to use the built-in valve type and the manifold installed type at the same time because it will reduce the flow.

* The built-in valve type back pressure check valve is not available for the 3-position type or the SY7000.

6 Pilot valve option

NII	Standard (0.7 MPa)
B	Quick response type (0.7 MPa)
K ^{*1}	High pressure type (1.0 MPa)

*1 Only the metal seal type is available for the high pressure type.

7 Coil type

NII	Standard
T	With power saving circuit (Continuous duty type)

* Be sure to select the power saving circuit type if the valve is to be continuously energized for long periods of time.

* Be careful of the energizing time when the power saving circuit is selected. Refer to page 705 for details.

8 Rated voltage

5	24 VDC
---	--------

9 Light/surge voltage suppressor and common specification

Symbol	With light	Surge voltage suppressor	Common specification
R	—	●	Non-polar
U	●		Positive common
S	—		
Z	●		

* Only "Z" type is available with a power saving circuit.

10 Manual override

* Refer to page 423 for the safety slide locking manual override.

11 A, B port size

Thread piping

Symbol	Port size	Applicable series

12 Thread type

NII	Rc
F	G
N	NPT
T	NPTF

* Only NII is available for M5.

13 Type of mounting screw

NII	Round head combination screw
B	Hexagon socket head cap screw
K	Round head combination screw (Drop prevention type)
H	Hexagon socket head cap screw (Drop prevention type)

* For "K" and "H," the valve body cover has a drop prevention construction to stop the mounting screws from falling out when the valve is removed for maintenance, etc.

* **When ordering a valve individually, the base gasket is not included.**

Since the base gasket is attached to the manifold, please order the base gasket separately if it is needed for maintenance. Refer to page 611 for base gasket and mounting screw part numbers.

* "B" and "H" cannot be selected for the individual SUP/EXH spacer assembly or interface regulator.

Type 10
Side Ported

Type 11
Bottom Ported

Plug-in Connector Connecting Base

EX120

SY3000/5000/7000 Series

How to Order Manifolds

Refer to pages 569 (SY5000) and 570 (SY7000) for the dimensions of Type 11/Bottom-ported type.

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Type

10	Side ported
11	Bottom ported*1

*1 The SY5000 manifold base is used for the bottom-ported SY3000. When ordering, refer to the "Plug-in Mixed Mounting Type Manifold" (from page 574).

3 SI unit

0	Without SI unit	
Q	DeviceNet® (Positive common NPN)	
R1	OMRON CompoBus/S	16 outputs
R2	(Positive common NPN)	8 outputs
V	CC-Link (Positive common NPN)	
ZB*1	CompoNet®	Positive common NPN
ZBN*1		Negative common PNP

- *1 The communication connector (for the opposite side) is not provided. Please order it separately.
- * Ensure a match with the common specification of the valve to be used.

4 Valve stations

Symbol	Stations	Note
02	2 stations	Double wiring*1
:	:	
08	8 stations	
02	2 stations	Specified layout*2 (Up to 16 solenoids available)
:	:	
:	:	
16	16 stations	

- *1 Double wiring: 2-position single, double, 3-position, and 4-position valves can be used on all manifold stations. Use of a 2-position single solenoid will result in an unused control signal. If this is not desired, order with a specified layout.
- *2 Specified layout. Indicate the wiring specifications on the manifold specification sheet. (Note that 2-position double, 3-position, and 4-position valves cannot be used where single wiring has been specified.)
- * This also includes the number of the blanking plate assembly.
- * Since R2 type SI unit has 8 outputs, note that up to 8 solenoids can be accommodated.

How to Order Manifold Assembly

Example (SS5Y3-10S3V-□)

SS5Y3-10S3V-05D-C6 ... 1 set (Type 10 5-station manifold base part no.)

- *SY3100-5U1 3 sets (2-position single part no.)
- *SY3200-5U1 1 set (2-position double part no.)
- *SY3300-5U1 1 set (3-position closed center part no.)

↳ The asterisk denotes the symbol for the assembly. Prefix it to the part numbers of the valve, etc.

- For the valve arrangement, the valve closest to the D side is considered the 1st station.
- Under the manifold part number, state the valves to be mounted in order starting with the 1st station as shown in the figure above. If the arrangement becomes too complicated, specify the details on a manifold specification sheet.

* When mixing top-ported configurations, select from those listed on page 557. In such cases, use caution as there is also output on the A and B ports on the base side. Specify on the manifold specification sheet if plugs are required for the A and B ports on the base side.

5 P, E port entry

U	U side (2 to 10 stations)
D	D side (2 to 10 stations)
B	Both sides (2 to 16 stations)

6 SUP/EXH block assembly

Nil	Internal pilot
S	Internal pilot, Built-in silencer
R	External pilot

* 3/5(E) port is plugged for the built-in silencer type.

For details on the EX120 Integrated Type (For Output) Serial Transmission System, refer to the **Web Catalog** and the Operation Manual. For the part numbers of the SI units to be mounted, refer to page 607. Please download the Operation Manual via the SMC website, <https://www.smcworld.com>

7 A, B port size (Metric/One-touch fitting)

Symbol	A, B port	Type 10/Side ported			Type 11/Bottom ported		
		SY3000	SY5000	SY7000	SY5000	SY7000

		ø6	●	●	●	—	—
		ø8	—	—	●	—	—
		ø10	—	—	—	●	—
		ø12	—	—	—	—	●
		ø12	—	—	—	—	—
	Downward	ø4	●	●	—	—	—
		ø6	●	●	●	—	—
		ø8	—	—	●	—	—
		ø10	—	—	—	●	—
		ø12	—	—	—	—	●
		ø12	—	—	—	—	—
LM ^{*1}	Elbow port, mixed sizes (including upward and downward piping)	●	●	●	—	—	
P, E port size (One-touch fittings)		ø8	ø10	ø12	ø10	ø12	

*1 Indicate the sizes on the manifold specification sheet in the case of "CM" or "LM."

The direction of P, E port fittings is the same as for the A, B port. If selecting "LM," indicate it on the manifold specification sheet for the P, E port fitting direction.

*2 To avoid interference with the body or piping, select a downward elbow port when mounting the optional spacer assembly (pages 617 to 619).

8 Mounting and Option

Symbol	Mounting	Option	
		Name plate	Station number
N11	Direct mounting	—	—
AA		●	●
BA		●	—
D□	DIN rail mounting	—	—
A□		●	●
B□		●	—

* Enter the number of stations inside □ when it is larger than the number of valve stations. (Refer to "DIN Rail Option" below.)

* Only direct mounting is available for the type 11 bottom-ported type.

* Refer to page 708 for the fixation of DIN rail mounting type manifold.

DIN Rail Option

N11	Standard length	
0	Without DIN rail (with bracket)	
3	For 3 stations	Specify a longer rail than the total length of specified stations.
:	:	
16	For 16 stations	

* If the DIN rail must be mounted without an SI unit, select D0. Then, refer to L3 of the dimensions for the DIN rail length and order separately. (Refer to page 616 for the DIN rail part number.)

A, B port size (Inch/One-touch fitting)

SY3000/5000/7000 Series

How to Order Valves (With mounting screw)

Refer to page 404 for valve specifications.

• Base mounted

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Type of actuation

1	2-position	Single
2		Double
3	3-position	Closed center
4		Exhaust center
5		Pressure center
A ^{*1}	4-position	N.C./N.C.
B ^{*1}	dual 3-port	N.O./N.O.
C ^{*1}		N.C./N.O.

*1 Only the rubber seal type is available for the 4-position dual 3-port valve.

3 Seal type

0	Rubber seal
1	Metal seal

4 Pilot type

Nil	Internal pilot
R	External pilot

* When selecting the external pilot specification for the 4-position dual 3-port valve, pay attention to the pilot pressure. Refer to the valve specifications on page 404 for further details.

5 Back pressure check valve (Built-in valve type)

Nil	None
H	Built-in

* Only the rubber seal type is available. A manifold installed type is available if a back pressure check valve with a metal seal is required. Refer to page 625 for ordering examples. However, it is not recommended to use the built-in valve type and the manifold installed type at the same time because it will reduce the flow.

* The built-in valve type back pressure check valve is not available for the 3-position type or the SY7000.

6 Pilot valve option

Nil	Standard (0.7 MPa)
B	Quick response type (0.7 MPa)
K ^{*1}	High pressure type (1.0 MPa)

*1 Only the metal seal type is available for the high pressure type.

7 Coil type

Nil	Standard
T	With power saving circuit (Continuous duty type)

* Be sure to select the power saving circuit type if the valve is to be continuously energized for long periods of time.

* Be careful of the energizing time when the power saving circuit is selected. Refer to page 705 for details.

8 Rated voltage

5	24 VDC
---	--------

9 Light/surge voltage suppressor and common specification

Symbol	With light	Surge voltage suppressor	Common specification
R	—	●	Non-polar
U	●		
S	—		
Z	●		Positive common
NS	—		Negative common
NZ	●		

* Select "R," "U," "S," or "Z" for the valve when the SI unit specification is positive common. Select "R," "U," "NS," or "NZ" for the valve when the SI unit specification is ZBN (negative common).

* Only "Z" and "NZ" types are available with a power saving circuit.

10 Manual override

* Refer to page 423 for the safety slide locking manual override.

11 Type of mounting screw

Nil	Round head combination screw
B	Hexagon socket head cap screw
K	Round head combination screw (Drop prevention type)
H	Hexagon socket head cap screw (Drop prevention type)

* For "K" and "H," the valve body cover has a drop prevention construction to stop the mounting screws from falling out when the valve is removed for maintenance, etc.

* **When ordering a valve individually, the base gasket is not included.**

Since the base gasket is attached to the manifold, please order the base gasket separately if it is needed for maintenance. Refer to page 611 for base gasket and mounting screw part numbers.

* "B" and "H" cannot be selected for the individual SUP/EXH spacer assembly, interface regulator, or double check spacer assembly with residual pressure release valve.

SY3000/5000/7000 Series

How to Order Manifolds

Refer to pages 571 to 573 for the dimensions of Type 12/Top ported type.

SS5Y **3** - 12S3 **R1** - **05** **U** -

① ② ③ ④ ⑤ ⑥ ⑦

① Series

3	SY3000
5	SY5000
7	SY7000

② SI unit

0	Without SI unit	
Q	DeviceNet® (Positive common NPN)	
R1	OMRON CompoBus/S	16 outputs
R2	(Positive common NPN)	8 outputs
V	CC-Link (Positive common NPN)	
ZB ⁻¹	CompoNet®	Positive common NPN
ZBN ⁻¹		Negative common PNP

*1 The communication connector (for the opposite side) is not provided. Please order it separately.

* Ensure a match with the common specification of the valve to be used.

③ Valve stations

Symbol	Stations	Note
02	2 stations	Double wiring* ¹
⋮	⋮	
08	8 stations	
02	2 stations	Specified layout* ² (Up to 16 solenoids available)
⋮	⋮	
16	16 stations	

*1 Double wiring: 2-position single, double, 3-position, and 4-position valves can be used on all manifold stations.

Use of a 2-position single solenoid in an unused control signal. If this is not desired, order with a specified layout.

*2 Specified layout. Indicate the wiring specifications on the manifold specification sheet. (Note that 2-position double, 3-position, and 4-position valves cannot be used where single wiring has been specified.)

* This also includes the number of the blanking plate assembly.

* Since R2 type SI unit has 8 outputs, note that up to 8 solenoids can be accommodated.

④ P, E port entry

U ⁻¹	U side (2 to 10 stations)
D ⁻¹	D side (2 to 10 stations)
B	Both sides (2 to 16 stations)

*1 ④ For type "S", SUP/EXH block assembly with a built-in silencer, choose U or D for P, E port entry.

⑤ SUP/EXH block assembly

Nii	Internal pilot
S	Internal pilot, Built-in silencer
R	External pilot

* The P and E ports are only available on the U and D sides for the built-in silencer type. 3/5(E) port is plugged. The silencer exhaust port is located on the opposite side of the P and E port entry. (Example: When the P and E port entry is on the D side, the silencer exhaust port is on the U side.)

How to Order Manifold Assembly

Example (SS5Y3-12S3V-□)

SS5Y3-12S3V-05D ... 1 set (Type 12 5-station manifold base part no.)
 *SY3130-5U1-C6 3 sets (2-position single part no.)
 *SY3230-5U1-C6 1 set (2-position double part no.)
 *SY3330-5U1-C6 1 set (3-position closed center part no.)

The asterisk denotes the symbol for the assembly. Prefix it to the part numbers of the valve, etc.

- For the valve arrangement, the valve closest to the D side is considered the 1st station.
- Under the manifold part number, state the valves to be mounted in order starting with the 1st station as shown in the figure above. If the arrangement becomes too complicated, specify the details on a manifold specification sheet.

⑥ P, E port size (One-touch fittings)

Symbol	SY3000	SY5000	SY7000
Nii	ø8	ø10	ø12
N	ø5/16"	ø3/8"	ø1/2"

* For N, sizes are in inches.

⑦ Mounting

Nii	Direct mounting	
D	DIN rail mounting (With DIN rail)	
D0	DIN rail mounting (Without DIN rail)	
D3	For 3 stations	Specify a length longer than that of the standard rail.
⋮	⋮	
D16	For 16 stations	

* If the DIN rail must be mounted without an SI unit, select D0. Then, refer to L3 of the dimensions for the DIN rail length and order separately. (Refer to page 616 for the DIN rail part number.)

* Refer to page 708 for the fixation of DIN rail mounting type manifold.

For details on the EX120 Integrated Type (For Output) Serial Transmission System, refer to the **Web Catalog** and the Operation Manual. For the part numbers of the SI units to be mounted, refer to page 607. Please download the Operation Manual via the SMC website, <https://www.smccworld.com>

How to Order Valves (With mounting screw)

Refer to page 404 for valve specifications.

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Type of actuation

1	Single
2	2-position
3	Double
4	Closed center
5	Exhaust center
6	Pressure center
A ⁻¹	4-position dual 3-port
B ⁻¹	
C ⁻¹	

*1 Only the rubber seal type is available for the 4-position dual 3-port valve.

3 Seal type

0	Rubber seal
1	Metal seal

4 Pilot type

NII	Internal pilot
R	External pilot

* When selecting the external pilot specification for the 4-position dual 3-port valve, pay attention to the pilot pressure. Refer to the valve specifications on page 404 for further details.

5 Back pressure check valve (Built-in valve type)

NII	None
H	Built-in

* Only the rubber seal type is available. A manifold installed type is available if a back pressure check valve with a metal seal is required. Refer to page 625 for ordering examples. However, it is not recommended to use the built-in valve type and the manifold installed type at the same time because it will reduce the flow.

* The built-in valve type back pressure check valve is not available for the 3-position type or the SY7000.

6 Pilot valve option

NII	Standard (0.7 MPa)
B	Quick response type (0.7 MPa)
K ⁻¹	High pressure type (1.0 MPa)

*1 Only the metal seal type is available for the high pressure type.

7 Coil type

NII	Standard
T	With power saving circuit (Continuous duty type)

* Be sure to select the power saving circuit type if the valve is to be continuously energized for long periods of time.
* Be careful of the energizing time when the power saving circuit is selected. Refer to page 705 for details.

8 Rated voltage

5	24 VDC
---	--------

9 Light/surge voltage suppressor and common specification

Symbol	With light	Surge voltage suppressor	Common specification
R	—	●	Non-polar
U	●		
S	—		
Z	●		Positive common
NS	—		
NZ	●		

* Select "R," "U," "S," or "Z" for the valve when the SI unit specification is positive common. Select "R," "U," "NS," or "NZ" for the valve when the SI unit specification is ZBN (negative common).
* Only "Z" and "NZ" types are available with a power saving circuit.

10 Manual override

* Refer to page 423 for the safety slide locking manual override.

11 A, B port size

Thread piping

Symbol	Port size	Applicable series
M5	M5 x 0.8	SY3000
O1	1/8	SY5000
O2	1/4	SY7000

One-touch fitting (Metric)

Symbol	A, B port	SY3000	SY5000	SY7000
C2	ø2	●	—	—
C3	ø3.2	●	—	—
C4	ø4	●	●	—
C6	ø6	●	●	●
C8	ø8	—	●	●
C10	ø10	—	—	●
C12	ø12	—	—	●

One-touch fitting (Inch)

Symbol	A, B port	SY3000	SY5000	SY7000
N1	ø1/8"	●	—	—
N3	ø5/32"	●	●	—
N7	ø1/4"	●	●	●
N9	ø5/16"	—	●	●
N11	ø3/8"	—	—	●

12 Thread type

NII	Rc
F	G
N	NPT
T	NPTF

* Only NII is available for M5.

13 Type of mounting screw

NII	Round head combination screw
B	Hexagon socket head cap screw
K	Round head combination screw (Drop prevention type)
H	Hexagon socket head cap screw (Drop prevention type)

* For "K" and "H," the valve body cover has a drop prevention construction to stop the mounting screws from falling out when the valve is removed for maintenance, etc.

* **When ordering a valve individually, the base gasket is not included.**

Since the base gasket is attached to the manifold, please order the base gasket separately if it is needed for maintenance. Refer to page 611 for base gasket and mounting screw part numbers.

* "B" and "H" cannot be selected for the individual SUP/EXH spacer assembly or interface regulator.

Type 10
Side Ported

Type 11
Bottom Ported

Plug-in Connector Connecting Base

EX180

SY3000/5000/7000 Series

How to Order Manifolds

Refer to pages 569 (SY5000) and 570 (SY7000) for the dimensions of Type 11/Bottom-ported type.

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Type

10	Side ported
11	Bottom ported*1

*1 The SY5000 manifold base is used for the bottom ported SY3000. When ordering, refer to the "Plug-in Mixed Mounting Type Manifold" (Refer to page 574).

3 SI unit

0	Without SI unit
Q	DeviceNet®
V	CC-Link

* Only the connector block assembly is mounted for models without an SI unit.

4 SI unit output polarity, Number of outputs

	32 outputs	16 outputs
	Nil	
Without SI unit		
Positive common (NPN)	2	3
Negative common (PNP)	4	5

* When "V" (CC-Link) is selected for the SI unit, only symbol "2" or "4" (32 outputs) can be selected.

* Ensure a match with the common specification of the valves to be used.

5 Communication connector

Nil	T-branch type
A	Straight type

* The communication connector and power connector are shipped together with the manifold. The power connector is only available for the straight type.

* When not selecting an SI unit, the symbol will be "nil."

6 Valve stations

In the case of the 32-output SI unit

Symbol	Stations	Note
02	2 stations	Double wiring*1
⋮	⋮	
16	16 stations	
02	2 stations	Specified layout*2 (Up to 32 solenoids available)
⋮	⋮	
24	24 stations	

In the case of the 16-output SI unit

Symbol	Stations	Note
02	2 stations	Double wiring*1
⋮	⋮	
08	8 stations	
02	2 stations	Specified layout*2 (Up to 16 solenoids available)
⋮	⋮	
16	16 stations	

*1 Double wiring: 2-position single, double, 3-position, and 4-position valves can be used on all manifold stations.

Use of a 2-position single solenoid will result in an unused control signal. If this is not desired, order with a specified layout.

*2 Specified layout: Indicate the wiring specifications on the manifold specification sheet. (Note that 2-position double, 3-position, and 4-position valves cannot be used where single wiring has been specified.)

* This also includes the number of the blanking plate assembly.

* For the product without the SI unit (S80), note the maximum number of solenoids of the SI unit that will be mounted. If the layout is specified, indicate it on the manifold specification sheet.

How to Order Manifold Assembly

Example (SS5Y3-10S8□□□)

SS5Y3-10S8V2-05D-C6 ... 1 set (Type 10 5-station manifold base part no.)
 *SY3100-5U1 3 sets (2-position single part no.)
 *SY3200-5U1 1 set (2-position double part no.)
 *SY3300-5U1 1 set (3-position closed center part no.)

→ The asterisk denotes the symbol for the assembly. Prefix it to the part numbers of the valve, etc.

* For the valve arrangement, the valve closest to the D side is considered the 1st station.
 * Under the manifold part number, state the valves to be mounted in order starting with the 1st station as shown in the figure above. If the arrangement becomes too complicated, specify the details on a manifold specification sheet.

* When mixing top-ported configurations, select from those listed on page 565. In such cases, use caution as there is also output on the A and B ports on the base side. Specify on the manifold specification sheet if plugs are required for the A and B ports on the base side.

7 P, E port entry, SUP/EXH block assembly

P, E port entry	Internal pilot	Internal pilot, Built-in silencer	External pilot
U side (2 to 10 stations)	U	C	G
D side (2 to 10 stations)	D	E	H
Both sides (2 to 24 stations)	B	F	J

* 3/5(E) port is plugged for the built-in silencer type.

* When the built-in silencer type is used, keep the exhaust port from coming in direct contact with water or other liquids.

For details on the EX180 Integrated Type (For Output) Serial Transmission System, refer to the **Web Catalog** and the Operation Manual. For the part numbers of the SI units to be mounted, refer to page 608. Please download the Operation Manual via the SMC website:
<https://www.smcworld.com>

8 A, B port size (Metric/One-touch fitting)

Symbol	A, B port	Type 10/Side ported			Type 11/Bottom ported		
		SY3000	SY5000	SY7000	SY5000	SY7000	
C2 C3 C4 C6 C8 C10 C12	Straight	ø2	●	—	—	—	
		ø3.2	—	—	—	—	
		ø4	●	●	—	●	
		ø6	—	●	●	●	
		ø8	—	●	●	●	
		ø10	—	—	●	—	●
CM ^{*1}	Straight port, mixed sizes	●	●	●	●		
L4 L6 L8 L10 L12 B4 B6 B8 B10 B12	Upward	ø4	●	●	—	—	
		ø6	—	●	●	—	
		ø8	—	●	●	—	
		ø10	—	—	●	—	
		ø12	—	—	●	—	
		ø4	●	●	—	—	
	Downward	ø6	●	●	●	—	
		ø8	—	●	●	—	
		ø10	—	—	●	—	
		ø12	—	—	●	—	
		Elbow port, mixed sizes (including upward and downward piping)		●	●	●	—
		P, E port size (One-touch fittings)		ø8	ø10	ø12	ø10

*1 Indicate the sizes on the manifold specification sheet in the case of "CM" or "LM."

The direction of P, E port fittings is the same as for the A, B port. If selecting "LM," indicate it on the manifold specification sheet for the P, E port fitting direction.

*2 To avoid interference with the body or piping, select a downward elbow port when mounting the optional spacer assembly (pages 617 to 620).

9 Mounting and Option

Symbol	Mounting	Option		DIN Rail Option	
		Name plate	Station number	Nil	Standard length
Nil	Direct mounting	—	—	0	Without DIN rail (with bracket)
AA		●	●	3	For 3 stations
BA		●	—	:	Specify a longer rail than the total length of specified stations.
D□		—	—	24	
A□	DIN rail mounting	●	●		
B□		●	—		

* Enter the number of stations inside □ when it is larger than the number of valve stations. (Refer to "DIN Rail Option" above.)

* Only direct mounting is available for Type 11 (Bottom ported).

* Refer to page 708 for the fixation of DIN rail mounting type manifold.

A, B port size (Inch/One-touch fitting)

How to Order Valves (With mounting screw)

Refer to page 404 for valve specifications.

• Base mounted

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Type of actuation

1	2-position	Single
2		Double
3	3-position	Closed center
4		Exhaust center
5		Pressure center
A*1	4-position dual 3-port	N.C./N.C.
B*1		N.O./N.O.
C*1		N.C./N.O.

*1 Only the rubber seal type is available for the 4-position dual 3-port valve.

3 Seal type

0	Rubber seal
1	Metal seal

4 Pilot type

NII	Internal pilot
R	External pilot

* When selecting the external pilot specification for the 4-position dual 3-port valve, pay attention to the pilot pressure. Refer to the valve specifications on page 404 for further details.

5 Back pressure check valve (Built-in valve type)

NII	None
H	Built-in

* Only the rubber seal type is available. A manifold installed type is available if a back pressure check valve with a metal seal is required. Refer to page 625 for ordering examples. However, it is not recommended to use the built-in valve type and the manifold installed type at the same time because it will reduce the flow.

* The built-in valve type back pressure check valve is not available for the 3-position type or the SY7000.

6 Pilot valve option

NII	Standard (0.7 MPa)
B	Quick response type (0.7 MPa)
K*1	High-pressure type (1.0 MPa)

*1 Only the metal seal type is available for the high-pressure type.

7 Coil type

NII	Standard
T	With power-saving circuit (Continuous duty type)

* Be sure to select the power-saving circuit type when the valve is to be continuously energized for long periods of time.

* Be careful of the energizing time when the power-saving circuit is selected. Refer to page 705 for details.

8 Rated voltage

5	24 VDC
---	--------

9 Light/surge voltage suppressor and common specification

Symbol	With light	Surge voltage suppressor	Common specification	
R	—	●	Non-polar	
U	●			
S	—		Positive common	
Z	●			
NS	—			Negative common
NZ	●			

* Select "R," "U," "S," or "Z" for the valve when the SI unit output polarity is positive common. Select "R," "U," "NS," or "NZ" for the valve when the SI unit output polarity is negative common.

* Only "Z" and "NZ" are available with a power-saving circuit.

10 Manual override

* Refer to page 423 for the safety slide locking manual override.

11 Type of mounting screw

NII	Round head combination screw
B	Hexagon socket head cap screw
K	Round head combination screw (Drop prevention type)
H	Hexagon socket head cap screw (Drop prevention type)

* For "K" and "H," the valve body cover has a drop prevention construction to stop the mounting screws from falling out when the valve is removed for maintenance, etc.

* **When ordering a valve individually, the base gasket is not included.** Since the base gasket is attached to the manifold, please order the base gasket separately if it is needed for maintenance. Refer to page 611 for base gasket and mounting screw part numbers.

* "B" and "H" cannot be selected for the individual SUP/EXH spacer assembly, interface regulator, or double check spacer assembly with residual pressure release valve.

Plug-in Connector Connecting Base

EX180

Type 12
Top Ported

SY3000/5000/7000 Series

How to Order Manifolds

Refer to pages 571 to 573 for the dimensions of Type 12/Top ported type.

① Series

3	SY3000
5	SY5000
7	SY7000

③ SI unit output polarity, Number of outputs

	32 outputs	16 outputs
Without SI unit	Nil	
Positive common (NPN)	2	3
Negative common (PNP)	4	5

- * When "V" (CC-Link) is selected for the SI unit, only symbol "2" or "4" (32 outputs) can be selected.
- * Ensure a match with the common specification of the valves to be used.

⑥ P, E port entry, SUP/EXH block assembly

P, E port entry	Internal pilot	Internal pilot, Built-in silencer	External pilot
U side (2 to 10 stations)	U	C* ¹	G
D side (2 to 10 stations)	D	E* ¹	H
Both sides (2 to 24 stations)	B	—	J

- *1 For SUP/EXH block assembly specifications, built-in silencer types will have P port entry stipulated.
- * For built-in silencer type, P and E ports are available on U and D sides. 3/5(E) port is plugged. The silencer exhaust port is located on the opposite side of P, E port entry. (Example: When the P, E port entry is D side, the silencer exhaust port is U side.)
- * When the built-in silencer type is used, keep the exhaust port from coming in direct contact with water or other liquids.

② SI unit

0	Without SI unit
Q	DeviceNet®
V	CC-Link

- * Only the connector block assembly is mounted for models without an SI unit.

④ Communication connector

Nil	T-branch type
A	Straight type

- * The communication connector and power connector are shipped together with the manifold. The power connector is only available for the straight type.
- * When not selecting an SI unit, the symbol will be "nil."

⑤ Valve stations

In the case of the 32-output SI unit

Symbol	Stations	Note
02	2 stations	Double wiring* ¹
:	:	
16	16 stations	
02	2 stations	Specified layout* ² (Up to 32 solenoids available)
:	:	
24	24 stations	

In the case of the 16-output SI unit

Symbol	Stations	Note
02	2 stations	Double wiring* ¹
:	:	
08	8 stations	
02	2 stations	Specified layout* ² (Up to 16 solenoids available)
:	:	
16	16 stations	

- *1 Double wiring: 2-position single, double, 3-position, and 4-position valves can be used on all manifold stations. Use of a 2-position single solenoid will result in an unused control signal. If this is not desired, order with a specified layout.
- *2 Specified layout: Indicate the wiring specifications on the manifold specification sheet. (Note that 2-position double, 3-position, and 4-position valves cannot be used where single wiring has been specified.)
- * This also includes the number of the blanking plate assembly.
- * For the product without the SI unit (S80), note the maximum number of solenoids of the SI unit that will be mounted. If the layout is specified, indicate it on the manifold specification sheet.

How to Order Manifold Assembly

Example (SS5Y3-12S8□-□)

SS5Y3-12S8V2-05D 1 set (Type 10 5-station manifold base part no.)
 *SY3130-5U1-C6 3 sets (2-position single part no.)
 *SY3230-5U1-C6 1 set (2-position double part no.)
 *SY3330-5U1-C6 1 set (3-position closed center part no.)
 → The asterisk denotes the symbol for the assembly.
 Prefix it to the part numbers of the valve, etc.

- * For the valve arrangement, the valve closest to the D side is considered the 1st station.
- * Under the manifold part number, state the valves to be mounted in order starting with the 1st station as shown in the figure above. If the arrangement becomes too complicated, specify the details on a manifold specification sheet.

⑦ P, E port size (One-touch fittings)

Symbol	SY3000	SY5000	SY7000
Nil	ø8	ø10	ø12
N	ø5/16"	ø3/8"	ø1/2"

- * For N, sizes are in inches.

⑧ Mounting

Nil	Direct mounting
D	DIN rail mounting (With DIN rail)
D0	DIN rail mounting (Without DIN rail)
D3	Specify a longer rail than the standard length.
:	:
D24	For 24 stations

- * Refer to page 708 for the fixation of DIN rail mounting type manifold.

For details on the EX180 Integrated Type (For Output) Serial Transmission System, refer to the **Web Catalog** and the Operation Manual. For the part numbers of the SI units to be mounted, refer to page 608. Please download the Operation Manual via the SMC website: <https://www.smcworld.com>

Refer to page 404 for valve specifications.

How to Order Valves (With mounting screw)

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Type of actuation

1	2-position	Single
2		Double
3	3-position	Closed center
4		Exhaust center
5		Pressure center
A*1	4-position dual 3-port	N.C./N.C.
B*1		N.O./N.O.
C*1		N.C./N.O.

*1 Only the rubber seal type is available for the 4-position dual 3-port valve.

3 Seal type

0	Rubber seal
1	Metal seal

4 Pilot type

NII	Internal pilot
R	External pilot

* When selecting the external pilot specification for the 4-position dual 3-port valve, pay attention to the pilot pressure. Refer to the valve specifications on page 404 for further details.

5 Back pressure check valve (Built-in valve type)

NII	None
H	Built-in

* Only the rubber seal type is available. A manifold installed type is available if a back pressure check valve with a metal seal is required. Refer to page 625 for ordering examples. However, it is not recommended to use the built-in valve type and the manifold installed type at the same time because it will reduce the flow.

* The built-in valve type back pressure check valve is not available for the 3-position type or the SY7000.

6 Pilot valve option

NII	Standard (0.7 MPa)
B	Quick response type (0.7 MPa)
K*1	High-pressure type (1.0 MPa)

*1 Only the metal seal type is available for the high-pressure type.

7 Coil type

NII	Standard
T	With power-saving circuit (Continuous duty type)

* Be sure to select the power-saving circuit type when the valve is to be continuously energized for long periods of time.

* Be careful of the energizing time when the power-saving circuit is selected. Refer to page 705 for details.

8 Rated voltage

5	24 VDC
---	--------

9 Light/surge voltage suppressor and common specification

Symbol	With light	Surge voltage suppressor	Common specification
R	—	●	Non-polar
U	●		
S	—		Positive common
Z	●		
NS	—		
NZ	●		

* Select "R," "U," "S," or "Z" for the valve when the SI unit output polarity is positive common. Select "R," "U," "NS," or "NZ" for the valve when the SI unit output polarity is negative common.

* Only "Z" and "NZ" are available with a power-saving circuit.

10 Manual override

* Refer to page 423 for the safety slide locking manual override.

11 A, B port size

Thread piping

Symbol	Port size	Applicable series
M5	M5 x 0.8	SY3000
O1	1/8	SY5000
O2	1/4	SY7000

One-touch fitting (Metric)

Symbol	A, B port	SY3000	SY5000	SY7000
C2	ø2	●	—	—
C3	ø3.2	●	—	—
C4	ø4	●	●	—
C6	ø6	●	●	●
C8	ø8	—	●	●
C10	ø10	—	—	●
C12	ø12	—	—	●

One-touch fitting (Inch)

Symbol	A, B port	SY3000	SY5000	SY7000
N1	ø1/8"	●	—	—
N3	ø5/32"	●	●	—
N7	ø1/4"	●	●	●
N9	ø5/16"	—	●	●
N11	ø3/8"	—	—	●

12 Thread type

NII	Rc
F	G
N	NPT
T	NPTF

* Only NII is available for M5.

13 Type of mounting screw

NII	Round head combination screw
B	Hexagon socket head cap screw
K	Round head combination screw (Drop prevention type)
H	Hexagon socket head cap screw (Drop prevention type)

* For "K" and "H," the valve body cover has a drop prevention construction to stop the mounting screws from falling out when the valve is removed for maintenance, etc.

* **When ordering a valve individually, the base gasket is not included.**

Since the base gasket is attached to the manifold, please order the base gasket separately if it is needed for maintenance. Refer to page 611 for base gasket and mounting screw part numbers.

* "B" and "H" cannot be selected for the individual SUP/EXH spacer assembly or interface regulator.

Type 10
Side Ported

Type 11
Bottom Ported

SY3000/5000 Series

The SY3000 can be mounted onto the SY5000 size manifold.

How to Order Manifolds

Refer to page 583 for the dimensions of Type 11/ Bottom-ported type.

SS5Y5 - M 10 F 1 - 05 U - C 8 6

Mixed Mounting Type

It is possible to mount the SY3000 size valves on all stations. In this case, there is no need to fill in part ⑥ in the order code. However, the manifold block width should be 12.5 mm.

① Type

10	Side ported
11	Bottom ported

② Connector type

Symbol	Type	Page
F	D-sub connector (25 pins)	IP40 IP67
P		26 pins
PG	Flat ribbon cable	20 pins
PH		10 pins
TC	Terminal block box (Spring type)	448
T	Terminal block box	456
L1	Lead wire	34 cores
L2		17 cores
L3		9 cores
M	Circular connector	476
S□	Serial transmission	EX500 Gateway Decentralized System 2 (128 points)

S□		EX260
S4□ ¹		EX126
S3□ ¹		EX120
S8□		EX180

- *1 EX126, EX120 are not yet UL-compliant.
- * Refer to the pages shown in the table above for details.

③

• With Lead wire

Lead wire length

1	0.6 m
2	1.5 m
3	3 m

• With D-sub connector (IP40/67) and Flat ribbon cable

Connector entry direction

1	Upward
2	Lateral

- * It is not necessary to select the items above for the valve with terminal block box or with circular connector or the serial transmission type.

④ Valve stations

Symbol	Stations	Note
02	2 stations	Some connectors have a limitation on the number of stations. Refer to the pages shown in the table "Connector type" for details.
:	:	
24	24 stations	

⑤ P, E port entry

U	U side (2 to 10 stations)
D	D side (2 to 10 stations)
B	Both sides (2 to 24 stations)

- * Refer to ⑦ on page 502 for the EX600, page 522 for the EX250, and page 558 for the EX180.

⑦ Fitting type: One-touch fitting

Symbol	A, B port	
C	Straight	
L	Metric size	Upward ²
B		Downward ²
N	Straight	
LN	Inch size	Upward ²
BN		Downward ²
CM ¹	Straight	
LM ¹	Elbow (Including upward and downward piping) ²	

- *1 Select CM or LM if mixed port sizes are to be used for each series. (For example, if mixed sizes, such as C6 and C8, are to be used for the SY5000 series) In such cases, indicate the sizes on the manifold specification sheet.
- The direction of P, E port fittings is the same as for the A, B port. If selecting "LM," indicate it on the manifold specification sheet for the P, E port fitting direction.
- *2 To avoid interference with the body or piping, select a downward elbow port when mounting the optional spacer assembly (pages 617 to 619). Elbow fittings are not available for Type 11 (Bottom ported).
- * Elbow fittings: $\phi 2$, $\phi 3.2$, and $\phi 1.8"$ are not available for the SY3000 series. $\phi 2$, $\phi 3.2$, $\phi 1.8"$, and $\phi 5/32"$ are not available for the SY5000 series.

(Inch/One-touch fitting)

Symbol	Port size
1	ø1/8"
3	ø5/32"
7	ø1/4"
9	ø5/16"*1

*1 The valve pitch is the same as that of the SY5000.
 * No symbol needs to be specified when fitting type "CM" or "LM" is selected.

10 Mounting

Symbol	Mounting
Nil	Direct mounting
D	DIN rail mounting (With DIN rail)
D0	DIN rail mounting (Without DIN rail)
D3	For 3 stations Specify a length longer than that of the standard rail. [The SY5000 valve is now at a mountable length (manifold block length of 16 mm).]
⋮	⋮
D24	For 24 stations

* Only direct mounting is available for the type 11 bottom-ported type.
 * Refer to page 581 to determine the L3 using "Calculation formula" for the DIN rail length.
 * Refer to page 708 for the fixation of DIN rail mounting type manifold.

How to Order Manifold Assembly

Example (SS5Y5-M10F1-□)

SS5Y5-M10F1-05D-C86 ... 1 set (Type M10 5-station manifold base part no.)
 *SY5200-5U1 3 sets (2-position double part no.)
 *SY3200-5U1 2 sets (2-position double part no.)
 * The asterisk denotes the symbol for the assembly.
 Prefix it to the part numbers of the valve, etc.

* For the valve arrangement, the valve closest to the D side is considered the 1st station.
 * Under the manifold part number, state the valves to be mounted in order starting with the 1st station as shown in the figure above. If the arrangement becomes too complicated, specify the details on a manifold specification sheet.

* When mixing top-ported configurations, select from those listed on page 587. In such cases, use caution as there is also output on the A and B ports on the base side.
 Specify on the manifold specification sheet if plugs are required for the A and B ports on the base side.

How to Order Valves (With mounting screw) Refer to page 404 for valve specifications.

• Base mounted

① Series

3	SY3000
5	SY5000

② Type of actuation

1		Single
2	2-position	Double
3		Closed center
4	3-position	Exhaust center
5		Pressure center
A ^{*1}	4-position	N.C./N.C.
B ^{*1}	dual 3-port	N.O./N.O.
C ^{*1}		N.C./N.O.

*1 Only the rubber seal type is available for the 4-position dual 3-port valve.

③ Seal type

0	Rubber seal
1	Metal seal

④ Pilot type

NII	Internal pilot
R	External pilot

* When selecting the external pilot specification for the 4-position dual 3-port valve, pay attention to the pilot pressure. Refer to the valve specifications on page 404 for further details.

⑤ Back pressure check valve (Built-in valve type)

NII	None
H	Built-in

* Only the rubber seal type is available. A manifold installed type is available if a back pressure check valve with a metal seal is required. Refer to page 625 for ordering examples. However, it is not recommended to use the built-in valve type and the manifold installed type at the same time because it will reduce the flow.

* The built-in valve type back pressure check valve is not available for the 3-position type.

⑥ Pilot valve option

NII	Standard (0.7 MPa)
B	Quick response type (0.7 MPa)
K ^{*1}	High pressure type (1.0 MPa)

*1 Only the metal seal type is available for the high pressure type.

⑦ Coil type

NII	Standard
T	With power saving circuit (Continuous duty type)

* Be sure to select the power saving circuit type if the valve is to be continuously energized for long periods of time.

* Be careful of the energizing time when the power saving circuit is selected. Refer to page 705 for details.

⑧ Rated voltage

5	24 VDC
6	12 VDC

* Only 24 VDC is available for the serial transmission type.

⑨ Light/surge voltage suppressor and common specification

Symbol	With light	Surge voltage suppressor	Common specification
NII	—	—	Non-polar
R	—	—	
U	●	—	
S	—	●	Positive common
Z	●		Negative common
NS	—		—
NZ	●	—	—

* "NII" is not available for the SI unit manifold.

* For the non-polar type, be careful of surge voltage intrusion. Refer to page 706 for details. (Excludes when an SI unit manifold is used)

* Only "Z" and "NZ" types are available with a power saving circuit. Select a valve which is suited to the SI unit output polarity or SI unit specification when the SI unit is selected. Refer to the pages below for details.

EX500: p. 488	EX600: p. 504
EX24S: p. 514	EX250: p. 524
EX260: p. 532	EX126: p. 544
EX120: p. 552	EX180: p. 558

⑩ Manual override

* Refer to page 423 for the safety slide locking manual override.

⑪ Type of mounting screw

NII	Round head combination screw
B	Hexagon socket head cap screw
K	Round head combination screw (Drop prevention type)
H	Hexagon socket head cap screw (Drop prevention type)

* For "K" and "H," the valve body cover has a drop prevention construction to stop the mounting screws from falling out when the valve is removed for maintenance, etc.

* **When ordering a valve individually, the base gasket is not included.**

Since the base gasket is attached to the manifold, please order the base gasket separately if it is needed for maintenance. Refer to page 611 for base gasket and mounting screw part numbers.

* "B" and "H" cannot be selected for the individual SUP/EXH spacer assembly, interface regulator, or double check spacer assembly with residual pressure release valve.

Plug-in Connector Connecting Base: Plug-in Mixed Mounting Type Manifold

D-sub Connector (IP40/67) Flat Ribbon Cable Terminal Block Box/Spring Type (IP67)

Plug-in Connector Connecting Base

Type 11/Bottom Ported Mixed Mounting Type

SS5Y5-M11 □ - [Stations] $\frac{U}{D}$

Calculation formula for dimensions

$$L1 = 12.5 \times n1 + 16 \times n2 + a + b \times n3$$

$$L2 = 12.5 \times n1 + 16 \times n2 + 48$$

$$L6 = b \times n3 + c$$

- n1: Number of valve stations of the SY3000
- n2: Number of valve stations of the SY5000 (Including the stations of the SY3000: ø8, ø5/16")
- n3: Number of I/O units or input block stations

* Refer to pages 507 and 508 for dimensions of the EX600 serial transmission with I/O unit and page 526 for the EX250 serial transmission with input block when L, b, and c are used for the calculation formula.

SY3000/5000/7000 Series

For the SY5000 series, the SY5000 and the SY3000 can be mounted on the same manifold.
 For the SY7000 series, the SY7000 and the SY5000 can be mounted on the same manifold.

How to Order Manifolds

Refer to pages 572 and 573 for the dimensions of Type 12/Top ported type.

Mixed Mounting Type

For the SY5000 series, it is possible to mount the SY3000 size valves on all stations. However, the SY3000 manifold block width should be 12.5 mm. (16 mm for ø8 or ø5/16" One-touch fitting)
 Also, for the SY7000 series, it is possible to mount the SY5000 size valves on all stations. However, the SY3000 cannot be mounted onto the SY7000 series.

1 Series

5	SY5000
7	SY7000

3

• With Lead wire

Lead wire length

1	0.6 m
2	1.5 m
3	3 m

• With D-sub connector (IP40/67) and Flat ribbon cable

Connector entry direction

1	Upward
2	Lateral

* It is not necessary to select the items above for the valve with terminal block box or with circular connector or the serial transmission type.

4 Valve stations

Symbol	Stations	Note
02	2 stations	Some connectors have a limitation on the number of stations. Refer to the pages shown in the table "Connector type" for details.
⋮	⋮	
24	24 stations	

7 P, E port size (One-touch fittings)

Symbol	SY5000	SY7000	Note
NII	ø10	ø12	Metric size
N	ø3/8"	ø1/2"	Inch size

2 Connector type

Symbol	Type	Page	
F	D-sub connector (25 pins)	442	
FW	IP40		
P	26 pins		
PG	20 pins		
PH	10 pins	453	
TC	Terminal block box (Spring type)		
T	Terminal block box	462	
L1	Lead wire	34 cores	
L2		17 cores	472
L3		9 cores	
M	Circular connector	482	
S□	Serial transmission	EX500 Gateway Decentralized System 2 (128 points)	498
S6□		EX600	
SA□		EX245	512
S□		EX250	528
S□		EX260	540
S4□*1		EX126	548
S3□*1		EX120	556
S8□		EX180	558

*1 EX126, EX120 are not yet UL-compliant.
 * Refer to the pages shown in the table above for details.

5 P, E port entry

U*1	U side (2 to 10 stations)
D*1	D side (2 to 10 stations)
B	Both sides (2 to 24 stations)

*1 For type "S", SUP/EXH block assembly with a built-in silencer, choose U or D for P, E port entry.

* Refer to page 512 for the EX600 and 6 for page 528 for the EX250.

6 SUP/EXH block assembly

NII	Internal pilot
S	Internal pilot, Built-in silencer
R	External pilot

* The P and E ports are only available on the U and D sides for the built-in silencer type. 3/5(E) port is plugged. The silencer exhaust port is located on the opposite side of the P and E port entry. (Example: When the P and E port entry is on the D side, the silencer exhaust port is on the U side.)

* Refer to page 512 for the EX600 and 6 for page 528 for the EX250.

8 Mounting

NII	Direct mounting	
D	DIN rail mounting (With DIN rail)	
D0	DIN rail mounting (Without DIN rail)	
D3	For 3 stations	Specify a length longer than that of the standard rail.
⋮	⋮	[For the SS5Y5-M12, the SY5000 valve is now at a mountable length (manifold block length of 16 mm).]
D24	For 24 stations	

* Refer to page 588 to determine the L3 using "Calculation formula" for the DIN rail length. (For the SY3000 and SY5000 mixed mounting type)

* Refer to page 708 for the fixation of DIN rail mounting type manifold.

How to Order Manifold Assembly

Example (SS5Y5-M12F1-□)

SS5Y5-M12F1-05D ... 1 set (Type M12 5-station manifold base part no.)
 SY5230-5U1-C8 3 sets (2-position double part no.)
 SY3230-5U1-C6 2 sets (2-position double part no.)
 The asterisk denotes the symbol for the assembly.
 Prefix it to the part numbers of the valve, etc.

• For the valve arrangement, the valve closest to the D side is considered the 1st station.
 • Under the manifold part number, state the valves to be mounted in order starting with the 1st station as shown in the figure above. If the arrangement becomes too complicated, specify the details on a manifold specification sheet.

How to Order Valves (With mounting screw)

Refer to page 404 for valve specifications.

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Type of actuation

1	Single
2	2-position
3	Double
4	3-position
5	Closed center
	Exhaust center
	Pressure center
A ⁻¹	N.C./N.C.
B ⁻¹	N.O./N.O.
C ⁻¹	N.C./N.O.

*1 Only the rubber seal type is available for the 4-position dual 3-port valve.

3 Seal type

0	Rubber seal
1	Metal seal

4 Pilot type

NII	Internal pilot
R	External pilot

* When selecting the external pilot specification for the 4-position dual 3-port valve, pay attention to the pilot pressure. Refer to the valve specifications on page 404 for further details.

5 Back pressure check valve (Built-in valve type)

NII	None
H	Built-in

* Only the rubber seal type is available. A manifold installed type is available if a back pressure check valve with a metal seal is required. Refer to page 625 for ordering examples. However, it is not recommended to use the built-in valve type and the manifold installed type at the same time because it will reduce the flow.

* The built-in valve type back pressure check valve is not available for the 3-position type or the SY7000.

6 Pilot valve option

NII	Standard (0.7 MPa)
B	Quick response type (0.7 MPa)
K ⁻¹	High pressure type (1.0 MPa)

*1 Only the metal seal type is available for the high pressure type.

7 Coil type

NII	Standard
T	With power saving circuit (Continuous duty type)

* Be sure to select the power saving circuit type if the valve is to be continuously energized for long periods of time.
* Be careful of the energizing time when the power saving circuit is selected. Refer to page 705 for details.

8 Rated voltage

5	24 VDC
6	12 VDC

* Only 24 VDC is available for the serial transmission type.

9 Light/surge voltage suppressor and common specification

Symbol	With light	Surge voltage suppressor	Common specification
NII	—	—	Non-polar
R	—	—	
U	●	—	
S	—	●	
Z	●	—	Positive common
NS	—	—	Negative common
NZ	●	—	

* "NII" is not available for the SI unit manifold.
* For the non-polar type, be careful of surge voltage intrusion.
Refer to page 706 for details. (Excludes when an SI unit manifold is used)
* Only "Z" and "NZ" types are available with a power saving circuit. Select a valve which is suited to the SI unit output polarity or SI unit specification when the SI unit is selected.
Refer to the pages below for details.
EX500: p. 499 EX600: p. 513
EX245: p. 514 EX250: p. 529
EX260: p. 541 EX126: p. 549
EX120: p. 557 EX180: p. 558

10 Manual override

* Refer to page 423 for the safety slide locking manual override.

11 A, B port size

Thread piping

Symbol	Port size	Applicable series
M5	M5 x 0.8	SY3000
O1	1/8	SY5000
O2	1/4	SY7000

One-touch fitting (Metric)

Symbol	A, B port	SY3000	SY5000	SY7000
C2	ø2	●	—	—
C3	ø3.2	●	—	—
C4	ø4	●	●	—
C6	ø6	●	●	●
C8	ø8	—	●	●
C10	ø10	—	—	●
C12	ø12	—	—	●

One-touch fitting (Inch)

Symbol	A, B port	SY3000	SY5000	SY7000
N1	ø1/8"	●	—	—
N3	ø5/32"	●	●	—
N7	ø1/4"	—	●	●
N9	ø5/16"	—	●	●
N11	ø3/8"	—	—	●

12 Thread type

NII	Rc
F	G
N	NPT
T	NPTF

* Only NII is available for M5.

13 Type of mounting screw

NII	Round head combination screw
B	Hexagon socket head cap screw
K	Round head combination screw (Drop prevention type)
H	Hexagon socket head cap screw (Drop prevention type)

* For "K" and "H," the valve body cover has a drop prevention construction to stop the mounting screws from falling out when the valve is removed for maintenance, etc.
* When ordering a valve individually, the base gasket is not included. Since the base gasket is attached to the manifold, please order the base gasket separately if it is needed for maintenance. Refer to page 611 for base gasket and mounting screw part numbers.
* "B" and "H" cannot be selected for the individual SUP/EXH spacer assembly or interface regulator.

SY3000/5000/7000 Series

Manifold Exploded View (Common Parts)

Type 10, 11, 12: How to Increase Connector Type Manifolds

1 Loosen the U-side tension bolt (a), and remove the B SUP/EXH end block assembly.

2 Screw in (4) tie-rods for additional stations to the (5) tie-rod of the manifold.

(Screw them in until there is no gap) between the tie-rods.

3 Connect the A manifold block assembly and B SUP/EXH end block assembly to be added, and tighten the tension bolt (a).

Tightening torque for tension bolt (a) (M3): 0.8 N·m

Caution

- Be sure to shut off the power and air supplies before disassembly. Furthermore, since air may remain inside the actuator, piping and manifold, confirm that the air is completely exhausted before performing any work.
- When disassembly and assembly are performed, air leakage may result if the tightening of the tension bolt is inadequate.

■ Cover assembly/Silencer cover assembly/Port block assembly for SUP/EXH (end) block assembly

Mounting screw (M3)

Cover assembly
(Internal pilot)

Silencer cover assembly
(Internal pilot, Built-in silencer)

Port block assembly
(Side/Bottom ported, External pilot, Straight, Downward elbow)

Port block assembly
(Side ported, External pilot, Upward elbow)

Port block assembly
(Top ported, Internal pilot, for silencer (supply side))

Port block assembly
(Top ported, Internal/External pilot)

* Cover assembly, silencer cover assembly, and port block assembly are included in the SUP/EXH (end) block assembly, but they need to be ordered for piping direction change.

Tightening torque for mounting screw
SY3000/5000 (M3): 0.8 N·m
SY7000 (M4): 1.4 N·m

⚠ Caution

1. Be sure to shut off the power and air supplies before disassembly.
Furthermore, since air may remain inside the actuator, piping, and manifold, confirm that the air is completely exhausted before performing any work.
2. When disassembly and assembly are performed, air leakage may result if the tightening of the cover and port block assemblies are inadequate.

⚠ Caution

Tightening torque for mounting screw
M2: 0.16 N·m (SY3000)
M3: 0.8 N·m (SY5000/7000)

Manifold Options

■ Individual SUP spacer assembly

[With a connector gasket, a base gasket, and two mounting screws (3 pcs. for the SY7000)]

When the same manifold is used for different pressures, an individual SUP spacer assembly is used as a supply port for different pressures.

- * When selecting a One-touch fitting elbow type for a spacer assembly, use it faced upward, since it interferes with A and B port piping of Type 10 manifolds.
- * When the elbows are facing upward in A and B ports in Type 10 manifolds, they will interfere with the piping for the spacer assembly. Therefore, combine the A and B ports with straight types or elbows facing downward.

■ Individual EXH spacer assembly

[With a connector gasket, a base gasket, and two mounting screws (3 pcs. for the SY7000)]

When valve exhaust affects other stations due to the circuit configuration, this spacer assembly is used for individual valve exhaust.

- * When selecting a One-touch fitting elbow type for a spacer assembly, use it faced upward, since it interferes with A and B port piping of Type 10 manifolds.
- * When the elbows are facing upward in A and B ports in Type 10 manifolds, they will interfere with the piping for the spacer assembly. Therefore, combine the A and B ports with straight types or elbows facing downward.

* Refer to pages 628 to 630 for dimensions.

How to Order Individual SUP/EXH Spacer Assembly

One-touch fitting Straight type SY **3** OM-**38**-1 A-C**6**

One-touch fitting Elbow type SY **3** OM-**38**-**2** A-L**6**

Series	
3	SY3000
5	SY5000
7	SY7000

Spacer type	
38	Individual SUP spacer
39	Individual EXH spacer

Individual SUP/EXH spacer assembly

2	Short elbow type
3	Long elbow type

- * Select the long elbow type for a 3-position valve when using Type 11 and Type 12 downward. However, Type 11 of the SY3000 series for the mixed mounting of connector connecting bases cannot be used downward.

- * Calculation of effective area S and sonic conductance C: S = 5.0 x C
- * The value is for manifold base with 5 stations, rubber seal, and individually operated 2-position type.
- * For connector connecting base (type 10) manifolds

SY3000/5000/7000 Series

⚠ Caution

Tightening torque for mounting screw
M2: 0.16 N·m (SY3000)
M3: 0.8 N·m (SY5000/7000)

Manifold Options

* Refer to pages 628 to 630 for dimensions.

■ SUP stop valve spacer assembly with residual pressure release valve

[With a connector gasket, a base gasket, and two mounting screws (3 pcs. for the SY7000)]

It is used to shut off the supply air to valves individually.

- * Cannot be selected when the elbows are facing upward in A and B ports in Type 10 manifolds, since they will interfere with the piping for the spacer assembly

Series		Manual override	
3	SY3000	Nil	Push-turn locking slotted type
5	SY5000	E	Push-turn locking lever type
7	SY7000		

- * For lever type:

When locking the lever type manual override, push the lever down in the PUSH position with your fingers until it stops, then turn the lever 90° clockwise. (PUSH → LOCK)

Turning the lever without pushing it down until it stops can cause damage to the manual override and other problems such as air leakages.

To unlock the manual override, turn the lever counterclockwise. (LOCK → PUSH)

[How to mount SUP stop valve spacer assembly with residual pressure release valve]

Insert the SUP stop valve mounting screw from the side of the spacer assembly, and mount it to the manifold.

Tighten the SUP stop valve mounting screw to the specified tightening torque. Mount the valve and tighten the valve mounting screws to the specified tightening torque after mounting the SUP stop valve spacer assembly with residual pressure release valve.

- * Install the plate type nut to the spacer assembly as shown in the figure if it comes off. The SUP stop valve mounting screws can be tightened with a hexagon wrench without removing the plate type nut.
- * When the elbows are facing upward in A and B ports in Type 10 manifolds, they will interfere with the piping for the spacer assembly. Therefore, combine the A and B ports with straight types or elbows facing downward.
- * This product is only for internal pilot specifications, as the external pilot air cannot be shut off.
- * If the product is equipped with a 3-position closed center, residual pressure cannot be released, so use in combination with a 3-port valve, which can be connected to the A, B piping port.

Model	Port size		Flow rate characteristics			
	1, 3/5 (P, E)	4, 2 (A, B)	1 → 4/2 (P → A/B)		4/2 → 3/5 (A/B → E)	
			C [dm ³ /(s·bar)]	b	C [dm ³ /(s·bar)]	b
SY30M-50-1A(E)	C8	C6	0.6	0.18	1.4	0.29
SY50M-50-1A(E)	C10	C8	1.6	0.20	3.1	0.23
SY70M-50-1A(E)	C12	C12	3.1	0.18	4.3	0.32

- * Calculation of effective area S and sonic conductance C: S = 5.0 x C
- * The value is for manifold base with 5 stations, rubber seal, and individually operated 2-position type.
- * For connector connecting base (type 10) manifolds

⚠ Caution

Tightening torque for mounting screw
M2: 0.16 N·m (SY3000)
M3: 0.8 N·m (SY5000/7000)

Manifold Options

* Refer to pages 628 to 630 for dimensions.

■ Double check spacer assembly with residual pressure release valve (Side/Bottom ported)

[With a connector gasket, a base gasket, and two mounting screws (3 pcs. for the SY7000)]

It is used to hold the intermediate position of the cylinder for a long period of time. Use a 3-position exhaust center valve when the double check spacer assembly with residual exhaust valve is used. It can also be used for drop prevention at the cylinder stroke end when supply residual pressure is released by using a 2-position single/double valve.

* When the elbows are facing upward in A and B ports in Type 10 manifolds, they will interfere with the piping for the spacer assembly. Therefore, combine the A and B ports with straight types or elbows facing downward.

Series	Part no.	Applicable valve	Intermediate stop	Drop prevention
SY3000	SY30M-60-1A		SY $\frac{3}{2}$ 40 ⁰ ₁	SY $\frac{3}{2}$ 2 0 ⁰ ₁
SY5000	SY50M-60-1A			
SY7000	SY70M-60-1A			

Part numbers of mounting screw (For repairs)
SY3000: SY3000-23-27A (2 pcs.)
SY5000: SY5000-221-4A (2 pcs.)
SY7000: SY7000-221-4A (3 pcs.)

⚠ Caution

- Air leakage from the pipe between the valve and cylinder or from the fittings will prevent the cylinder from stopping for a long period of time. Check the leakage using neutral household detergent, such as dish washing soap. Also, check the cylinder's tube gasket, piston seal, and rod seal for air leakage.
- Combining with 3-position closed center or pressure center valve will not work.
- If the exhaust of the double check spacer is restricted too much, the cylinder may not operate properly and may not stop intermediately.
- Set the cylinder load so that the cylinder pressure will be within two times that of the supply pressure.
- If using a double check spacer that is built in to the sub-plate, refer to page 696.

Specifications

Interface regulator

[With a connector gasket, a base gasket, and two mounting screws (3 pcs. for the SY7000)]

Used when the supply pressure for each valve on the same manifold must be individually set (reduced pressure).

How to Order

Applicable valve³

Nil	For single, double, and 4-position
3	For 3-position

¹ In the case of the SY3000 series with a pressure gauge, when mounting on the manifold, use caution that the part numbers are different between the odd no. stations and the even no. stations to prevent the pressure gauges from interfering with each other.
If using a connector connecting base M10/11/12 (mixed mounting type) or laminating two or more types of spacer type manifold options for the neighboring stations, you can use only the model without a pressure gauge (M1).

² As per the new Measurement Law, gauges with a psi display will only be sold to overseas customers.

³ In the case of the SY3000 series, use caution that the part numbers will differ depending on the one for single/double and 4- and 3-position due to the different length of solenoid valves. Also, if you have selected a model with a pressure gauge, and if at least the one for 3-position is included in the same manifold, use all the ones for 3-position to prevent the pressure gauges from interfering with each other.

M3: 0.8 N·m (SY5000/7000)

Manifold Options

* Refer to pages 628 to 631 for dimensions.

■ Individual SUP block assembly

On the circuit of the plug-in connector connection base, an individual SUP block assembly can be used to supply air to a series of valves if a separate air supply is required, or if additional air flow is required for additional air flow. Individual SUP block assembly occupies 1 station.

Blocking disks also supplied (2 pieces). Can be used to block both sides of the number of stations being isolated for individual air supply (as shown in example).

* Specify the mounting position of the block as well as the position where the SUP passage is to be blocked on the manifold specification sheet. Blocking is required for 1 or 2 positions for 1 set. (2 SUP blocking disks to block SUP is attached to individual SUP block.)

* Electrical wiring is connected to a number of stations in the individual SUP block manifold.

* When used in M10/11/12 (mixed mounting type), select the SY50M type for SS5Y5 and the SY70M type for SSSY7.

* A structure to prevent screws falling out is in place on the individual SUP block, making it much harder for the mounting screws to fall out.

<Example>

■ Individual EXH block assembly

On the circuit of the plug-in connector connection base, individual EXH block assembly can be used to individually exhaust series of valves when the exhaust from the valves would affect a number of other stations. Individual EXH block assembly occupies 1 station.

Blocking disks also supplied (4 pieces). Can be used to block both sides of the number of stations being isolated for individual exhaust. (as shown in example).

* Specify the mounting position of the block as well as the position where the EXH passage is to be blocked on the manifold specification sheet. Blocking is required for 1 or 2 positions for 1 set. (2 sets of EXH blocking disks (4 pcs.) to block EXH is attached to individual EXH block.)

* Electrical wiring is connected to a number of stations in the individual EXH block manifold.

* When used in M10/11/12 (mixed mounting type), select the SY50M type for SS5Y5 and the SY70M type for SSSY7.

* A structure to prevent screws falling out is in place on the individual EXH block, making it much harder for the mounting screws to fall out.

<Example>

SY3000/5000/7000 Series

Manifold Options

■ Blanking Plate with Output [With two mounting screws]

The blanking plate extracts the individual signal of the manifold valve.

Specifications

Number of outputs	2 outputs
Load voltage	12 VDC, 24 VDC (Dependent on the rated voltage of the built-in manifold)
Load current	42 mA/point (Max.)
Enclosure	Dust proof (M12 connector: IP67)

- * For serial transmission-capable manifolds, only the 24 VDC is applicable.
- * When non-polar type valves are mounted on the same manifold (excludes SI unit manifolds), be careful of surge voltage intrusion. Refer to page 706 for details.

⚠ Caution

Tightening torque for mounting screw
M2: 0.16 N-m

How to Order Blanking Plate with Output

● Connector type

Nil	1	2
Without connector 	With M12 connector 	With connector (For ZK2 vacuum unit)

* Refer to the specifications for output polarity.

Output Polarity

Manifold common specifications	A	B	COM.
Positive common	-	-	+
Negative common	+	+	-

* Specifications are the same as the manifold common specifications.

■ SUP/EXH blocking disk assembly (for connector type manifold, Type 10, 11, 12)

[SUP blocking disk]

By inserting the SUP blocking disk in the pressure supply passage of the manifold valve, can provide two different high and low pressure in one manifold.

[EXH blocking disk]

By inserting the EXH blocking disk in the exhaust passage of the manifold valve, can separate the exhaust from the valve so it does not affect the other valves. It can also be used for the manifold for the positive pressure and vacuum mixed manifold. (2 pcs. are required to block FA/EB both sides of the EXH.)

Series	SUP blocking disk assembly	EXH blocking disk assembly

SY3000	SJ3000-155-1A
SY5000	
SY7000	

Manifold Options

■ Back pressure check valve assembly (Retrofit or pre-installed type)

It prevents cylinder malfunction caused by other valve exhaust entry. Insert it into EA/EB port (valve mounting side) on the manifold side of a valve which is affected. It is effective when a single-acting cylinder is used.

- * When ordering assemblies incorporated with a manifold, refer to the Ordering Example below (when installed in all stations.)
- * When a check valve for back pressure prevention is desired and it is to be installed only in certain manifold stations, clearly indicate the part number and specify the mounting position on the manifold specification sheet.

<Precautions>

1. The manifold installed type back pressure check valve assembly is assembly parts with a check valve structure. However, since slight air leakage against the back pressure is allowed due to its structure, adverse effects of the back pressure due to increase in exhaust resistance cannot be prevented if the manifold exhaust port and other exhaust ports are put together for piping or if the piping diameter is narrowed. As a result, this may cause the actuator and air operated equipment to malfunction. So, be careful not to restrict the exhaust air. If the exhaust resistance becomes large, select a built-in valve type with rubber seal.
2. When the back pressure check valve assembly is mounted, please contact SMC for valve flow rate characteristics.

Ordering Example

SS5Y3-10F1-05B-C6.....1 set (Type 10 5-station manifold base part no.)
 *SY3201-5U1.....5 sets (2-position double part no.)
 *SY30M-24-1A.....5 sets (Back pressure check valve assembly part no.)
 └ The asterisk denotes the symbol for the assembly.

Series	Part no.
SY3000	SY30M-24-1A
SY5000	SY50M-24-1A
SY7000	SY70M-24-1A

■ Dual flow fitting (for connector connecting base, Type 10, side ported)

This is a fitting for cylinder ports which enables simultaneous actuation and increase in flow rate of valves for 2 stations.

- * When ordering assemblies incorporated into a manifold, refer to the Ordering Example below and specify on the manifold specification sheet.

How to Order Dual Flow Fitting

SY3000/5000/7000 Series

Manifold Options

A transparent plastic plate to put a label with the name of the function of the solenoid valve

■ Name plate (For connector connecting base)

SY3000: For SS5Y3-10 (Side ported)
 SY5000: For SS5Y5-10/11 (Side/Bottom ported)
 SY7000: For SS5Y7-(M)10/11 (Side/Bottom ported)

Name plate bracket assembly and name plate mounting instructions
 Insert it into the groove on the name plate bracket onto which a SUP/EXH (end) block is mounted, as shown in Figure 2.

* When ordering assemblies incorporated with a manifold, refer to the Ordering Example below.

Mounting and Option

Symbol	Mounting option					
	Printing		DIN rail		Specified length	Direct mounting

B24	—	●	—	—	For 24 stations	—

Ordering Example

SS5Y3-10F1-05UR-C6AA 1 set

*SY3200R-SU1 5 sets

The asterisk denotes the symbol for the assembly.

* Name plates cannot be mounted onto Type 12 (Top ported) and Type 10 (Side ported) mixed mounting types with top ported valves, nor onto manifolds with optional laminated spacers.
 * No name plate settings are available for the SY3000/SY5000 mixed mounting types. However, they are available for the SY5000/SY7000 mixed mounting types.

<SY3000>

<SY5000/7000>

Tightening torque for mounting screw (M3): 0.8 N·m

Tightening torque for mounting screw (M3): 0.8 N·m

SY5000: SY50M-86-□(N)
 SY7000: SY70M-86-□(N)

Manifold Options

* A transparent plastic plate to put a label with the name of the function of the solenoid valve

■ If adding a name plate

If adding a name plate to a manifold in use, order a name plate bracket assembly, in addition to ordering a name plate. Refer to the table below for the part number and the amount.

Name plate part number

Model		SS5Y3-10	SS5Y5-10/11	SS5Y7-(M)10/11	Note
Name plate	Printed	SY30M-86-□N	SY50M-86-□N	SY70M-86-□N	□: Number of stations
	No printing	SY30M-86-□	SY50M-86-□	SY70M-86-□	(1 to 24)

Name plate bracket assembly part number and number of items ordered

Model		SS5Y3-10	SS5Y5-10/11
Name plate assembly part number		SY30M-85-1A	SY50M-85-1A
Manifold SUP/EXH block assembly Pilot type and P, E port entry	Internal pilot U/D piping	2 pcs.	2 pcs.
	Internal pilot double sided piping	2 pcs.	
	External pilot U/D piping	1 pc.*1	
	External pilot double sided piping	Not required*1	

Caution

1. Be sure to shut off the power and air supplies before mounting the name plate bracket assembly. Furthermore, since air may remain inside the actuator, piping, and manifold, confirm that the air is completely exhausted before performing any work.
2. When disassembly and assembly are performed, air leakage may result if the tightening of the bracket mounting screws is inadequate.

*1 If the manifold is an external pilot, an insertion slot for name plates is on the port block of the SUP/EXH block assembly. Thus, a bracket assembly is no longer required on the port piping side.

* Name plate bracket assembly is not required for the SY7000.

*1 The value is for manifold base with 5 stations and individually operated 2-position type.

*2 Weight: W is the value for the D-sub connector manifold.

To obtain the weight with valves attached, add the valve weights given on page 406 for the appropriate number of stations.

* Calculation of effective area S and sonic conductance C: $S = 5.0 \times C$

Type 50
Side Ported

Type 51
Bottom Ported

Plug-in Metal Base

D-sub Connector Flat Ribbon Cable

SY3000/5000/7000 Series

How to Order Manifolds

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Type

50	Side ported
51	Bottom ported
50R	Side ported, External pilot

* External pilot is not available for the bottom ported type.

3 Connector type

F: D-sub connector (25 pins) 	P: Flat ribbon cable (26 pins)
PG: Flat ribbon cable (20 pins) 	PH: Flat ribbon cable (10 pins)

4 Connector entry direction

1: Upward 	2: Lateral
----------------------	-----------------------

5 Wiring type

Nil	All double wiring ^{*1}
S	All single wiring ^{*2}

*1 All double wiring: 2-position single, double, 3-position, and 4-position valves can be used on all manifold stations.

*2 All single wiring: Available only for the manifold which has 2-position single for all stations

Note that 2-position double, 3-, or 4-position valves cannot be used.

* If a mix of single and double wiring is required, it is supplied as a special order.

How to Order Manifold Assembly

Example (SS5Y3-50F2-□)

SS5Y3-50F2-05D-C6... 1 set (Type 50 5-station manifold base part no.)
 *SY3100-5U1 3 sets (2-position single part no.)
 *SY3200-5U1 1 set (2-position double part no.)
 *SY3300-5U1 1 set (3-position closed center part no.)
 → The asterisk denotes the symbol for the assembly.
 Prefix it to the part numbers of the valve, etc.

- For the valve arrangement, the valve closest to the D side is considered the 1st station.
- Under the manifold part number, state the valves to be mounted in order starting with the 1st station as shown in the figure above. If the arrangement becomes too complicated, specify the details on a manifold specification sheet.

* When mixing top ported configurations, select from those listed on page 657. In such cases, use caution as there is also output on the A and B ports on the base side. Specify on the manifold specification sheet if plugs are required for the A and B ports on the base side.

6 Valve stations

F: D-sub connector (25 pins)			P: Flat ribbon cable (26 pins)		
Symbol	Stations	Note	Symbol	Stations	Note
02	2 stations	All	02	2 stations	All
:	:	double wiring	:	:	double wiring
12	12 stations	All	12	12 stations	All
:	:	single wiring	:	:	single wiring
12	12 stations	All	12	12 stations	All

PG: Flat ribbon cable (20 pins)			PH: Flat ribbon cable (10 pins)		
Symbol	Stations	Note	Symbol	Stations	Note
02	2 stations	All	02	2 stations	All
:	:	double wiring	:	:	double wiring
09	9 stations	All	04	4 stations	All
:	:	single wiring	:	:	single wiring
12	12 stations	All	08	8 stations	All

* This also includes the number of the blanking plate assembly.

7 P, E port entry

U	U side ^{*1}
D	D side ^{*1+2}
B	Both sides

*1 Plugs are mounted on the opposite side of the selected ports.

*2 Only D side is available for the type 51 bottom-ported type.

9 Thread type

Nii	Rc
F	G
N	NPT
T	NPTF

10 Mounting

Nii	Direct mounting
D	DIN rail mounting (With DIN rail)
D0	DIN rail mounting (Without DIN rail)
D3	For 3 stations
⋮	⋮
D12	For 12 stations

Specify a length longer than that of the standard rail.

* Only direct mounting is available for the type 51 bottom-ported type.

* Refer to page 708 for the fixation of DIN rail mounting type manifold.

SY3000/5000/7000 Series

How to Order Valves (With mounting screw)

Refer to page 404 for valve specifications.

1 2 3 4 5 6 7 8 9 10 11

• Base mounted

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Type of actuation

1	Single	
2	2-position	Double
3	3-position	Closed center
4		Exhaust center
5		Pressure center
A ^{*1}	4-position	N.C./N.C.
B ^{*1}	dual 3-port	N.O./N.O.
C ^{*1}		N.C./N.O.

*1 Only the rubber seal type is available for the 4-position dual 3-port valve.

3 Seal type

0	Rubber seal
1	Metal seal

4 Pilot type

NII	Internal pilot
R	External pilot

* When selecting the external pilot specification for the 4-position dual 3-port valve, pay attention to the pilot pressure. Refer to the valve specifications on page 404 for further details.

5 Back pressure check valve (Built-in valve type)

NII	None
H	Built-in

* Only the rubber seal type is available.
* The back pressure check valve is not available for the 3-position type or the SY7000.

6 Pilot valve option

NII	Standard (0.7 MPa)
B	Quick response type (0.7 MPa)
K ^{*1}	High pressure type (1.0 MPa)

*1 Only the metal seal type is available for the high pressure type.

7 Coil type

NII	Standard
T	With power saving circuit (Continuous duty type)

* Be sure to select the power saving circuit type if the valve is to be continuously energized for long periods of time.
* Be careful of the energizing time when the power saving circuit is selected. Refer to page 705 for details.

8 Rated voltage

5	24 VDC
6	12 VDC

9 Light/surge voltage suppressor and common specification

Symbol	With light	Surge voltage suppressor	Common specification
NII	—	—	Non-polar
R	—	—	
U	●	—	
S	—	●	Positive common
Z	●	—	Negative common
NS	—	—	
NZ	●	—	

* For the non-polar type, be careful of surge voltage intrusion. Refer to page 706 for details.
* Only "Z" and "NZ" types are available with a power saving circuit.

10 Manual override

* Refer to page 423 for the safety slide locking manual override.

11 Type of mounting screw

NII	Round head combination screw
B	Hexagon socket head cap screw
K	Round head combination screw (Drop prevention type)
H	Hexagon socket head cap screw (Drop prevention type)

* For "K" and "H," the valve body cover has a drop prevention construction to stop the mounting screws from falling out when the valve is removed for maintenance, etc.
* **When ordering a valve individually, the base gasket is not included.** Since the base gasket is attached to the manifold, please order the base gasket separately if it is needed for maintenance. Refer to page 679 for base gasket and mounting screw part numbers.
* "B" and "H" cannot be selected for the individual SUP/EXH spacer assembly, interface regulator, or double check spacer assembly with residual pressure release valve.

SY3000/5000/7000 Series

How to Order Manifolds

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Type

52	Top ported
52R	Top ported, External pilot

3 Connector type

F: D-sub connector (25 pins)	P: Flat ribbon cable (26 pins)
PG: Flat ribbon cable (20 pins)	PH: Flat ribbon cable (10 pins)

4 Connector entry direction

1: Upward	2: Lateral
------------------	-------------------

5 Wiring type

Nil	All double wiring*1
S	All single wiring*2

- *1 All double wiring: 2-position single, double, 3-position, and 4-position valves can be used on all manifold stations.
- *2 All single wiring: Available only for the manifold which has 2-position single for all stations.
Note that 2-position double, 3-, or 4-position valves cannot be used.
- * If a mix of single and double wiring is required, it is supplied as a special order.

6 Valve stations

F: D-sub connector (25 pins)			P: Flat ribbon cable (26 pins)		
Symbol	Stations	Note	Symbol	Stations	Note
02	2 stations	All	02	2 stations	All
:	:	double wiring	:	:	double wiring
12	12 stations	All	12	12 stations	All
:	:	single wiring	:	:	single wiring
12	12 stations	All	12	12 stations	All
:	:	double wiring	:	:	double wiring

PG: Flat ribbon cable (20 pins)			PH: Flat ribbon cable (10 pins)		
Symbol	Stations	Note	Symbol	Stations	Note
02	2 stations	All	02	2 stations	All
:	:	double wiring	:	:	double wiring
09	9 stations	All	04	4 stations	All
:	:	single wiring	:	:	single wiring
02	2 stations	All	02	2 stations	All
:	:	double wiring	:	:	double wiring
12	12 stations	All	08	8 stations	All
:	:	single wiring	:	:	single wiring

* This also includes the number of the blanking plate assembly.

How to Order Manifold Assembly

Example (SS5Y3-52F2-□)

2-position single (24 VDC)
SY3130-5U1-C6 (3 sets)

2-position double (24 VDC)
SY3230-5U1-C6 (1 set)

3-position closed center (24 VDC)
SY3330-5U1-C6 (1 set)

Manifold base (5 stations)
SS5Y3-52F2-05D

U side
D side
Stations

- SS5Y3-52F2-05D..... 1 set (Type 52 5-station manifold base part no.)
 - *SY3130-5U1-C6..... 3 sets (2-position single part no.)
 - *SY3230-5U1-C6..... 1 set (2-position double part no.)
 - *SY3330-5U1-C6..... 1 set (3-position closed center part no.)
- The asterisk denotes the symbol for the assembly.
Prefix it to the part numbers of the valve, etc.

- For the valve arrangement, the valve closest to the D side is considered the 1st station.
- Under the manifold part number, state the valves to be mounted in order starting with the 1st station as shown in the figure above. If the arrangement becomes too complicated, specify the details on a manifold specification sheet.

7 P, E port entry

U	U side*1
D	D side*1
B	Both sides

*1 Plugs are mounted on the opposite side of the selected ports.

8 Thread type

Nil	Rc
00F	G
00N	NPT
00T	NPTF

9 Mounting

Nil	Direct mounting
D	DIN rail mounting (With DIN rail)
D0	DIN rail mounting (Without DIN rail)
D3	For 3 stations Specify a length longer than that of the standard rail.
:	:
D12	For 12 stations

* Refer to page 708 for the fixation of DIN rail mounting type manifold.

How to Order Valves (With mounting screw) Refer to page 404 for valve specifications.

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Type of actuation

1	2-position	Single
2	2-position	Double
3	3-position	Closed center
4	3-position	Exhaust center
5	3-position	Pressure center
A ^{*1}	4-position dual	N.C./N.C.
B ^{*1}	dual	N.O./N.O.
C ^{*1}	3-port	N.C./N.O.

*1 Only the rubber seal type is available for the 4-position dual 3-port valve.

3 Seal type

0	Rubber seal
1	Metal seal

4 Pilot type

Nil	Internal pilot
R	External pilot

* When selecting the external pilot specification for the 4-position dual 3-port valve, pay attention to the pilot pressure. Refer to the valve specifications on page 404 for further details.

5 Back pressure check valve (Built-in valve type)

Nil	None
H	Built-in

* Only the rubber seal type is available.
* The back pressure check valve is not available for the 3-position type or the SY7000.

6 Pilot valve option

Nil	Standard (0.7 MPa)
B	Quick response type (0.7 MPa)
K ^{*1}	High pressure type (1.0 MPa)

*1 Only the metal seal type is available for the high pressure type.

7 Coil type

Nil	Standard
T	With power saving circuit (Continuous duty type)

* Be sure to select the power saving circuit type if the valve is to be continuously energized for long periods of time.
* Be careful of the energizing time when the power saving circuit is selected. Refer to page 705 for details.

8 Rated voltage

5	24 VDC
6	12 VDC

9 Light/surge voltage suppressor and common specification

Symbol	With light	Surge voltage suppressor	Common specification
Nil	—	—	Non-polar
R	—	—	
U	●	—	
S	—	●	
Z	●	—	Positive common
NS	—	—	Negative common
NZ	●	—	

* For the non-polar type, be careful of surge voltage intrusion. Refer to page 706 for details.
* Only "Z" and "NZ" types are available with a power saving circuit.

10 Manual override

<p>Nil: Non-locking push type</p>	<p>D: Push-turn locking slotted type</p>
<p>E: Push-turn locking lever type</p>	<p>F: Slide locking type</p>

* Refer to page 423 for the safety slide locking manual override.

11 A, B port size

Thread piping

Symbol	Port size	Applicable series

12 Thread type

Nil	Rc
F	G
N	NPT
T	NPTF

* Only Nil is available for M5.

13 Type of mounting screw

Nil	Round head combination screw
B	Hexagon socket head cap screw
K	Round head combination screw (Drop prevention type)
H	Hexagon socket head cap screw (Drop prevention type)

* For "K" and "H," the valve body cover has a drop prevention construction to stop the mounting screws from falling out when the valve is removed for maintenance, etc.

*** When ordering a valve individually, the base gasket is not included.**

Since the base gasket is attached to the manifold, please order the base gasket separately if it is needed for maintenance. Refer to page 679 for base gasket and mounting screw part numbers.

* "B" and "H" cannot be selected for the individual SUP/EXH spacer assembly or interface regulator.

Electrical Wiring Specifications

Cable Assembly

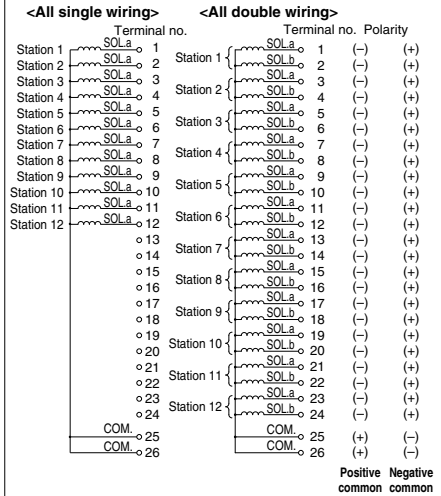

SY3000/5000/7000 Series

Electrical Wiring Specifications

Flat ribbon cable connector

P: Flat ribbon cable (26 pins)

PG: Flat ribbon cable (20 pins)

* When using a valve with no polarity, either positive common or negative common can be used.

Cable Assembly

Flat ribbon cable connector assembly

Cable length (L)	Assembly part no.		
	26 pins	20 pins	10 pins
1.5 m	AXT100-FC26-1	AXT100-FC20-1	AXT100-FC10-1
3 m	AXT100-FC26-2	AXT100-FC20-2	AXT100-FC10-2
5 m	AXT100-FC26-3	AXT100-FC20-3	AXT100-FC10-3

- * When using a standard commercial connector, use a 26-pin, 20-pin, or 10-pin type connector conforming to MIL-C-83503 with strain relief.
- * Cannot be used for movable wiring
- * Lengths other than the above are also available. Please contact SMC for details.

Connector Manufacturer's Example

- HIROSE ELECTRIC CO., LTD.
- Japan Aviation Electronics Industry, Limited
- 3M Japan Limited
- J.S.T. Mfg. Co., Ltd.
- Fujitsu Limited
- Oki Electric Cable Co., Ltd.

PH: Flat ribbon cable (10 pins)

Type 50
Side Ported

Type 51
Bottom Ported

Plug-in Metal Base EX510

SY3000/5000/7000 Series

How to Order Manifolds

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Type

50	Side ported
51	Bottom ported
50R	Side ported, External pilot

* External pilot is not available for the bottom-ported type.

3 SI unit output polarity

Nil	Positive common
N	Negative common

4 Wiring type

Nil	All double wiring*1
S	All single wiring*2

*1 All double wiring: 2-position single, double, 3-position, and 4-position valves can be used on all manifold stations.

*2 All single wiring: Available only for the manifold which has 2-position single for all stations.

Note that 2-position double, 3-, or 4-position valves cannot be used.

* If a mix of single and double wiring is required, it is supplied as a special order.

5 Valve stations

Symbol	Stations	Note	Symbol	Stations	Note
02	2 stations	All double wiring	02	2 stations	All single wiring
:	:		:	:	
08	8 stations		12	12 stations	

* This also includes the number of the blanking plate assembly.

6 P, E port entry

U	U side*1
D	D side*1*2
B	Both sides

*1 Plugs are mounted on the opposite side of the selected ports.

*2 Only D side is available for the type 51 bottom-ported type.

7 A, B port size

Thread piping

Symbol	A, B port	SY3000	SY5000	SY7000
M5	M5 x 0.8	●	—	—
01	1/8	●	●	—
02	1/4	—	●	●

One-touch fitting (Metric)

	KC12	ø12	—	●
M*1	Mixed sizes	●	●	
P, E port size (Thread piping)		1/8	1/4	3/8

How to Order Manifold Assembly

Example (SS5Y3-50S5-□)

SS5Y3-50S5-05D-C6 ... 1 set (Type 50 5-station manifold base part no.)

*SY3100-5U1 3 sets (2-position single part no.)

*SY3200-5U1 1 set (2-position double part no.)

*SY3300-5U1 1 set (3-position closed center part no.)

→ The asterisk denotes the symbol for the assembly. Prefix it to the part numbers of the valve, etc.

- For the valve arrangement, the valve closest to the D side is considered the 1st station.
- Under the manifold part number, state the valves to be mounted in order starting with the 1st station as shown in the figure above. If the arrangement becomes too complicated, specify the details on a manifold specification sheet.

* When mixing top-ported configurations, select from those listed on page 674. In such cases, use caution as there is also output on the A and B ports on the base side. Specify on the manifold specification sheet if plugs are required for the A and B ports on the base side.

One-touch fitting (Inch)

Symbol	A, B port	SY3000	SY5000	SY7000
Fixed	N1	ø1/8"	●	—
	N3	ø5/32"	●	—
	N7	ø1/4"	●	●
	N9	ø5/16"	—	●
	N11	ø3/8"	—	●
	KN1	ø1/8"	●	—
Replaceable	KN3	ø5/32"	●	—
	KN7	ø1/4"	●	●
	KN9	ø5/16"	—	●
	KN11	ø3/8"	—	●
	M*1	Mixed sizes	●	●
P, E port size (Thread piping)		1/8	1/4	3/8

*1 When ports are of mixed sizes, indicate the piping specifications on the manifold specification sheet.

8 Thread type

N il	Rc
F	G
N	NPT
T	NPTF

9 Mounting

N il	Direct mounting
D	DIN rail mounting (With DIN rail)
D0	DIN rail mounting (Without DIN rail)
D3	For 3 stations
⋮	⋮
D12	For 12 stations

Specify a length longer than that of the standard rail.

- * Only direct mounting is available for the type 51 bottom-ported type.
- * Refer to page 708 for the fixation of DIN rail mounting type manifold.

For details on the EX510 Gateway Type Serial Transmission System, refer to the **Web Catalog** and the Operation Manual. Please download the Operation Manual via the SMC website, <https://www.smcworld.com>

How to Order Valves (With mounting screw)

Refer to page 404 for valve specifications.

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Type of actuation

1	2-position	Single
2		Double
3	3-position	Closed center
4		Exhaust center
5	4-position dual 3-port	Pressure center
A⁻¹		N.C./N.C.
B⁻¹	4-position dual 3-port	N.O./N.O.
C⁻¹		N.C./N.O.

- *1 Only the rubber seal type is available for the 4-position dual 3-port valve.

3 Seal type

0	Rubber seal
1	Metal seal

4 Pilot type

N il	Internal pilot
R	External pilot

- * When selecting the external pilot specification for the 4-position dual 3-port valve, pay attention to the pilot pressure. Refer to the valve specifications on page 404 for further details.

5 Back pressure check valve (Built-in valve type)

N il	None
H	Built-in

- * Only the rubber seal type is available.
- * The back pressure check valve is not available for the 3-position type or the SY7000.

6 Pilot valve option

N il	Standard (0.7 MPa)
B	Quick response type (0.7 MPa)
K⁻¹	High pressure type (1.0 MPa)

- *1 Only the metal seal type is available for the high pressure type.

7 Coil type

N il	Standard
T	With power saving circuit (Continuous duty type)

- * Be sure to select the power saving circuit type if the valve is to be continuously energized for long periods of time.
- * Be careful of the energizing time when the power saving circuit is selected. Refer to page 705 for details.

8 Rated voltage

5	24 VDC
----------	--------

9 Light/surge voltage suppressor and common specification

Symbol	With light	Surge voltage suppressor	Common specification
R	—	●	Non-polar
U	●		
S	—		Positive common
Z	●		
NS	—		
NZ	●		

- * Only "Z" and "NZ" types are available with a power saving circuit. Select "R," "U," "S," or "Z" for the valve when the SI unit output polarity is Nil (positive common). Select "R," "U," "NS," or "NZ" for the valve when the SI unit output polarity is N (negative common).

10 Manual override

- * Refer to page 423 for the safety slide locking manual override.

11 Type of mounting screw

N il	Round head combination screw
B	Hexagon socket head cap screw
K	Round head combination screw (Drop prevention type)
H	Hexagon socket head cap screw (Drop prevention type)

- * For "K" and "H," the valve body cover has a drop prevention construction to stop the mounting screws from falling out when the valve is removed for maintenance, etc.
- * **When ordering a valve individually, the base gasket is not included.** Since the base gasket is attached to the manifold, please order the base gasket separately if it is needed for maintenance. Refer to page 679 for base gasket and mounting screw part numbers.
- * "B" and "H" cannot be selected for the individual SUP/EXH spacer assembly, interface regulator, or double check spacer assembly with residual pressure release valve.

How to Order Manifolds

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Type

52	Top ported
52R	Top ported, External pilot

3 SI unit output polarity

Nil	Positive common
N	Negative common

4 Wiring type

Nil	All double wiring ^{*1}
S	All single wiring ^{*2}

- *1 All double wiring: 2-position single, double, 3-position, and 4-position valves can be used on all manifold stations.
- *2 All single wiring: Available only for the manifold which has 2-position single for all stations. Note that 2-position double, 3-, or 4-position valves cannot be used.
- * If a mix of single and double wiring is required, it is supplied as a special order.

5 Valve stations

Symbol	Stations	Note
02	2 stations	All double wiring
⋮	⋮	
08	8 stations	All single wiring
02	2 stations	
⋮	⋮	
12	12 stations	

* This also includes the number of the blanking plate assembly.

6 P, E port entry

U	U side ^{*1}
D	D side ^{*1}
B	Both sides

*1 Plugs are mounted on the opposite side of the selected ports.

How to Order Manifold Assembly

Example (SS5Y3-52S5-□)

SS5Y3-52S5-05D 1 set (Type 52 5-station manifold base part no.)
 *SY3130-5U1-C6 3 sets (2-position single part no.)
 *SY3230-5U1-C6 1 set (2-position double part no.)
 *SY3330-5U1-C6 1 set (3-position closed center part no.)

→ The asterisk denotes the symbol for the assembly. Prefix it to the part numbers of the valve, etc.

- For the valve arrangement, the valve closest to the D side is considered the 1st station.
- Under the manifold part number, state the valves to be mounted in order starting with the 1st station as shown in the figure above. If the arrangement becomes too complicated, specify the details on a manifold specification sheet.

7 Thread type

Nil	Rc
00F	G
00N	NPT
00T	NPTF

8 Mounting

Nil	Direct mounting
D	DIN rail mounting (With DIN rail)
D0	DIN rail mounting (Without DIN rail)
D3	For 3 stations
⋮	⋮
D12	For 12 stations

* Refer to page 708 for the fixation of DIN rail mounting type manifold.

For details on the EX510 Gateway Type Serial Transmission System, refer to the **Web Catalog** and the Operation Manual. Please download the Operation Manual via the SMC website, <https://www.smworld.com>

How to Order Valves (With mounting screw) Refer to page 404 for valve specifications.

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Type of actuation

1	2-position	Single
2	2-position	Double
3	3-position	Closed center
4	3-position	Exhaust center
5	3-position	Pressure center
A*1	4-position dual	N.C./N.C.
B*1	4-position dual	N.O./N.O.
C*1	3-port	N.C./N.O.

*1 Only the rubber seal type is available for the 4-position dual 3-port valve.

3 Seal type

0	Rubber seal
1	Metal seal

4 Pilot type

Nil	Internal pilot
R	External pilot

* When selecting the external pilot specification for the 4-position dual 3-port valve, pay attention to the pilot pressure. Refer to the valve specifications on page 404 for further details.

5 Back pressure check valve (Built-in valve type)

Nil	None
H	Built-in

* Only the rubber seal type is available.
* The back pressure check valve is not available for the 3-position type or the SY7000.

6 Pilot valve option

Nil	Standard (0.7 MPa)
B	Quick response type (0.7 MPa)
K*1	High pressure type (1.0 MPa)

*1 Only the metal seal type is available for the high pressure type.

7 Coil type

Nil	Standard
T	With power saving circuit (Continuous duty type)

* Be sure to select the power saving circuit type if the valve is to be continuously energized for long periods of time.
* Be careful of the energizing time when the power saving circuit is selected. Refer to page 705 for details.

8 Rated voltage

5	24 VDC
---	--------

9 Light/surge voltage suppressor and common specification

Symbol	With light	Surge voltage suppressor	Common specification
R	—	●	Non-polar
U	●		
S	—		Positive common
Z	●		
NS	—		Negative common
NZ	●		

* Only "Z" and "NZ" types are available with a power saving circuit. Select "R," "U," "S," or "Z" for the valve when the SI unit output polarity is Nil (positive common). Select "R," "U," "NS," or "NZ" for the valve when the SI unit output polarity is N (negative common).

10 Manual override

* Refer to page 423 for the safety slide locking manual override.

11 A, B port size

Symbol	Port size	Applicable series
M5	M5 x 0.8	SY3000
O1	1/8	SY5000
O2	1/4	SY7000

One-touch fitting (Metric)

Symbol	A, B port	SY3000	SY5000	SY7000

C3	ø3.2	●	—	—
C4	ø4	●	●	—
C6	ø6	●	●	●
C8	ø8	—	●	●
C10	ø10	—	—	●
C12	ø12	—	—	●

One-touch fitting (Inch)

Symbol	A, B port	SY3000	SY5000	SY7000
N1	ø 1/8"	●	—	—
N3	ø5/32"	●	●	—
N7	ø 1/4"	—	●	●
N9	ø5/16"	—	●	●
N11	ø3/8"	—	—	●

12 Thread type

Nil	Rc
F	G
N	NPT
T	NPTF

* Only Nil is available for M5.

13 Type of mounting screw

Nil	Round head combination screw
B	Hexagon socket head cap screw
K	Round head combination screw (Drop prevention type)
H	Hexagon socket head cap screw (Drop prevention type)

* For "K" and "H," the valve body cover has a drop prevention construction to stop the mounting screws from falling out when the valve is removed for maintenance, etc.
* **When ordering a valve individually, the base gasket is not included.** Since the base gasket is attached to the manifold, please order the base gasket separately if it is needed for maintenance. Refer to page 679 for base gasket and mounting screw part numbers.
* "B" and "H" cannot be selected for the individual SUP/EXH spacer assembly or interface regulator.

M3: 0.8 N·m (SY5000/7000)

Manifold Options

* Refer to pages 689 to 691 for dimensions.

■ Individual SUP spacer assembly

[With a connector gasket, a base gasket, and two mounting screws (3 pcs. for the SY7000)]

When the same manifold is used for different pressures, an individual SUP spacer assembly is used as a supply port for different pressures.

* When selecting a One-touch fitting elbow type for a spacer assembly, use it faced upward, since it interferes with A and B port piping of Type 50 manifolds.

■ Individual EXH spacer assembly

[With a connector gasket, a base gasket, and two mounting screws (3 pcs. for the SY7000)]

When valve exhaust affects other stations due to the circuit configuration, this spacer assembly is used for individual valve exhaust.

* When selecting a One-touch fitting elbow type for a spacer assembly, use it faced upward, since it interferes with A and B port piping of Type 50 manifolds.

How to Order Individual SUP/EXH Spacer Assembly

One-touch fitting Straight type **SY 3 OM - 38 - 1 A - C6**

One-touch fitting Elbow type **SY 3 OM - 38 - 2 A - L6**

Manifold Options

* Refer to pages 689 to 691 for dimensions.

■ SUP stop valve spacer assembly with residual pressure release valve

[With a connector gasket, a base gasket, and two mounting screws (3 pcs. for the SY7000)]

It is used to shut off the supply air to valves individually.

SY **3** 0M - 50 - 1A **E**

Series	
3	SY3000
5	SY5000
7	SY7000

Manual override	
Nil	Push-turn locking slotted type
E	Push-turn locking lever type

SUP stop valve spacer assembly with residual pressure release valve

Circuit diagram

(Mounting example of a 2-position single valve)

* For lever type

When locking the lever type manual override, push the lever down in the PUSH position with your fingers until it stops, then turn the lever 90° clockwise. (PUSH → LOCK)

Turning the lever without pushing it down until it stops can cause damage to the manual override and other problems such as air leakages.

To unlock the manual override, turn the lever counterclockwise. (LOCK → PUSH)

[How to mount SUP stop valve spacer assembly with residual pressure release valve]

Insert the SUP stop valve mounting screw from the side of the spacer assembly, and mount it to the manifold.

Tighten the SUP stop valve mounting screw to the specified tightening torque. Mount the valve and tighten the valve mounting screws to the specified tightening torque after mounting the SUP stop valve spacer assembly with residual pressure exhaust valve.

- * Install the plate type nut to the spacer assembly as shown in the figure if it comes off. The SUP stop valve mounting screws can be tightened with a hexagon wrench without removing the plate type nut.
- * This product is only for internal pilot specifications, as the external pilot air cannot be shut off.
- * If the product is equipped with a 3-position closed center, residual pressure cannot be released, so use in combination with a 3-port valve, which can be connected to the A, B piping port.

Valve mounting screw (See page 611.)

Tightening torque:
 SY3000 series: 0.16 N·m
 SY5000/7000 series: 0.8 N·m
 For Hexagon socket head cap screws
 Nominal wrench size:
 SY3000 series: 1.5
 SY5000/7000 series: 2.5

SUP stop valve spacer assembly with residual pressure release valve

Plate type nut
 SY3000 series:
 SY30M-57-1A (10 pcs. included)
 SY5000/7000 series:
 SY50M-57-1A (10 pcs. included)

SUP stop valve mounting screw

Tightening torque:
 SY3000 series: 0.16 N·m
 SY5000/7000 series: 0.8 N·m

⚠ Caution

Tightening torque for mounting screw
M2: 0.16 N·m (SY3000)
M3: 0.8 N·m (SY5000/7000)

Manifold Options

* Refer to pages 689 to 691 for dimensions.

■ Double check spacer assembly with residual pressure release valve (Side/Bottom ported)

[With a connector gasket, a base gasket, and two mounting screws (3 pcs. for the SY7000)] It is used to hold the intermediate position of the cylinder for a long period of time. Use a 3-position exhaust center valve when the double check spacer assembly with residual exhaust valve is used.

It can also be used for drop prevention at the cylinder stroke end when supply residual pressure is released by using a 2-position single/double valve.

Series	Part no.	Intermediate stop	Drop prevention
SY3000	SY30M-60-1A	SY $\frac{3}{5}$ 40 $\frac{0}{1}$	SY $\frac{3}{7}$ $\frac{3}{2}$ 0 $\frac{0}{1}$
SY5000	SY50M-60-1A		
SY7000	SY70M-60-1A		

Part numbers of mounting screw (For repairs)
SY3000: SY3000-23-27A (2 pcs.)
SY5000: SY5000-221-4A (2 pcs.)
SY7000: SY7000-221-4A (3 pcs.)

⚠ Caution

- Air leakage from the pipe between the valve and cylinder or from the fittings will prevent the cylinder from stopping for a long period of time. Check the leakage using neutral household detergent, such as dish washing soap. Also, check the cylinder's tube gasket, piston seal, and rod seal for air leakage.
- Combining with 3-position closed center or pressure center valve will not work.
- If the exhaust of the double check spacer is restricted too much, the cylinder may not operate properly and may not stop intermediately.
- Set the cylinder load so that the cylinder pressure will be within two times that of the supply pressure.
- If using a double check spacer that is built in to the sub-plate, refer to page 696.

Specifications

Max. operating pressure	1.0 MPa						
Min. operating pressure	0.1 MPa

Manifold Options

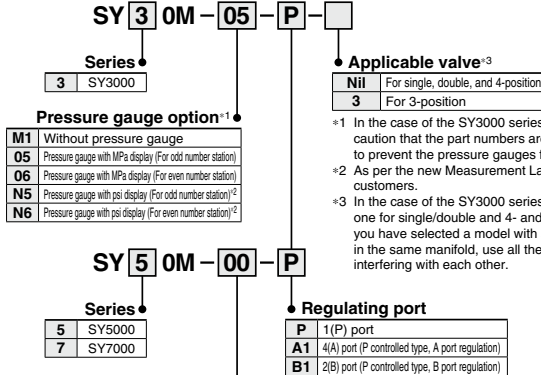

* Refer to pages 689 to 691 for dimensions.

Interface regulator

[With a connector gasket, a base gasket, and two mounting screws (3 pcs. for the SY7000)]

Used when the supply pressure for each valve on the same manifold must be individually set (reduced pressure)

How to Order

- *1 In the case of the SY3000 series with a pressure gauge, when mounting on the manifold, use caution that the part numbers are different between the odd no. stations and the even no. stations to prevent the pressure gauges from interfering with each other.
- *2 As per the new Measurement Law, gauges with a psi display will only be sold to overseas customers.
- *3 In the case of the SY3000 series, use caution that the part numbers will differ depending on the one for single/double and 4- and 3-position due to the different length of solenoid valves. Also, if you have selected a model with a pressure gauge, and if at least the one for 3-position is included in the same manifold, use all the ones for 3-position to prevent the pressure gauges from interfering with each other.

SY30M-05/N5-□ SY30M-06/N6-□ SY30M-M1-□ SY50M-00/N0-□ SY50M-M1-□ SY70M-00/N0-□ SY70M-M1-□
 (With pressure gauge/ (With pressure gauge/ (Without pressure gauge) (With pressure gauge) (Without pressure gauge) (With pressure gauge) (Without pressure gauge)
 For odd number station) For even number station)

Specifications

How to Order

In the case of (Valve) + (Sub-plate) (Built-in valve type part no.)

1 Series

3	SY3000
5	SY5000
7	SY7000

2 Type of actuation

1	Single
2	2-position Double
3	Closed center
4	3-position Exhaust center
5	Pressure center
A ⁻¹	4-position dual 3-port N.C./N.C.
B ⁻¹	N.O./N.O.
C ⁻¹	N.C./N.O.

*1 Only the rubber seal type is available for the 4-position dual 3-port valve.

3 Seal type

0	Rubber seal
1	Metal seal

4 Pilot type

Nil	Internal pilot
R	External pilot

* When selecting the external pilot specification for the 4-position dual 3-port valve, pay attention to the pilot pressure. Refer to the valve specifications on page 404 for further details.

5 Back pressure check valve (Built-in valve type)

Nil	None
H	Built-in

* Only the rubber seal type is available.
* The built-in valve type back pressure check valve is not available for the 3-position type or the SY7000.

6 Pilot valve option

Nil	Standard (0.7 MPa)
B	Quick response type (0.7 MPa)
K ⁻¹	High pressure type (1.0 MPa)

*1 Only the metal seal type is available for the high pressure type.

7 Coil type

Nil	Standard
T	With power saving circuit (Continuous duty type)

* Be sure to select the power saving circuit type if the valve is to be continuously energized for long periods of time.
* Be careful of the energizing time when the power saving circuit is selected. Refer to page 705 for details.

8 Rated voltage

5	24 VDC
6	12 VDC

* When mounting a special order (including Made-to-Order specification) valve or manifold option (spacer, etc.) on the sub-plate, add the valve part number or spacer part number under the sub-plate part number to place an order. For details, refer to the ordering example on page 696.
* When selecting a product with residual pressure release valve or vacuum release valve with restrictor, after selecting a model from page 413 or 415, make selections for items 15 to 18 above.

9 Light/surge voltage suppressor and common specification

Symbol	With light	Surge voltage suppressor	Common specification
Nil	—	—	Non-polar

How to Order when mounting a special order (including Made-to-Order specification) valve on the sub-plate (Ordering example: X90)

SY30M-27-1-W1-01 1 set (Sub-plate single unit part no.)

*SY3200-5U1-X90 1 set (2-position double part no./Main valve fluororubber specification)

Ordering example when mounting a manifold option (spacer, etc.)

SY30M-27-1-W1-01 1 set (Sub-plate single unit part no.)

*SY3400-5U1 1 set (3-position exhaust center part no.)

*SY30M-60-1A 1 set (Part no. for double check spacer with residual pressure release valve)

⚠ Caution

Due to the properties of the double check spacer, assembly carried out by the customer is not recommended. If a double check spacer is to be used, be sure to order the type that is built in to the sub-plate as shown in the ordering example above.

Sub-plate Parts Nos.

* 3 pcs. for the SY7000

No.	Description	Part no.			Note
		SY3000	SY5000	SY7000	
①	Valve mounting screw	Round head combination screw (M2 x 32)	SY3000-23-24A (M2 x 32)	SY5000-221-1A (M3 x 32.5)	Part numbers shown on the left are for 10 valves (20 pcs.). (30 pcs. for the SY7000)
		Hexagon socket head cap screw (M2 x 32)	SY3000-222-1A (M2 x 32)	SY5000-222-1A (M3 x 32.5)	
②	Base gasket (for sub-plate)	SY30M-11-1A	SY50M-11-1A	SY70M-11-1A	Part numbers shown on the left are for 10 valves (10 pcs.).
③	M12 waterproof connector cable	ZS-37-L			Cable length: 300 mm Cable weight: Approx. 18 g
		ZS-37-M			Cable length: 500 mm Cable weight: Approx. 23 g
		ZS-37-N			Cable length: 1000 mm Cable weight: Approx. 36 g
		ZS-37-P			Cable length: 2000 mm Cable weight: Approx. 62 g
		ZS-37-C			Cable length: 5000 mm Cable weight: Approx. 140 g

SY3000/5000/7000 Series Specific Product Precautions 1

Be sure to read this before handling the products. For safety instructions and 3/4/5-port solenoid valve precautions, refer to the "Handling Precautions for SMC Products" and the "Operation Manual" on the SMC website: <https://www.smcworld.com>

Environment

⚠ Warning

1. Do not use valves in atmospheres of corrosive gases, chemicals, sea water, water, water vapor, or where there is direct contact with any of these.
2. Products compliant with IP67 enclosures (based on IEC60529) are protected against dust and water, however, these products cannot be used in water. If using in an environment that is exposed to water and dust splashes, take measures such as using a protective cover.
3. When using built-in silencer type manifold with an IP67 enclosure, keep the exhaust port of the silencer from coming in direct contact with water or other liquids.
4. The metal seal valve is provided with a hole to discharge the pilot EXH. When using in atmospheres containing water and dust, mount it horizontally.

Valve Mounting

⚠ Caution

Mount it so that there is no slippage or deformation in gaskets, and tighten with the tightening torque as shown to the right.

Series	Thread size	Tightening torque
SY3000	M2	0.16 N·m
SY5000/7000	M3	0.8 N·m

Manual Override

⚠ Warning

■ Push-turn locking lever type [E type]

Push down on the manual override by finger until it stops, and then turn it 60° clockwise. The manual override is then locked. To release it, turn it counterclockwise. If it is not turned, it can be operated the same way as the non-locking push type.

Carefully check the manual override projection amount.
Max. (at OFF): 3.7 mm

Manual Override

⚠ Warning

Regardless of an electric signal for the valve, the manual override is used for switching the main valve. Connected actuator is started by manual operation. Use the manual override after confirming that there is no danger.

■ Non-locking push type

Push down on the manual override button until it stops.

■ Push-turn locking slotted type [D type]

Push down on the manual override with a small flat head screwdriver until it stops, and then turn it 90° clockwise. The manual override is then locked. To release it, turn it counterclockwise.

If it is not turned, it can be operated the same way as the non-locking push type.

⚠ Caution

Do not apply excessive torque when turning the manual override. [0.1 N·m]

When locking the manual override, be sure to push it down before turning. Turning without first pushing it down can cause damage to the manual override and other trouble such as air leakage, etc.

■ Slide locking type (Manual)

It is locked by sliding the manual override all the way in the direction indicated by the arrow (ON side) with a small flat head screwdriver or with your fingers. Slide it in the direction indicated by the arrow (OFF side) to release it.

SY3000/5000/7000 Series

Specific Product Precautions 2

Be sure to read this before handling the products. For safety instructions and 3/4/5-port solenoid valve precautions, refer to the “Handling Precautions for SMC Products” and the “Operation Manual” on the SMC website: <https://www.smcworld.com>

Back Pressure Check Valve

⚠ Caution

- There are two types of back pressure check valves; the type which is built into a valve (rubber seal type only) and the type which is built in on the manifold side with a connector connection. Both types have a check valve built in to prevent back pressure.
Please note that for this reason, even if a valve with an external pilot specification is used, it cannot be pressurized from exhaust port [3/5(E)]. As compared with the types which do not integrate the back pressure check valve, C value of the flow rate characteristics goes down. Please contact SMC for details.
- The manifold installed type back pressure check valve assembly is assembly parts with a check valve structure. However, since slight air leakage against the back pressure is allowed due to its structure, adverse effects of the back pressure due to increase in exhaust resistance cannot be prevented if the manifold exhaust port and other exhaust ports are put together for piping or if the piping diameter is narrowed. As a result, this may cause the actuator and air operated equipment to malfunction. So, be careful not to restrict the exhaust air. If the exhaust resistance becomes large, select a built-in valve type with rubber seal.
- Do not switch valves when A or B port is open to the atmosphere, or while the actuators and air operated equipment are in operation. For built-in valve type with rubber seal, the back pressure prevention seal may be peeled off, which may cause air leakage or malfunctions. Use caution especially when performing a trial operation or maintenance work.

Exhaust Throttle

⚠ Caution

The SY series pilot valve and main valve share a common exhaust inside the valve. Therefore, do not block the exhaust port when arranging the piping.

Used as a 3-Port Valve

⚠ Caution

■ In case of using a 5-port valve as a 3-port valve

The SY3000/5000/7000 series can be used as normally closed (N.C.) or normally open (N.O.) 3-port port valves by closing one of the cylinder ports 4(A) or 2(B) with a plug. However, they should be used with the exhaust ports kept open. They are convenient at times when a double solenoid type 3-port valve is required.

Plug position		B port	A port
Type of actuation		N.C.	N.O.
Number of solenoids	Single	<p>(A)4 2(B) (EA)5 1 3(EB) (P)</p>	<p>(A)4 2(B) (EA)5 1 3(EB) (P)</p>
	Double	<p>(A)4 2(B) (EA)5 1 3(EB) (P)</p>	<p>(A)4 2(B) (EA)5 1 3(EB) (P)</p>

Valve and Manifold Combination

The SY series plug-in valve has the common configuration of the valve mounting surface between base-mounted type (SY $\frac{3}{4}$ □□□) and top-ported type (SY $\frac{3}{4}$ □□3□), therefore, it can be mounted to all manifolds of the side-ported type (Type 50 and Type 10), the bottom-ported type (Type 51 and Type 11), and the top-ported type (Type 52 and Type 12). For example, air output can be obtained from both sides of the A and B ports of the manifold and the valve by mounting a top-ported valve to a side-ported or bottom-ported manifold, and a pressure switch can be connected to the output port on one side. However, when selecting valves and manifolds, note that when a base-mounted valve is mounted to a top-ported manifold, there will be no output from the A and B port.

SY3000/5000/7000 Series

Specific Product Precautions 3

Be sure to read this before handling the products. For safety instructions and 3/4/5-port solenoid valve precautions, refer to the "Handling Precautions for SMC Products" and the "Operation Manual" on the SMC website: <https://www.smcworld.com>

Light/Surge Voltage Suppressor

⚠ Caution

Light/surge voltage suppressor (□Z)

Surge voltage suppressor (□NS)

Negative common

Double solenoid, 3-position, 4-position

Light/surge voltage suppressor (□Z)

Surge voltage suppressor (□NS)

■ With power saving circuit

Power consumption is decreased to approx. 1/3 compared with the standard product by reducing the wattage required to hold the valve in an energized state. (Effective energizing time is over 67 ms at 24 VDC.)

* Be careful of the energizing time, as quick response and high pressure types will become operational when the energizing time is over 40 ms.

<Standard>

Electric circuit diagram (With power saving circuit) In the case of single solenoid

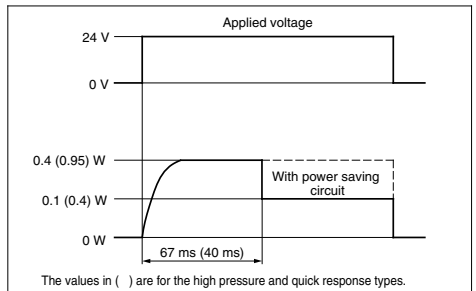

<High pressure>

The circuit shown above reduces the power consumption for holding in order to save energy. Refer to the electrical power waveform as shown below.

<Electrical power waveform with power saving circuit>

- The 12 VDC specification with power saving circuit (standard specification) does not have the polarity protection diode. Do not make a mistake with the polarity.
- Since the voltage will drop by approx. 0.5 V due to the transistor, pay attention to the allowable voltage fluctuation. (For details, refer to the solenoid specifications of each type of valve.)

Residual voltage of the surge voltage suppressor

* If a varistor or diode surge voltage suppressor is used, there is some residual voltage to the protection element and rated voltage. Therefore, refer to the table below and pay attention to the surge voltage protection on the controller side. Also, since the response time does change, refer to the valve specifications on page 405.

Residual Voltage

Surge voltage suppressor	DC	
	24 V	12 V
S, Z	Approx. 1 V	
R, U	Approx. 47 V	Approx. 32 V

SY3000/5000/7000 Series

Specific Product Precautions 4

Be sure to read this before handling the products. For safety instructions and 3/4/5-port solenoid valve precautions, refer to the “Handling Precautions for SMC Products” and the “Operation Manual” on the SMC website: <https://www.smcworld.com>

Continuous Duty

⚠ Caution

If a valve is energized continuously for long periods of time, the rise in temperature due to heat-up of the coil assembly may cause a decline in solenoid valve performance, reduce service life, or have adverse effects on peripheral equipment. In particular, if three or more adjacent stations on the manifold are energized simultaneously for extended periods of time or if the valves on A side and B side are energized simultaneously for long periods of time, take special care as the temperature rise will be greater. In such cases, if it is possible to select a valve with a power-saving circuit, be sure to do so.

UL Approved Product

⚠ Caution

When conformity to UL is required, the product should be used with a UL1310 Class 2 power supply.

The product is a UL approved product only if it has a  mark on the body.

Countermeasure for Surge Voltage Intrusion

■ Surge voltage intrusion

With non-polar type valves, at times of sudden interruption of the loading power supply, such as emergency shutdown, surge voltage intrusion may be generated from loading equipment with a large capacity (power consumption), and a valve in a de-energized state may switch over (see Figure 1). When installing a breaker circuit for the loading power supply, consider using a valve with polarity (with polarity protection diode), or install a surge absorption diode between the loading equipment COM line and the output equipment COM line (see Figure 2).

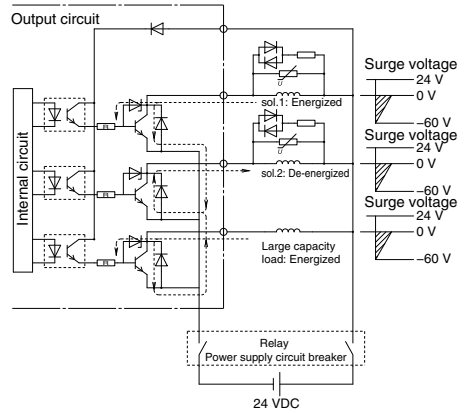

Figure 1. Surge intrusion circuit example (NPN outlet example) (24 VDC)

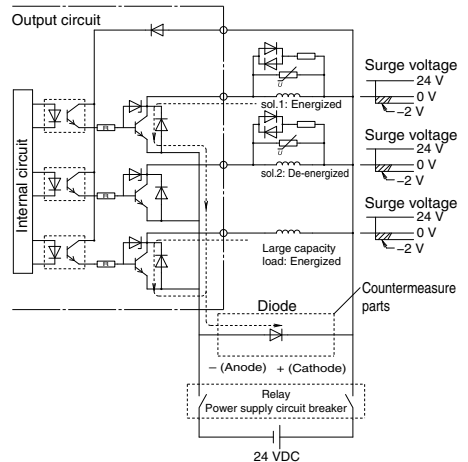

Figure 2. Surge intrusion countermeasure example (NPN outlet example) (24 VDC)

SY3000/5000/7000 Series

Specific Product Precautions 5

Be sure to read this before handling the products. For safety instructions and 3/4/5-port solenoid valve precautions, refer to the “Handling Precautions for SMC Products” and the “Operation Manual” on the SMC website: <https://www.smcworld.com>

Light Indication

When equipped with indicator light and surge voltage suppressor, the light window turns red when solenoid a is energized, and it turns green when solenoid b is energized.

Manifold Indication Symbol

⚠ Caution

The letter “S” is indicated on manifold blocks for the SY series Type 1□ (connector connecting base) as shown below. This indication refers to the type of substrate assembly (single wiring) inside the manifold blocks. When there is no symbol, double wiring is used.

When the manifold specification sheet does not include a wiring specification, all stations will be double wiring specification. In this case, single and double solenoid valves can be mounted in any position, but when a single valve is used, there will be an unused control signal. To avoid this, indicate positions of manifold blocks for single wiring specification and double wiring specification on a manifold specification sheet. (Note that double, 3-, or 4-position valves cannot be used for manifolds blocks with single wiring specification [S].)

Type 5□ (Metal Base), Type 1□ (Connector Connecting Base) Changing Connector Entry Direction

⚠ Caution

Connector direction for electrical entry of D-sub connector <IP40> and flat ribbon cable can be changed. If the directional change is required, slide the lever on the side of the connector block to the FREE position, and then change the direction as shown in the figure. Also, before connecting the connector, be sure to return the lever to the LOCK position. (If the lever is difficult to slide, move the connector a little bit to make it easier to slide the lever.)

If an excessive force is applied on the connector in the LOCK position, the connector block may be damaged. Also, using in such a way that the connector floats in the FREE position, it may cause the lead wire, etc., to break. Thus, refrain from using in these ways.

Type 5□
(Metal base)

Type 1□
(Connector connecting base)

SY3000/5000/7000 Series

Specific Product Precautions 6

Be sure to read this before handling the products. For safety instructions and 3/4-5-port solenoid valve precautions, refer to the "Handling Precautions for SMC Products" and the "Operation Manual" on the SMC website: <https://www.smcworld.com>

Substrate Assemblies inside Manifolds

⚠ Caution

Substrate assemblies inside of manifolds cannot be taken apart. Attempting to do so may damage parts.

Fixation of DIN Rail Mounting Type Manifolds

⚠ Caution

- When the manifold is fixed with bolts on a mounting surface, etc., it can be operated just by fixing on both ends of the DIN rail if the bottom surface of the DIN rail is entirely in contact with the mounting surface when mounted horizontally. However, if it is used with other mounting or with side or reverse mounting, fix the DIN rail with bolts at regular intervals. As a guide, insert bolts in 2 locations for 2-5 stations, 3 locations for 6-10 stations, 4 locations for 11-15 stations, 5 locations for 16-20 stations, and 6 locations for 21-24 stations.
- When using the manifold with DIN rail in an environment where any vibration or impact is applied to it, the DIN rail itself may be broken. In particular, if the installation surface vibrates when mounting the manifold on the wall or if a load is directly applied to the manifold, the DIN rail may be broken, causing the manifold to drop. When any vibration, impact, or load is applied to the manifold, be sure to use the direct mounting manifold.

Port Block Assembly and How to Change Piping Types between Top and Side

⚠ Caution

For the top-ported type, the port size of A and B ports can be changed by switching the port block assemblies which are mounted on the body. The piping method can also be changed by switching the top-ported type port block assembly with the side-ported type cover assembly. Also, it may cause air leakage if the mounting screws are not tightened securely enough when they are switched. Take care to tighten to the correct tightening torque.

Refer to pages 411 and 412 for part numbers of port block assembly and body cover assembly for A, B port and page 614 for part numbers of port block assembly and body cover assembly for P, E port.

When switching them while valves are mounted on a manifold, remove the clip with a flat head screwdriver before switching the port plugs and the One-touch fittings. It may cause air leakage if the mounting screws are not tightened or the clip is not inserted securely enough when they are switched. Take care to tighten to the correct tightening torque.

⚠ Caution

Tightening torque

- M2: 0.16 N·m (SY3000)
- M3: 0.8 N·m (SY5000/7000)

■ How to change while mounted on a manifold

SY3000/5000/7000 Series Specific Product Precautions 7

Be sure to read this before handling the products. For safety instructions and 3/4/5-port solenoid valve precautions, refer to the "Handling Precautions for SMC Products" and the "Operation Manual" on the SMC website: <https://www.smcworld.com>

How to Replace One-touch Fittings

⚠ Caution

By replacing One-touch fittings of valve or manifold base, it is possible to change the connection diameter of the 4(A), 2(B), 1(P), 3/5(E) ports.

When replacing the One-touch fittings, remove the clip or the plate and the plate mounting screws with a screwdriver before pulling the One-touch fittings off. Mount the One-touch fittings by following the removal procedure in reverse.

It may cause air leakage if the mounting screws are not tightened or the clip and the clip plate are not inserted securely enough when they are switched. Take care to tighten to the correct tightening torque. Refer to page 615 for part numbers of One-touch fittings for valve or manifold.

	ø8, ø5/16"	SY50M-10-4A

*1 The part number for mounting the SY5000 is SY50M-10-4A.

* The part number for the SY5000/7000 mixed mounting type is SY70M-10-4A.

Other Tube Brands

⚠ Caution

1. When using other than SMC brand tube, confirm that the following specifications are satisfied with respect to the tube outside diameter tolerance.

- 1) Nylon tube within ± 0.1 mm
- 2) Soft nylon tube within ± 0.1 mm
- 3) Polyurethane tube within $+0.15$ mm
-0.2 mm

Do not use tube which do not meet these outside diameter tolerances. It may not be possible to connect them, or they may cause other trouble, such as air leakage or the tube pulling out after connection.

One-touch Fittings

■ Tube attachment/detachment for One-touch fittings

1) Tube attachment

1. Take a tube having no flaws on its periphery and cut it off at a right angle. When cutting the tube, use tube cutters TK-1, 2, or 3. Do not use pliers, nippers, scissors, etc. If cutting is done with tools other than tube cutters, the tube may be cut diagonally or become flattened, etc., making a secure installation impossible, and causing problems such as the tube pulling out after installation or air leakage. Allow some extra length in the tube.
2. Grasp the tube and push it in slowly, inserting it securely all the way into the fitting.
3. After inserting the tube, pull on it lightly to confirm that it will not come out. If it is not installed securely all the way into the fitting, this can cause problems such as air leakage or the tube pulling out.

2) Tube detachment

1. Push in the release button sufficiently, pushing its collar equally around the circumference.
2. Pull out the tube while holding down the release button so that it does not come out. If the release button is not pressed down sufficiently, there will be increased bite on the tube and it will become more difficult to pull it out.
3. When the removed tube is to be used again, cut off the portion which has been chewed before reusing it. If the chewed portion of the tube is used as is, this can cause trouble such as air leakage or difficulty in removing the tube.

SY3000/5000/7000 Series Specific Product Precautions 8

Be sure to read this before handling the products. For safety instructions and 3/4-5-port solenoid valve precautions, refer to the "Handling Precautions for SMC Products" and the "Operation Manual" on the SMC website: <https://www.smcworld.com>

One-touch Fittings

⚠ Caution

When fittings are used, they may interfere with one another depending on their types and sizes. Therefore, the dimensions of the fittings to be used should first be confirmed in their respective catalogs. Fittings whose compliance with the SY series is already confirmed are stated below. If the fitting within the applicable range is selected, there will not be any interference.

Applicable Fittings: KQ2H, KQ2S Series

Series	Model	Piping port	Port size	Fittings	Applicable tubing O.D.

Modular Connection Type 5-Port Solenoid Valve SY3000/5000-X990

Plug-in Type

Can be connected to F.R.L. units

Flow rate characteristics

C [dm³/(s·bar)]
SY3000: 1.6^{*1}
SY5000: 3.6^{*1}

*1 4/2 ⇒ 3/5 (A/B ⇒ E)

Allows for space saving and reduced piping labor.

② Spacer with bracket

③ Modular connection type 5-port solenoid valve

① Air combination

Ordering Example

* Products do not come assembled. They should be ordered separately and assembled by the customer.

- ① Air combination AC30C-03E-D 1 pc.
- ② Spacer with bracket Y300T-D 1 pc.
- ③ Modular connection type/5-port solenoid valve SSY3-12F1-10U-X990 1 pc.
- * SY3230-51-C4 10 pcs.

Valve Seal Type: Rubber Seal Top Ported (Type 12)

Manifold model	Valve model	Weight: W [g] ^{*1} (n: stations)
SS5Y3	SY3130/SY3230	25.1n + 465
SS5Y5	SY5130/SY5230	66.3n + 717

*1 Weight: W is the value of the internal pilot and D-sub connector manifold with One-touch fitting straight piping type.

To obtain the weight with valves attached, add the valve weights given in the **Web Catalog** for the appropriate number of stations.

* The other specifications are the same as those of the standard model.
For details, refer to the **Web Catalog**.

Type 12 Top Ported **SS5Y 3 - 12 [] [] - 05 D S - N - X990**

Type 10 Side Ported **SS5Y 3 - 10 [] [] - 05 D S - C6 - X990**

* There is no bottom ported type.

More information can be viewed here.

Enter the standard product number.
 * The A and B ports are only compatible with straight unions.
 * DIN rail mounting is not supported.

P-port modular connection type
 SY3000 is modular size 30.
 SY5000 is modular size 40.

02	2 stations	
:	:	(Up to 8 solenoids available)
08	8 stations	

*1 Double wiring: 2-position single, 2-position double, 3-position, and 4-position valves can be used on all manifold stations. Use of a 2-position single solenoid will result in an unused control signal. If this is not desired, order with a specified layout.
 *2 Specified layout: Indicate the wiring specifications on the manifold specification sheet.
 (Note that 2-position double, 3-position, and 4-position valves cannot be used where single wiring has been specified.)
 * The blanking plate assembly is included in this number.

EX500 128 Points: S□

EX600: S6□□□

2 Valve stations

Symbol	Stations	Note
02	2 stations	Double wiring*1

- *1 Double wiring: 2-position single, 2-position double, 3-position, and 4-position valves can be used on all manifold stations. Use of a 2-position single solenoid will result in an unused control signal. If this is not desired, order with a specified layout.
- *2 Specified layout: Indicate the wiring specifications on the manifold specification sheet. (Note that 2-position double, 3-position, and 4-position valves cannot be used where single wiring has been specified.)
- * The blanking plate assembly is included in this number.
- * When the product without the SI unit (S0) is selected, note the maximum number of solenoids of the SI unit that will be mounted. If the layout is specified, indicate it on the manifold specification sheet. (Excludes the EX600)

EX250: S□□□

2 Valve stations

Symbol	Stations	Note
02	2 stations	Double wiring*1
:	:	
10	10 stations	
02	2 stations	Specified layout*2 (Up to 20 solenoids available)
:	:	
10	10 stations	

- *1 Double wiring: 2-position single, 2-position double, 3-position, and 4-position valves can be used on all manifold stations. Use of a 2-position single solenoid will result in an unused control signal. If this is not desired, order with a specified layout.
- *2 Specified layout: Indicate the wiring specifications on the manifold specification sheet. (Note that 2-position double, 3-position, and 4-position valves cannot be used where single wiring has been specified.)
- When determining the number of valve stations, note that the maximum number of solenoids for the AS-Interface applicable SI Unit specification is as follows.
 - 8 in/8 out specification: Max. 8 solenoids
 - 4 in/4 out specification: Max. 4 solenoids
- * The blanking plate assembly is included in this number.
- * For the product without the SI unit (S0), note the maximum number of solenoids of the SI unit that will be mounted. If the layout is specified, indicate it on the manifold specification sheet.

EX260: S□

2 Valve stations

In the case of the 32-output SI unit

Symbol	Stations	Note
02	2 stations	Double wiring*1

In the case of the 16-output SI unit

Symbol	Stations	Note
02	2 stations	Double wiring*1
:	:	
08	8 stations	
02	2 stations	Specified layout*2 (Up to 16 solenoids available)
:	:	
10	10 stations	

- *1 Double wiring: 2-position single, 2-position double, 3-position, and 4-position valves can be used on all manifold stations. Use of a 2-position single solenoid will result in an unused control signal. If this is not desired, order with a specified layout.
- *2 Specified layout: Indicate the wiring specifications on the manifold specification sheet. (Note that 2-position double, 3-position, and 4-position valves cannot be used where single wiring has been specified.)
- * The blanking plate assembly is included in this number.
- * For the product without the SI unit (S0), note the maximum number of solenoids of the SI unit that will be mounted. If the layout is specified, indicate it on the manifold specification sheet.

EX126: S4□

EX120: S3□

2 Valve stations

Symbol	Stations	Note
02	2 stations	Double wiring*1
:	:	
08	8 stations	
02	2 stations	Specified layout*2 (Up to 16 solenoids available)
:	:	
10	10 stations	

- *1 Double wiring: 2-position single, 2-position double, 3-position, and 4-position valves can be used on all manifold stations. Use of a 2-position single solenoid will result in an unused control signal. If this is not desired, order with a specified layout.
- *2 Specified layout: Indicate the wiring specifications on the manifold specification sheet. (Note that 2-position double, 3-position, and 4-position valves cannot be used where single wiring has been specified.)
- * The blanking plate assembly is included in this number.
- * Since R2 type SI unit has 8 outputs, note that up to 8 solenoids can be accommodated. (For the EX120)

How to Order Equipped Valves (With mounting screw)

Base Mounted

Base mounted **SY 3 1 0 0** - **5** **1** -

* There are no metal seal types.

More information can be viewed here.

1 Series

3	SY3000
5	SY5000

2 Type of actuation

1	2-position	Single
		Double
3	3-position	Closed center
		Exhaust center
		Pressure center
		N.C./N.C.
A	4-position dual 3-port	N.O./N.O.
		N.C./N.O.

6 Pilot valve option

Nil	Standard (0.7 MPa)
B	Quick response type (0.7 MPa)

Top Ported

Top ported **SY 3 1 3 0** - **5** **1** - **C6** -

* There are no metal seal types.

More information can be viewed here.

1 Series

3	SY3000
5	SY5000

2 Type of actuation

1	2-position	Single
		Double
3	3-position	Closed center
		Exhaust center
		Pressure center
		N.C./N.C.
A	4-position dual 3-port	N.O./N.O.
		N.C./N.O.

6 Pilot valve option

Nil	Standard (0.7 MPa)
B	Quick response type (0.7 MPa)

SY3000/5000-X990

Dimensions: SY3000 Series

* These figures show the "SS5Y3-10F2-05U-C6-X990."
* The other dimensions, as well as those of the top ported type, are the same as those of the standard model. For details, refer to the **Web Catalog**.

D-sub, Flat Ribbon (Type F)

Refer to the table below for the L1 and L2 dimensions of the D-sub and flat ribbon (Type F).

L: Dimensions

n: Stations	2	3	4	5	6	7	8	9	10
L1	107.6	118.1	128.6	139.1	149.6	160.1	170.6	181.1	191.6
L2	63	73.5	84	94.5	105	115.5	126	136.5	147

IP67 D-sub (Type FW)

Refer to the table below for the L1 and L2 dimensions of the IP67 D-sub (Type FW).

L: Dimensions

n: Stations	2	3	4	5	6	7	8	9	10
L1	124.5	135	145.5	156	166.5	177	187.5	198	208.5
L2	63	73.5	84	94.5	105	115.5	126	136.5	147

Dimensions: SY3000 Series

Terminal Block Box (Type T) Refer to the table below for the L1 and L2 dimensions of the terminal block box (Type T).

L: Dimensions

n: Stations	2	3	4	5	6	7	8	9	10
L1	183.3	193.8	204.3	214.8	225.3	235.8	246.3	256.8	267.3
L2	63	73.5	84	94.5	105	115.5	126	136.5	147

Terminal Block Box/Spring Type (Type TC) Refer to the table below for the L1 and L2 dimensions of the terminal block box/spring type (Type TC).

L: Dimensions

n: Stations	2	3	4	5	6	7	8	9	10
L1	162	172.5	183	193.5	204	214.5	225	235.5	246
L2	63	73.5	84	94.5	105	115.5	126	136.5	147

Lead Wire (L), Circular Connector (M) Refer to the table below for the L1 and L2 dimensions of the lead wire and circular connector.

L: Dimensions

n: Stations	2	3	4	5	6	7	8	9	10
L1	131	141.5	152	162.5	173	183.5	194	204.5	215
L2	63	73.5	84	94.5	105	115.5	126	136.5	147

EX500 (Type SA3) Refer to the table below for the L1 and L2 dimensions of the EX500 (Type SA3).

L: Dimensions

n: Stations	2	3	4	5	6	7	8	9	10
L1	122.7	133.2	143.7	154.2	164.7	175.2	185.7	196.2	206.7
L2	63	73.5	84	94.5	105	115.5	126	136.5	147

EX600 (M12 Connector) Calculate the L1 dimension of the EX600 (M12 connector) using the formula shown below.

$$L1 = 10.5 \times n1 + 154.5 + 47 \times n2$$

n1: Valve stations

n2: I/O unit stations

EX600 (7/8 Inch Connector) Calculate the L1 dimension of the EX600 (7/8 inch connector) using the formula shown below.

$$L1 = 10.5 \times n1 + 171 + 47 \times n2$$

n1: Valve stations

n2: I/O unit stations

SY3000/5000-X990

Dimensions: SY3000 Series

EX250

Calculate the L1 dimension of the EX250 using the formula shown below.

$$L1 = 10.5 \times n1 + 154.5 + 21 \times n2$$

n1: Valve stations

n2: I/O unit stations

EX260

Refer to the table below for the L1 and L2 dimensions of the EX260.

L: Dimensions

n: Stations	2	3	4	5	6	7	8	9	10
L1	122.7	133.2	143.7	154.2	164.7	175.2	185.7	196.2	206.7
L2	63	73.5	84	94.5	105	115.5	126	136.5	147

EX126

Refer to the table below for the L1 and L2 dimensions of the EX126.

L: Dimensions

n: Stations	2	3	4	5	6	7	8	9	10
L1	183.3	193.8	204.3	214.8	225.3	235.8	246.8	256.8	267.3
L2	63	73.5	84	94.5	105	115.5	126	136.5	147

EX120

Refer to the table below for the L1 and L2 dimensions of the EX120.

L: Dimensions

n: Stations	2	3	4	5	6	7	8	9	10
L1	115.9	126.4	136.9	147.4	157.9	168.4	178.9	189.4	199.9
L2	63	73.5	84	94.5	105	115.5	126	136.5	147

Dimensions: SY5000 Series

* These figures show the "SS5Y5-10F2-05U-C8-X990."
 * The other dimensions are the same as those of the standard model. For details, refer to the [Web Catalog](#).

D-sub, Flat Ribbon (Type F)

Refer to the table below for the L1 and L2 dimensions of the D-sub and flat ribbon (Type F).

L: Dimensions

n: Stations	2	3	4	5	6	7	8	9	10
L1	133.9	149.9	165.9	181.9	197.9	213.9	229.9	245.9	261.9
L2	87	103	119	135	151	167	183	199	215

IP67 D-sub (Type FW)

Refer to the table below for the L1 and L2 dimensions of the IP67 D-sub (Type FW).

L: Dimensions

n: Stations	2	3	4	5	6	7	8	9	10
L1	148	164	180	196	212	228	244	260	276
L2	87	103	119	135	151	167	183	199	215

SY3000/5000-X990

Dimensions: SY5000 Series

Terminal Block Box (Type T)

Refer to the table below for the L1 and L2 dimensions of the terminal block box (Type T).

L: Dimensions

n: Stations	2	3	4	5	6	7	8	9	10
L1	206.8	222.8	238.8	254.8	270.8	286.8	302.8	318.8	334.8
L2	87	103	119	135	151	167	183	199	215

Terminal Block Box/Spring Type (Type TC)

Refer to the table below for the L1 and L2 dimensions of the terminal block box/spring type (Type TC).

L: Dimensions

n: Stations	2	3	4	5	6	7	8	9	10
L1	185.5	201.5	217.5	233.5	249.5	265.5	281.5	297.5	313.5
L2	87	103	119	135	151	167	183	199	215

Lead Wire (L), Circular Connector (M)

Refer to the table below for the L1 and L2 dimensions of the lead wire and circular connector.

L: Dimensions

n: Stations	2	3	4	5	6	7	8	9	10
L1	154.5	170.5	186.5	202.5	218.5	234.5	250.5	266.5	282.5
L2	87	103	119	135	151	167	183	199	215

EX500 (Type SA3)

Refer to the table below for the L1 and L2 dimensions of the EX500 (Type SA3).

L: Dimensions

n: Stations	2	3	4	5	6	7	8	9	10
L1	146.2	162.2	178.2	194.2	210.2	226.2	242.2	258.2	274.2
L2	87	103	119	135	151	167	183	199	215

EX600 (M12 Connector)

Calculate the L1 and L2 dimensions for the EX600 (M12 connector) using the formula shown below.

$$L1 = 16 \times n1 + 167 + 47 \times n2$$

$$L2 = 16 \times n1 + 55$$

n1: Valve stations

n2: I/O unit stations

Dimensions: **SY5000** Series

EX600 (7/8 Inch Connector)

Calculate the L1 and L2 dimensions for the EX600 (7/8 inch connector) using the formula shown below.

$$L1 = 16 \times n1 + 183.5 + 47 \times n2$$

$$L2 = 16 \times n1 + 55$$

n1: Valve stations

n2: I/O unit stations

EX250

Calculate the L1 and L2 dimensions for the EX250 using the formula shown below.

$$L1 = 16 \times n1 + 167 + 21 \times n2$$

$$L2 = 16 \times n1 + 55$$

n1: Valve stations

n2: I/O unit stations

EX260

Refer to the table below for the L1 and L2 dimensions of the EX260.

L: Dimensions

n: Stations	2	3	4	5	6	7	8	9	10
L1	146.2	162.2	178.2	194.2	210.2	226.2	242.2	258.2	274.2
L2	87	103	119	135	151	167	183	199	215

EX126

Refer to the table below for the L1 and L2 dimensions of the EX126.

L: Dimensions

n: Stations	2	3	4	5	6	7	8	9	10
L1	206.8	222.8	238.8	254.8	270.8	286.8	302.8	318.8	334.8
L2	87	103	119	135	151	167	183	199	215

EX120

Refer to the table below for the L1 and L2 dimensions of the EX120.

L: Dimensions

n: Stations	2	3	4	5	6	7	8	9	10
L1	142.2	158.2	174.2	190.2	206.2	222.2	238.2	254.2	270.2
L2	87	103	119	135	151	167	183	199	215

*1 It can be selected only if no symbol or "S" is selected for the pilot and the piping.

SUP/EXH end block assembly accessories and the number of accessories

Accessories	SY3000	SY5000	Note
① Tension bolt	AC00530 (2 pcs.)	SX3000-145-21 (3 pcs.)	Supplied individually
② Manifold block gasket	SY30M-9-2	SY50M-9-2	Supplied individually

Gasket is mounted.

SY3000/5000-X990 Accessories Sold Separately (Spacer with Bracket)

Spacer with Bracket

Y **300** T - D

① ②

For the spacer with bracket holding screw tightening torque, refer to the AC-D series catalog.

Spacer with bracket (Y□T-D)

	Symbol	Description	①	
			Body size [Applicable AC size]	
			300 [SY3000 + AC30]	400 [SY5000 + AC40]
②	Bracket	T	Spacer with bracket	

Standard Specifications

Fluid	Air
Ambient and fluid temperatures	-5 to 60°C (No freezing)
Proof pressure	1.5 MPa
Max. operating pressure	1.0 MPa

⚠ Specific Product Precautions

Be sure to read this before handling the products. Refer to page 7 for safety instructions, pages 8 to 14 for 3/4/5-port solenoid valve precautions, pages 703 to 710 for SY3000/5000 specific product precautions, and the **Web Catalog** for F.R.L. units precautions.

Mounting

⚠ Warning

- When connecting other products such as F.R.L. units, use a spacer with a bracket (Y300T/Y400T-D series) to connect the manifold connection part so that no moment is applied.
- Be sure to secure the spacer with a bracket used for connection.
- Avoid excessive torsional moment and bending moment other than those caused by the manifold's own weight, as failure to do so may result in damage.

- Support external piping separately.
- Piping materials without flexibility, such as steel tube piping, are prone to being affected by excess moment loads and vibrations from the piping side. Use flexible tubing in between to avoid such effects.

Model Index (Alphanumeric Order)

SS5Y□-10	SY Type 10/Side Ported Plug-in Connector Connecting Base: D-sub Connector, Flat Ribbon Cable	p. 430
SS5Y□-10L	SY Type 10/Side Ported Plug-in Connector Connecting Base: Lead Wire	p. 466
